Local Affairs of the week

By the Observer

Over three hundred guests attended the grand ball given by Campbell Chapter O. E. S. at Ravinia Park last Saturday evening. It was a great success financially as well as socially. The Phellix orchestra furnished the music.

The announcement is made of the marriage of Mrs. Vilette Windett Overly of Salt Lake City, Utah, who formerly lived in Highland Park, to Dr. E. R. M. Pennypacker, of Scranton, Pa., Master Sergeant in the Medical Corps stationed at Ft. Douglas, Utah. Sergeant and Mrs. Pennypacker will make their home in Ft. Douglas.

The Luther League of the Swedish Lutheran church, Highwood, met on Tuesday evening in the church parlors. The social committee had charge of the program.

Miss Helen Bournique was hostess to a number of friends at dinner preceding the entertainment at the Highland Park Club Saturday evening.

The Army and Navy Centre is proving each week end, and of course during the week, that the boys at Fort Sheridan love to visit Highland Park. Saturdays and Sundays are always "big days" and it seems as tho' all Fort Sheridan is very well represented by a good number of "samnites". There are many individuals, too, who entertain the boys at Sunday dinners, and during Sunday afternoons. Among those who have extended their courtesies are, Mr. and Mrs. George A. Mason, Mr. and Mrs. Bradshaw Egan, Mr. and Mrs. L. T. McClerman, Mr. and Mrs. Earl W. Spencer, Mr. and Mrs. John Tuttle, Mr. and Mrs. Harry A. Parkin, Mr. and Mrs. E. A. Bournique, Mr. and Mrs. A. R. Warner. There are many others who are doing their "bit", very much to the pleasure of the encamped patriots at the Fort and at the Lakes.

THE USE OF POWERFUL DRUGS WHEN TESTING THE EYES FOR GLASSES IS DANGEROUS

There is ample authority to prove that attacks of glaucoma (impairment of vision or ultimately blindness) have been caused by atropine, drops are claimed by some, necessary to relax the accommodation. Optometrists do this by the use of lenses, but their method does not paralyze the muscles, hence the eyes are being examined in their living functioning condition. This is more efficient, but not harmful, and this profession is advancing rapidly.

The testing of eyes for lenses is a mathematical and practical science, and has no more to do with medical education than religion has to do with the undertaker.
