

MASS MEETING FOR ALL HIGHLAND PARK

COUNCIL HOLDS MEETING

Mr. Myron E. Adams, Chaplain at Fort Sheridan is Enthusiastic over Local Hospitality Shown Boys

At the regular meeting of the Defense Council Tuesday night most of the members were present. Mayor Addington's report of the work being done in Lake Forest and the following letter from the State Council of Defense made the Council decide to call a mass meeting for Highland Park.

This meeting will be called in the near future and all questions pertaining to the war will be thoroughly discussed. Mr. Mason appointed the following committee, Mr. F. D. Porter, Mrs. W. J. Fyffe, Miss Margaretta Brown, Judge Frank L. Wean.

The letter from the State Council follows: Under the direction of the State Council of Defense of Illinois a state wide campaign of education on the why's and whereof's and wherewith's of the war will be inaugurated immediately.

A campaign will be organized to penetrate each school district and each city neighborhood of the entire state. Every person who can help in the campaign will be enlisted.

Direction of the campaign will be in the hands of the Council's Publicity Committee which is composed of Samuel Insull, Chairman of the State Council of Defense; Victor A. Olander, secretary, State Federation of Labor; John H. Harrison, publisher of the Danville Commercial News.

The State Council of Defense has had this matter under consideration for some weeks. It has been particularly concerned to effect cooperation and coordination of effort by all manner of civic and patriotic organizations so as to reach each community and every group of citizens in each community.

A report of progress and further consideration of the matter at the last meeting of the Council culminated in the adoption of the following resolution:

Whereas, The maintenance of good will and whole-hearted co-operation in the National interests between all classes of citizens on the basis of a thorough public recognition of mutual responsibilities and duties, as well as rights, will inspire to the utmost the unselfish spirit of devoted patriotism essential to a thoroughly vigorous and successful prosecution

of the war into which we have entered to safeguard the democracy of the world, therefore, be it

Resolved, That the Publicity Committee of the Illinois State Council of Defense be requested to develop and put into execution a plan under which volunteers among patriotic citizens in every community in Illinois shall be called upon to organize and address patriotic neighborhood meetings, for the purpose of rousing the people of our state to the greatest possible understanding and appreciation of the ideals of true patriotism and love of country from which will come certain and triumphant victory for our flag—for the people of America. Such meetings shall, wherever possible, be held in school houses and other public buildings and under the supervision of local neighborhood committees, reporting to and acting under the guidance and control of central city or county committees, which shall be appointed by the State Council of Defense, and shall be representative of all classes of citizens in such city or county.

The Council's Publicity Committee expects to inaugurate a campaign that will "go right down to the grass roots." It will utilize both literature and speakers, it will carry messages of the time pertinent to the war directly to the people in groups and neighborhood meetings organized under its own direction, and also by furnishing speakers for public occasions, organized gatherings, and so on, wherever there is opportunity.

A letter from Mayor Hastings asked the Council to find out about the coal situation and make a report. Mr. Burrigide Butler, Mr. James Duffy and Mr. W. R. Ruffner have this matter in charge.

Mr. Roland Hastings spoke of an interview with Mr. Myron E. Adams, the chaplain at Fort Sheridan, who was most enthusiastic over the work done by Highland Park in entertaining the men at the last camp. Mr. Adams has plans for carrying on the work for the next camp. He will be asked to present the matter at the next regular meeting of the Defense Council. We are glad to hear that Highland Park stands first among the towns of the North Shore for hospitality. To some of us who realize the tremendous need of our armies the lack of workers is most discouraging. If our men can brave the hardships of the trenches for our country surely every woman should do her part by helping make the supplies so necessary to their existence. And each man who is unable to go to the front can do his bit. What we need is to pull together and make Highland Park a leader for work of all kinds.

The necessity is just as plain to preserve the great crops that are now in sight as it was to plant them a few weeks ago.

TERMS USED IN FEEDING

Scientific Nomenclature Reduced to Every-Day Meanings.

Stockfood consists briefly of three chief parts or compounds, omitting the water and minerals. They are: Protein (containing nitrogen), a muscle former.

Fat (not containing nitrogen), a fuel or fattening substance.

Carbohydrates (meaning made of carbon, hydrogen and oxygen).

These three substances are called organic matter, because they will burn.

Mineral matter is called inorganic. An animal can live on protein alone, but would not under normal conditions, because protein (or albumen) is only found mixed with fat in the case of meat and with fat and carbohydrates in the case of plants and cereals.

Familiar examples of protein are white of egg, lean meat and the gluten which can be chewed out of wheat. Fat or oil we all know.

Carbohydrates include sugar, starch, cellulose, fibre, gums, etc.

To keep alive and not lose weight an animal must have small amounts of protein and larger amounts of fat or carbohydrates. They serve as building material to replace worn-out tissue and flesh and also to furnish power (energy) to move, work, and do all the inside work of the body.

The ash or mineral matter furnishes bone material and is also necessary but abundant in nature. A growing animal needs plenty of protein and ash (bone food) and of carbohydrates and fat. A grown-up animal needs less of either the first two, but plenty of the last two. A pregnant animal needs plenty of food for its unborn young.

BUYING FEED INGREDIENTS

Difficult to Buy Proper Feed Stuffs at Random.

(National Crop Improvement Service.)

There are not a dozen feed stores in the country that carry in stock all the ingredients of a first-class mixed feed at all times and at reasonable prices, and usually they do not carry feeds of the same high quality used by the mixers who work scientifically through a laboratory. This is human nature. Competition compels a dealer to sell the cheapest quality. The best quality of feed is seldom carried, because the average buyer will not pay the highest price. A good many experiment stations in a general way will advocate that a farmer mix all his own feed, but they are human like the rest of us and they will use recognized brands in their own feeding operations rather than go to the trouble and take the time to follow their own advice.

There are a good many herds at experiment stations which are kept as sort of a clinic for professors to practice theories upon. The poor brutes are used a good deal as guinea pigs in hospital practice. On the other hand, at the experiment stations are to be found many of the finest animals ever bred.

The mixed feeds of the first grade can be fed alone or in connection with home-grown corn, oats or barley. To do this widens your ration, and it is correct to do so if it will reduce your cost of feeding. Mixed feeds, therefore, are largely a matter of arithmetic.

You can usually get the result for less money than by feeding more expensive grains separately.

THE MANURIAL INGREDIENTS OF FEEDS.

(National Crop Improvement Service.)

Nitrogen is the most important and most valuable fertilizing element supplied by feeds, and it is in this element that they show the greatest variation.

The Connecticut Experiment Station states that it was found that the average mixed fertilizer contained 2.35 per cent nitrogen and showed in a table that eighteen of fifty-two different feeds contained 3.93 per cent. Among this list is cottonseed and linseed meals, gluten seed, middlings, brewers' and distillers' products, and a few of the feed mixtures. It is obvious, therefore, that a wise selection of feeds enhances the value of the manure and consequently plays an important part in farm economy.

BARLEY PRODUCTS.

(National Crop Improvement Service.)

Prof. J. P. Steele, in the Annual Report of the Connecticut Agricultural Station for 1912, says: "That malt sprouts should receive more consideration from dairymen, especially in comparison with many of the proprietary mixed feeds containing only from one-third to one-half as much protein as malt sprouts, prices being considered."

He also states that dried brewers' grains, prices considered, in connection with the feed's high analysis, is one of the cheapest high-grade feeds on the market.

WHAT'S IN A MIXED FEED?

(National Crop Improvement Service.)

A high-grade mixed feed suitable for any kind or breed of dairy cow should have high protein content, with an exact digestible analysis. It can be mixed with corn, oats, barley, hay or other forage, which should be grown upon the farm, provided the mixture would save the farmer any money. As a rule, the ingredients of the highest grades are corn, distillers' grains, gluten feed, cottonseed meal, hominy meal, malt sprouts, brewers' grains, linseed meal, pure wheat bran and salt. The best grades contain no cheap fillers of any kind and so the food is highly concentrated and roughage can be supplied at home.

Whom Uncle Sam Trusts You May Trust

Uncle Sam has officially designated this bank as a Government depository for the funds of the Liberty Loan.

Uncle Sam has made this appointment because this bank secured and forwarded to the Federal Reserve Bank subscriptions to the Liberty Loan in excess of \$100,000.00.

Uncle Sam values and appreciates the services and responsibility of this bank, both of which are tendered you.

Mrs. Philip S. Post is President of the Board, and the other members are: Mrs. McGregor Adams, Honorary President, Mrs. Robert B. Gregory, Mrs. Charles H. Thorne, Miss Mabel Dick, Mrs. Edward W. Bodman, Mrs. William G. Hibbard, Jr., Mrs. Grant Ridgeway, Miss Edith Boynton, Mrs. T. E. Donnelly, Mrs. James Simpson, Mrs. John W. Scott, and Mrs. Cornelius Lynde.

RAVINA PARK TO HAVE MME. MARIE RAPOLD

Continued from page 1

The appearance of Sig Giuseppe Bonfiglio and M. Alessandro Scurl, who were associated with Rosina Galli, the dancer, last year, at Ravina, has earned some comment and

some people are thinking that there is a possibility of the dancer's returning to the out door stage. The management announces that her return to the stage for this season is quite impossible owing to her continued ill health.
