**The Long French Bread**

You read about in novels is here in reality. To realize how different it is from ordinary bread you have got to try it. Crisp, light and toothsome it is considered by many the finest bread made. Try a loaf and we feel confident you will always have it on your table hereafter.

TO OUR CUSTOMERS

Highland Park, Glencoe, Ravinia, Highwood, Lake Forest and Lake Bluff.

Beginning Saturday, February 10th, 1917 the retail price Bowman Rich Cream will be 12c per half pint.

This is the first advance in the retail price of Cream in over seven years in spite of the fact that the prices of other food articles have risen repeatedly during that time.

We regret very much that this raise is necessary but hope you will believe that our higher milk cost makes it quite unavoidable, if we would maintain our high fat content in the cream. As it is against the policy of this Company to lower the quality in order to reduce the costs, we trust the necessity of this increase of two cents a bottle will be apparent to you. Thanking you for past consideration,

We are yours very truly,

Bowman Dairy Company
109-110 Vine Avenue

UNITY NEEDED TO HOLD TRADE AFTER THE WAR

Labor Must Join In Effort to Meet New Competitive Spirit in Europe.

"Employers and workers must unite to meet the conditions that the restoration of peace in Europe will bring," says Eugene H. Outerbridge, president of the New York Chamber of Commerce. "I think there is no single element in industry before this country today of such vast importance as the matter of bringing these two constituents into mutual confidence and understanding in a real spirit of co-operation."

"In the world conditions now prevailing the peoples of the belligerent nations have, under the stress of a compelling necessity, developed a degree of co-operation and efficiency in production which they never before knew themselves capable and which has never been approached anywhere else in the world."

"The war has produced many unprecedented conditions. This is only one of them. After it is over there will be many we shall have to meet and many changes to which we shall have to adapt ourselves. Some cannot be foretold or foreseen, but it appears to me inevitable that the consciousness of the efficiency and productive power that has been developed in the European peoples will lead them not to turn to previous methods or lives of indolence and ease, but that they will turn their newly developed powers to production in peaceful pursuits and that we then shall have to meet in foreign fields, and perhaps in domestic trade, the force of a competitive production organized on a degree of efficiency which we have never before had to combat"—*Industrial Conservation*, N. Y.

Don't Rock the Industrial Boat.
After the European war is over the prosperity of the country will depend on the willingness of labor to co-operate with capital in fighting destructive competition from abroad. This is the consensus of opinion among men of affairs who have made a close study of conditions in the industrial and economic world.

During the reconstruction period that must follow the termination of the war, these men say, labor and capital will be shipmates, and if there is going to be any mutiny among the members of the crew the result will affect the wage earners' income. In this connection George Roberts, vice-president of the National City Bank of New York, says:

"I cannot get rid of the conviction that there will have to be a period of readjustment for the general business situation soon after the war. There is only one way to maintain high wages, and that is by increasing the efficiency of industry. We have to convince our own people of the advantages of large scale, economical production, and we have to satisfy our wage-earners that they are interested not in restricting production, but in increasing production. They must be brought to see not only that wages are dependent upon production, but that an increasing supply of all the comforts of life for the masses of the people is dependent upon it."—*Industrial Conservation*, N. Y.
