**A MAN WITH VISION**

We are becoming so engrossed in preparation for the efficient prosecution of the war that we are forgetting to prepare for the period of reconstruction which must come after the war. The phrase "during the war" has become the common excuse for everything—even, in some states, the breaking down of child labor regulations.

But the secret of successful prosecution of modern warfare is the conservation of resources. Not only should business be carried on as usual but the future must be taken into account in every step taken.

Governor Lowden sees this with a clearer vision than most men. He fears the effect of the war on education. He sees the temptation of profitable employment which is likely to keep boys and young men out of school. He realizes this may mean a decrease in the supply of trained men for the future.

"The entire social structure will be changed by this war," the Governor says in a letter to Francis G. Blair, superintendent of public instruction. "It will be a new world with which we will have to deal at the close of this war. There will be such a need and such an opportunity for the educated man as has never existed before."

A moment's thought will convince anyone that this is true.

The Governor's advice to boys and young men not of military age to remain in school, is most important not only to the individual, but to the state and union. One passes the educational period but once. If the boy neglects going to school "during the war" his chance is gone. His education ends where he left off.

The Governor's advice must be heeded.

The pot of discontent in Germany boiled over, and out of it the military party emerges as strong as ever. Thus we observe the progress of liberal institutions in Germany.

The escape of Captain Frederick Hinsch from the United States to Germany is one of those things for which everybody ought to be grateful—that is, everybody who knows Captain Hinsch.

The systematic progress of the draft constitutes another reminder to Germany that America is not bluffing.

About the only compromise that the boys in the trenches would listen to would be to strike an average of July and January weather.

**HIGHLAND PARK CLUB**

If you have any spare rooms and if you want to rent them out to ladies of the officers in training at Fort Sheridan, call up Highland Park 165 and Mr. Newbould will list them. Don't keep a spare room, empty. Let it out to some lady who would like to be near her husband, father or brother who is training at the fort.

**PUBLIC LIBRARY**

The library will be closed on Labor Day.

**PRESBYTERIAN CHURCH**

In addition to the regular service, there is planned for Sunday morning a simple presentation service of Testaments to be given by the church to its soldier and sailor members who have entered the service of their country. Each member to be given a small Testament as an expression of the church's well wishes and as a sort of God speed. While no doubt most of the honor roll boys will have already left for their respective stations it is hoped that members of their families may be present and answer for them, to receive the books in their place and will forward them to the recipients. It was not possible to secure the books sooner as each testament is imprinted in gold letters with the name of the member, the church and the town and is in brown pig-skin, with fifteen colored illustrations has a pledge and a decision card, and is of a size which easily fits the vest pocket.

The Red Cross shop has been changed from the Elm Place Grammar school to the church parlors. Everyone is urged to come and do what he can for the needs of the country.

**CONTRACTS ARE LET FOR NEW HOSPITAL**

Continued from Page 1

have enrolled themselves with a guarantee of \$50 per annum for a period of three years. The Advisory Board believes that at least one hundred and fifty subscriptions should be obtained.

Our Mayor, the President of the Hospital and the Advisory Board, all citizens of Highland Park and well known in Chicago business circles, have not only contributed liberally to the building of the hospital, but have for several weeks given many of their evenings in their efforts to bring about the successful completion of the hospital plans which have been hanging fire for many months. They have worked hard and their efforts have met with success, but it really should not be necessary for these men to use every effort to obtain the needed support for this proposition. It is one of Highland Park's long neglected duties and no one can tell how soon the neglect of this duty may cause the loss of some of our most valued citizens or members of their families. Everyone in Highland Park should put his shoulder to the wheels and help this Advisory Board in their efforts to build this hospital, equip it, and furnish it free of debt with a reasonable maintenance fund for its permanent support.

**RECIPE FOR TOMATO SOUP**

Given at a lecture by Mrs. Fred Hatch, Spring Grove, Ill.

14 quarts tomatoes,  
14 sprigs parsley,  
14 stalks celery,  
5 whole cloves,  
5 bay leaves,  
7 onions (large),  
8 tablespoons salt,  
16 teaspoons sugar,  
2 teaspoons paprika.

Method—Cook thoroughly until tender, and strain, put into hot jars and sterilize 30 minutes (cold pack method). The uses of this soup are many. It can be used as soup; with macaroni; with cream or milk; and soda for cream of tomato soup; or with Knox's gelatin, cleared with egg shells, makes fine jelly for garnishing salads, etc.

Whenever Bill Hohenzollern becomes discontent because of American preparations he reads the Congressional Record and takes heart again.

Again President Wilson has told us why we must continue the war.

Pasteurized Milk is Good Clean Milk heated to approximately 145 degrees Fahrenheit and held at that temperature for 30 minutes, then cooled suddenly.

This process in no way destroys the nutritive value of the Milk. It does however, destroy harmful germ life that Milk may contain.

We say "May" because there is always a chance that Milk "may" contain harmful bacteria no matter how carefully handled before it reaches us. So to Safeguard you we Perfectly Pasteurize it—then cool it—then automatically bottle and cap it. So it comes to you untouched by human hands.
