

## CONTINUED INTEREST IN COMMUNITY SERVICES

JOHN A. SCOTT-NEXT SUNDAY

On Sunday, December 15th, Dr. Frank Gunsaulus of Chicago will be the speaker of the evening

A large audience listened to the address of Mrs. Katherine Waugh McCulloch last Sunday evening at the Presbyterian Church, this number marking the third in a series of four lectures which are being presented by the churches as a community service enterprise.

The first part of her lecture was given over to a discussion of the war and its effects on three old sources of evil in our national life: liquor, vice, and graft. She emphasized the importance of prohibition and the beneficial results obtained in the American army through the elimination of alcohol. Sixteen states have already gone on record for the amendment, and it is confidently believed the remaining thirty-five will come in. Illinois should lose no time in joining the ranks.

"Our army almost free from vice," was the manner in which the speaker characterized Gen. Pershing's men who fought in France.

"The total lack of graft in high places," was cited as being unusual in time of war, although the profiteers on a small scale here and there, received a severe scourging.

The failure to continue the teaching of German in the public schools was sharply criticized and the importance of the language in our future trade with Germany emphasized.

The speaker was strongly opposed to national military training and the National Security League. The advocates of all such doctrines she denounced as traitors, and branded the entire scheme as useless.

The war had proved, according to Mrs. McCulloch, that a nation engaged in peaceful pursuits and all the luxurious industries of peace times, can simply lay down its tools and, if necessary, in the words of Bryan, "spring to arms overnight."

The speaker extolled the doctrine of pacifism and unpreparedness. Mrs. McCulloch approved of the new college curriculum, which in the education of boys in war time, had speedily sloughed off the non-essentials and restricted itself to those subjects only which were necessary for immediate use. She hoped that educators would see the importance of this business-like program for boys and continue with it in times of peace. The education of girls, however, had been little affected by the war, and the old curriculum was, for the most part, still holding in women's colleges; Greek, Latin, and some of the non-essential courses in literature.

The speaker advocated that a woman should sit at the peace conference, not through any intrinsic qualification necessary, but merely as a woman, and the representative of woman.

Speaker for Next Sunday Next Sunday night Professor John A. Scott of the Northwestern University will speak at the Community Evening Service on "The Results of the Armistice." Prof. Scott is a well known speaker in Highland Park. Raymond Koch of Great Lakes will sing.

The following Sunday night Dr. Frank W. Gunsaulus of Chicago will be the speaker.

All who are interested in community endeavor are urged to give these meetings their support.

## MEMORIAL ASSOCIATION ELECTS FIRST OFFICERS

A Meeting Will Soon be Called for the Selection of Working Committees

The first meeting of the Highland Park Memorial Association, since receipt of the state charter, was held in the City Hall on last Friday, Nov. 29th. The following officers were elected for one year:

Mr. Wm. R. Ruffner, president; Mr. Carleton Moseley, vice president; Mr. John V. Norcross, secretary; Mr. Wm. M. Wright, treasurer.

Mrs. J. L. Curtis, Mrs. J. McGregor Adams, and Messrs. Ed V. Price, D. F. Kelly and Frank L. Cheney will act as trustees.

Meeting for the selection of working committees will soon be held, and so the most recent example of the splendid patriotism of Highland Park citizens, is begun early, and on its way to success. It is with pardonable pride that the citizens of Highland Park realize that they have measured up to every worthy movement into which they have been called, since our country entered the great war, and before. To fittingly honor the men and women of our city, who have served directly in the great war, and those men and women who directly served them, is this next fine action before us. Honor to our soldiers, sailors, aviators, and workers forever.

## GET READY FOR THE NEXT LIBERTY LOAN

There are 2,000,000 Soldiers in France to be Fed and Clothed For an Indefinite Period

The war is over; peace reigns on earth. But in Europe today there are more than 2,000,000 American soldiers who took an important part in bringing the war to a victorious end, and these men must be fed and clothed for a long while to come. It is estimated by the War Department that the cost of equipping and maintaining an American soldier in Europe is \$423.37 a year.

The American army was transported to France at the rate of 250,000 men a month by giving them first call on the shipping facilities of the United States. If they could be brought back to their homes thus speedily—and it is doubtful that they could—it would require at least eight months. It is obvious, therefore, that we must continue to raise money with which to maintain our army abroad.

"We are going to have to finance peace for a while," said Secretary of the Treasury McAdoo, "just as we had to finance the war."

And that means that the American people, having supported four Liberty Loans with a patriotism which future historians will surely extol, are to be vouchsafed the opportunity to support our victorious peace. There will certainly be at least one more Government Loan. There probably will be two more—and possibly three. At any rate, the next loan must be prepared for and its success made certain. Get ready now to buy more bonds.

## MISS HALSEY TELLS OF WAR AID IN CHINA

Daughter of Prof. John Halsey of Lake Forest Just Returned From Three Years in Orient

How the Chinese women interested themselves in the work of the Red Cross was one of the most interesting things found in China by Miss Katherine Halsey, of Lake Forest, daughter of Prof. and Mrs. John J. Halsey. She has just returned from nearly three years service in that country in the interests of the Young Women's Christian Association.

Miss Halsey says the women raised funds, sewed bandages, made garments for the Allies, and did practically everything that the women of the Allied Nations have been doing to mitigate the sufferings of the fighters.

For a year Miss Halsey was at Shanghai as secretary of the Y. W. C. A., doing educational work in the English language. She was also connected with the editorial department of a Chicago magazine, probably the only one in that country published in the interests of Y. W. C. A. work.

Miss Halsey came home because of the illness of her father, Prof. Halsey, president of Lake Forest college, who is at a sanitarium at Winnetka. She had intended to remain in China five years.

## SHELL SHOCK VICTIMS BEING TREATED AT FORT

Forty Cases Have Already Been Received From France, More Arriving Daily

The Medical department of the army is entering into one of the biggest reconstruction problems that ever has confronted it. It is the problem of reclaiming "shell shockers" by means of physical training and development.

The practice is being tried out at the new Fort Sheridan reconstruction hospital. It is under the direction of Lieut. Colonel Theodore S. Proxmire, head of the hospital. Maj. Geo. W. Woodnick, the athletic director and Charlie White, lightweight prizefighter, are in charge of the exercises. Capt. F. A. Walters is in charge of the shell shock ward.

Already forty cases have been received from France. All of these men were in some stage of temporary insanity as a result of shock. The theory on which the work is being done is that physical development first and mental development later will bring about recovery.

The first exercise the men are put through is rope skipping. Then comes handball. This is strenuous. After that comes light work in basketball and the like. Every day the amount of work is increased until finally the man will be getting the same amount of work as a boxer in training for a big match.

In some cases recovery is affected in as short a time as ten days. This has been the fact in another of cases at the new base. The men are then sent home on a furlough to rest up. Meanwhile work is going forward at a rapid rate on the new buildings of the hospital. It is hoped that within a few days the hospital will be equipped to care for 1,500 men. The final capacity is to be 5,000.

## GOVERNMENT AID IN FINDING TEACHERS

FIFTY THOUSAND NEEDED Schools all Over the Country Have Suffered from the Demand for Men of Scientific Training

Fifty thousand teachers' places are vacant, and 120,000 persons are teaching this year who have never taught a class. Several thousand schools have actually closed or remained unopened because it was impossible to find teachers for them. The lowered standards in many places and the total lack of instruction in others means a loss to the children of the Nation which cannot be replaced.

The shortage of teachers affects nearly every state in the Union. Many urgent requests have been made for the assistance of the United States Bureau of Education, for it is clearly impossible for some of the States to man their schools with the teachers available in their own borders.

President Wilson has been moved by this condition. He has directed the establishment in the Bureau of Education of a new division to assist local officers in finding teachers to meet the emergency, and he has written an open letter of appeal to all who are qualified and able to teach, urging them to signify their willingness to do so by registering with the new School Board Service Division of the Bureau of Education in Washington.

It is well known that in every community there are women who formerly taught, whose husbands are now in the army or in other branches of the government service, or whose homes do not demand all their time. Such women are specially needed in the schools now.

High Schools all over the country have suffered from the demand for men of scientific training for service in munition plants, the chemical warfare branch of the Army, and the like. The shortage of teachers of chemistry and physics is acute. It is pointed out that this shortage might be met in many cases if physicians, pharmacists, and other professional men would take classes in nearby schools for a part of each day.

Manual training departments have (Continued on Page Eight)

## MAYOR HASTINGS URGED TO ACCEPT CANDIDACY

CITIZENS PLEDGE ELECTION

Representative Group Called on Mayor Friday Evening and Requested Him to Run For Re-Election

Last Friday evening a group of representative citizens of Highland Park with Mr. F. W. Cushing acting as chairman, called on Mayor Hastings and formally requested him to run for Mayor in the coming spring election.

Mr. Cushing, as spokesman, made the request in a short speech in which he summarized the notable achievements of the Mayor's term of office and the benefits which had fallen to Highland Park by an efficient administration.

After Mr. Cushing's remarks various members of the group voiced similar sentiments in short impromptu speeches.

The Mayor responded at some length, with words of thanks for the honor shown him by these citizens, but declined to reveal his intentions in regard to the mayoralty.

At that time the Mayor was soon to leave for points in the east, after which, he declared, he would make his intentions known.
