Classes Preserve Youthful Appearance

Wearing glasses is one of the best preservers of a youthful appearance. This is because prolonged eyestrain causes wrinkles to appear prematurely and gives the countenance a strained, anxious, tired, drawn, cross look, which is very characteristic and is far more to be avoided, from the point of view of appearance, than the slight disfigurement of glasses. Indeed, so far from being unbecoming, there are some types of face to which glasses just add the finishing touch!

The Christmas cantata given by the Sunday School on Monday evening was very much enjoyed, in fact some said it excelled many programs that have been given in other years. The church was crowded.

Despite the cold weather early Christmas morning about a dozen "carollers" visited a number of homes singing beautiful Christmas hymns. Folks were not too timid to open their windows and call out into the crisp cold air "A Merry Christmas" or a hearty "Thank you!" The carollers felt well repaid even though they lost hours of sleep.

Elmer Gieser with his sister Katherine is home from Western Union College at LeMars, Iowa, spending the Christmas holidays with their parents. Elmer will preach in this church at 10:45 next Sunday morning. The Pastor will preach in the evening at 7:30 on "The Prophet of the Bleeding Heart and the Iron Will."

A watch night service will be held on New Year's Eve. Those who attended the service last year will witness that "staying in church till the next year" doesn't seem as long as it sounds. And besides its a blessed place in which to begin the new year. The program will be so interesting and inspiring that there will be no time for sleepiness.

Pasteurized Milk is Good Clean Milk heated to approximately 145 degrees Fahrenheit and held at that temperature for 30 minutes, then cooled suddenly.

This process in no way destroys the nutritive value of the Milk. It does however, destroy harmful germ life that Milk may contain.

We say "May" because there is always a chance that Milk "may" contain harmful bacteria no matter how carefully handled before it reaches us. So to Safeguard you we Perfectly Pasteurize it—then cool it—then automatically bottle and cap it. So it comes to you untouched by human hands.
