## Hair Cutting by Electricity at Lung's Barber Shop

The present is an age of invention—of doing things that were heretofore deemed impossible—and of devising machines and instruments for performing, easily, quickly and in a more satisfactory manner, tasks that were laborious and slow under former methods. Among the several most noteworthy mechanical achievements of this Twentieth Century advance is the

### MOORE ELECTRIC HAIR CUTTING MACHINE

which we have just installed. Quick action. Little time lost waiting for the call "You're next." One half time saved in the chair, having the work done. Artistic and perfectly satisfactory work, such as is practically impossible with shears. Individuality of style in combing the hair and trimming the beard is preserved, whether it's a "trim" or a "cut". Shears seldom accomplish this. No possibility of cutting, pricking or otherwise hurting a customer.

Come in and give this new machine a trial.
