Mayor Hastings' Report

The administration of the busines the City of Highland Park for the first four years under the Commission Form of Government is about to end. During this time the greater part of the world has been at war, and for the two years just closing our own country has been engaged in the mighty struggle. It is no my purpose at this time to dwel upon the splendid manner in which our citizens have borne Highland Park's full share of this great burden, nor to speak of the great advancement of the spirit of our community which has been inspired by the sacrifices we have all been called upon to make, but for the present, in my review of the past four years, shall confine myself to the mention of only such practical results as have been accomplished in the business management of the City's affairs.

next five years. Funds for the necessary annual charges have been provided from the beginning of the administration, and during the past four years the City has operated on a strictly cash basis. On May 1st, this year, the general funds will have to its credit approximately \$10,000.00 in eash and accounts receivable to the amount of \$11,417.59, a total of over \$21,000.00. In the face of increased costs for labor and material used in city work, the rate of taxation for City purposes during this administration has been gradually decreased. In 1915 the tax rate was \$2.89 on each one hundred dollars of assessed valuation. 1916, the rate was \$2.88; in 1917. \$2.33, and in 1918, \$1.74, which is the lowest tax rate assessed since 1911. This statement is substantiated by the following figures: In 1911 the total tax levy amounted to \$46,200,41] at which time no garbage tax was collected, in 1918, the total

general dollars of assessed valuation. hadly shattered.
