Gipsy Language.

The language of the Gipsies, Roman, is said to be Hindoo dialect derived from Sanskrit. Ethnologists pretty well agree that the Gipsies are descendants of an obscure Hindoo tribe. The popular belief that Gipsies are descendants of the Egyptians has no other basis than the similarity of the two words. The word "Gipsy" as a matter of fact, is from the Bohemian, and means "vagabond". The first Gipsies appeared in England early in the sixteenth century, but were found in eastern Europe at least two centuries earlier. They are now scattered all over the world.

World's Highest Peaks.

The highest mountain peak in North America is Mt. McKinley, in Alaska, whose altitude is 20,300 feet, and the highest in South America, Mt. Aconcagua, in the Andes, on the border of Chile and Argentina, 23,080 feet. The highest mountain in the world is Mt. Everest, in the Himalayas, in Asia. Its altitude is 29,002 feet. There are several hundred mountain peaks in the Himalayas 20,000 feet or over, running to an altitude of 23,278 feet.

Why Hair Stands on End. When hair stands on end on the back of a dog or cat when frightened it is moved by tiny muscles attached to the roots. The hair follicle is like a little seed buried in the flesh. Attached to either side of this seed are tiny muscles which run diagonally through the flesh from the lower part of the follicle. These little muscles are like the guy ropes of a tent. They are what are called the erector muscles, and when fear or cold is experienced these muscles promptly tighten up in such a manner as to "hoist" the hair very quickly.

Arctic Night.

Viewed solely as a matter of optics, the Arctic night is as dark as any night. Explorers in high latitudes say, however, that there are many alleviations of the obscurity. The stars flash keenly, the moon comes along in a regular succession of phases, the snow surface relieves the gloom under conditions of the utmost absence of light, and the aurora borealis is the finest kind of illuminant. Explorers all agree that their men pass the winter night without much difficulty if only there are means of amusement.

The Amazon.

The Amazon discharges the largest amount of water of any river in the world, and the St. Lawrence next. Other interesting facts about these rivers are that the length of the Amazon is 3,300 miles and its width varies from a few hundred feet at different points to more than 100 miles at its mouth. The St. Lawrence is 2,200 miles in length, is from one to several miles wide at places to ninety miles at its mouth.

Seek to Retain Old Friends.

The years have taught some sweet, some bitter lessons—none wiser than this: to spend in all things else, but of old friends to be most miserly.—Lowell.

Little Sympathy for Him.

"Readin' 'bout what dem soldier men went through," said Uncle Eben, "is g'inter make it mighty hard to sympathize wif de man dat complains 'bout a little thing like a hot day."
