

To the Voters of Lake County:

I hereby announce that I am a candidate for reelection to the office of County Clerk, subject to the decision of the Republican Primary to be held Wednesday, September 11th, 1918.

I have served you in this capacity for nearly eight years. With this experience, coupled with a legal education, I feel that I am as capable of conducting this office for you as any one you could select.

The manner in which I have conducted my office you all know. If I have been efficient, you know it. If otherwise, you know it; therefore I need waste no words upon that subject.

It is my wish, however, to assure you that re-elected I shall render you the same service I have given you in the past with such improvement upon the same as my increased experience empowers me to add. I desire nothing other or further than the treatment accorded a tried servant, to be discharged or retained in accordance with the fidelity or lack of it with which I have performed my duties.

I therefore respectfully solicit your vote and support.

LEW A. HENDEE
County Clerk.

CHRISTIAN SCIENTISTS AID ALL IN SERVICE.

Welfare Work Conducted in 45 Army and Navy Concentration Centers.

Christian Science camp welfare work is now being carried on in forty-five army and navy camps in the United States under direction of the Christian Science War Relief and Camp Welfare Committee of The First Church of Christ, Scientist, in Boston. There are at present about seventy men and fifteen women engaged in this work, the women serving mainly as welfare room attendants.

Conducted at first independently, the camp welfare work has been merged with the war relief work which the Christian Scientists were doing in foreign countries before the United States entered the war. For both these purposes about one million dollars have been raised.

The aim of the Christian Science camp workers is to be as helpful as possible to all the men in the camps, whether or not they are Christian Scientists, and particularly to give assistance which may not be available at the time or place through any of the other camp welfare agencies. A feature of this phase of the work is an arrangement for keeping soldiers and sailors in close touch with their relatives.

QUICK COMMUNICATION.

Co-operating with the committee in Boston, there is a Christian Science camp welfare committee in each state. The committee in the home state of a soldier or sailor co-operates by mail and telegraph with the committee of the state in which he is camped or stationed to form a direct and constant link between the soldier or sailor and his relatives. Thereby the relatives are quickly made acquainted with needs of their boy in the service, and he is provided with an avenue of quick communication with his home.

This linking of home and camp, combined with the personal attention of the Christian Science workers in the camps, has frequently been the means of changing a soldier's outlook from one of gloom to one of joy, and not infrequently it has proved to be the means of relieving relatives of financial embarrassment. The committee in the home state making loans for use by the relatives until their boy in camp should be prepared to forward money to them.

HEALINGS RECORDED.

The net result, for which the Christian Science committees and camp workers have received many commendations, has been a noticeable raising of the morale of many men in the service and the development of a better feeling at home regarding the participation of their boys in the service.

The camp workers say there is an increased willingness among the commanding officers and surgeons to allow Christian Science treatment for those men who ask for it; and many Christian Science healings have been recorded. Recently, two requests for Christian Science services in hospital wards were received by camp workers from medical nurses who had observed the beneficial effects of Christian Science treatment.

In or near numerous camps, the Christian Science Committees have erected substantial buildings, with quiet places for reading and writing, and other buildings are in course of construction. A light touring car has been added to the equipment of the Christian Science camp workers at each camp to be used whenever and whenever possible in assisting the men.—Boston Sunday Advertiser, July 7, 1918.

PUBLIC LIBRARY

The following books have been added to the Public Library shelves:

- Hopkins—Our Country and Its Resources. Two Thousand Questions and Answers About the War.
- Brown—Handicaps of Childhood.

COLLEGE IS THE DOOR TO OPPORTUNITY NOW
War Department Says Country Needs Educated Men—Scientific Training Is Indispensable.

War Department: "You serve your country by going to college. To make sure that you do not lose thereby the opportunity of serving your country in a direct military capacity, you will be asked to join the special United States army college training unit that are to be formed. You will be liable for service at a moment's notice, but because you are worth more to the nation with your college training than without it, you will be expected to stay in college until called by the government. This is a war in which soldiers are not only marksmen, but also engineers, chemists, physicists, geologists, doctors, and specialists in many other lines. Scientific training is indispensable. Engineering skill is needed by the officers who direct every important military operation and who control our lines of transport and communication. In the same way chemical and physical knowledge are in constant demand at the front as well as behind the lines, while the task of saving the lives and restoring the health of hundreds of thousands of wounded calls for the services of regiments of military physicians. THE SCIENTIFIC TRAINING WHICH PREPARES A MAN TO FULFILL ONE OF THESE HIGHLY SPECIALIZED DUTIES AND THE MORE LIBERAL TRAINING WHICH HELPS TO DEVELOP THE QUALITIES OF LEADERSHIP NEEDED BY THE OFFICER OR ADMINISTRATOR ARE ESSENTIAL ELEMENTS OF MILITARY EFFICIENCY."

Major-General Leonard Wood: "Boys should remember that they are now serving in the best possible way by preparing themselves to serve more efficiently when the time comes. It is a great mistake for partly educated young men to rush to the colors now. We don't need them. It is very important they should finish their education."
