nty

PROPOSED FOREST RESERVATIONS.

cabaret. It is a great incentive to the farm communities for better community life. This meeting out-of-doors under the shade of old venerable trees under which our forefathers had found shelter and the Indian before him, is a wonderful inspiring thing. It makes for better citizens and better men and womanhood. It arouses the best there is in us, so we may give in plenty to a better life and a higher civilization. It is here where the city-bred have a chance to revive their soul and to find themselves. It is here where they can hope to broaden their views and extend their horizon beyond the narrow sphere of the city complex. It provides the farmer and his family with a wholesome meeting place in a world not of his making. It is a book with pages richer than men can ever hope to write. It is in the primitive wild that is found the best that our country is yet to produce, and here lies the foundation on which to build a nobler and richer life.

This idea of reserving our native landscape in its most beautiful forms whether under the name of a County forest reserve, State Parks, or National Park, is one of the greatest steps ever taken for the future conservation of the American race. It is America that we are preserving. It is the things that the first settlers saw and that inspired them, that we want to protect and give as a heritage to those that follow us. Who would not be willing to lend a helping hand to this great cultural movement, who would through mere selfishness stand in the way of something that would be of lasting good to his descendants. It is a worthy subject. It is one of the things we can do and must do in this world struggle for democracy. It is a true democratic move, this idea of every citizen having a part and an ownership in the beautiful parts of our country. We need wild beauty for our souls as much as we need the fertile prairies for our material welfare. It will be but a short time, when the land along the lake shore will be one solid city between Chicago and the state line, and it will be many years before every bit of forested land left in Lake County will be the only source of health enjoyment for young and old. The time to purchase the land is now, when it can be had for a reasonable price, and there still remain areas unspoiled and worthy of reservation. Cook County waited fourteen years before the law came into effect, and during that time land values had risen four to five times, and a great deal of forested land cut down or built over. We want to profit by the mistakes of Cook County, we want to secure the land before the trees have been cut down and consequently beyond reservation. There

looked at the dollar a second (and likely thought into a good many years) and handed it to the Y. M. C. A. worker, saying "This is all I can give now, thank you." What can I do? Bet you this worker, could tell you a thousand ways in a thousand minutes and then think up a thousand more. The answers are everywhere, and come with the heard's wishes for them.

**Announcement**

Pasteurized Milk is Good Clean Milk heated to approximately 145 degrees Fahrenheit and held at that temperature for 30 minutes, then cooled suddenly.

This process in no way destroys the nutritive value of the Milk. It does however, destroy harmful germ life that Milk may contain.

We say "May" because there is always a chance that Milk "may" contain harmful bacteria no matter how carefully handled before it reaches us. So to Safeguard you we Perfectly Pasteurize it—then cool it—then automatically bottle and cap it. So it comes to you untouched by human hands.

**What the Bell System Is Doing**

**T**HE useful activity of the weather-beaten light-keepers and coast-guards depends not alone on courage and hardihood. They must have quick access to one another and to the others back from the shore. This ability of communication is doubly important in time of war.

To insure prompt and reliable means whereby the sentries of our coasts may talk and be talked to, the Bell System has made plans for providing telephone connections at about one hundred highhouses and two hundred coast-guard stations, involving the laying of about three hundred miles of submarine cable, the construction of over six hundred fifty miles of pole line, and the stringing of over twelve hundred miles of wire. About one million dollars will be expended.

This liberal expenditure is in the interest of National Defense, the objective for which all Americans are now striving.

**"OUR BOYS SO BRAVE AND TRUE"**

An appreciation in Song  
Tune: Battle Hymn of the Republic  
By Mrs. G. B. Cummings  
Now may all the loyal people come and listen to our song; Of the boys gone forth to battle we will sing both loud and long; In their uniforms so splendid they are bright, alert and strong; Our boys so brave and true.

CHORUS: Glory, glory, hallelujah! Glory, glory, hallelujah! Victory and fame await them Await our boys so true.

On the ocean or in trenches, in the air or rifle pit; You can bet your bottom dollar that each boy will do his bit; They will listen to peace parleys when the Kaiser has been hit; The boys who fight for you. CHORUS: Glory, etc.

"In the beauty of the lilies Christ was born across the sea;" And He gave His life a ransom for a world democracy; Our brave boys will do their utmost to preserve this legacy; The boys so dear to you. CHORUS: Glory, etc.
