PRESBYTERIAN CHURCH

The Bible school will meet at 9:30 next Sunday morning. The morning service will begin at 11:00 o'clock. The Rev. Cleland Boyd McAfee, D. D., Ph. D., will speak. Dr. McAfee has had several years' experience as pastor of large churches and is now a professor in the McCormick Theological Seminary of Chicago. He is known to many of this congregation and all will welcome an opportunity of hearing him speak.

The Deerfield Township Sunday School convention will be held at two o'clock in the First United Evangelical church of Deerfield. All Sunday school workers are urged to attend.

The Young People's Society will meet at 7:15. Norman Schumacher will lead and the subject for discussion will be "Christianity in China."

The Wednesday night prayer meeting will be omitted during the month of September.

The monthly meeting of the Sunday school workers will be held on Wednesday night, Sept. 17, at 8:00 o'clock in the Parish House. It is hoped every teacher, officer, superintendent and helper of the Sunday school will be present.

Any who desire to donate vegetables to the Bohemian Settlement in Chicago can do so by sending them to Bowden's market on Mondays. Mrs. A. J. Metzel, tel. 977, will be glad to give further information.

On Sunday morning Sept. 21, the minister, Rev. Frank Fitt, will occupy the pulpit as usual. All will be glad to welcome Mr. Fitt as he returns from his vacation with renewed strength to resume his work in the church and community.

Rev. Brown Occupies Pulpit
Last Sunday morning the Rev. Henry Seymour Brown, D. D., occupied the pulpit, taking as the theme of his discourse, the fifty-eighth chapter of Isaiah and especially these words, "thou shalt be like a watered garden and like a spring of water whose waters fail not."

Dr. Brown opened his address with this question: "What would it mean to any life to be as fair and as beautiful as a watered garden or a spring of water whose waters fail not? When the sun begins to get hot why do we go to Lake Geneva or as soon as we can afford it move to Highland Park? Because the garden is a lovable thing and God waters it. We can't get along without an occasional trip to the garden. Jesus often resorted to the garden. O, the ministry of the well watered garden."

In conclusion, Dr. Brown said: "I love to stand at the entrance of Lincoln Park and think of the Park as Lincoln and Lincoln as the park. Lincoln was a man who gave himself to take away from the midst of us the yoke, who drew out his soul to the hungry and satisfied the afflicted soul. There is nothing so fitting as a symbol for such a life as the watered garden."

M. E. CHURCH

The greatest opportunity ever presented to the Methodists of this community is now within reach. An opportunity to do genuinely constructive work in a genuinely constructive way; to place the church in a position of influence and leadership, such as she has not had in any considerable degree. Shall we rise to the opportunity? I am convinced that we shall if we give thought to the words of the Lord Jesus, "The life is more than the meat, and the body is more than raiment." Again "He that loveth his life shall lose it; and he that hateth his life in this world shall keep it unto life eternal." This may necessitate a slight variation in our present Sunday and weekly program of activities, viz: make definite provision for church activities. A more complete statement of this proposition will be made in the near future. Go to Church next Sunday. Get ready for your share in this program. Township Convention Sunday, 2:30 p. m. at Deerfield.

Automobiles will convey all who desire to attend. We want your cooperation. Meet us at the church at North avenue at 2 p. m.

The study of St. John is continued Wednesday at 7:30 p. m. 25 present nearly every week. Attend.

Usual Sunday services next Lord's Day. Come!

THE PLANNING AND PLANTING OF OUR HOME GROUNDS

Compared with the cost of lot and dwelling, good planting of our home grounds is not very expensive. A great many people spend a lot of money by planting large overgrown shrubs, not realizing that the general run of shrubs as to height is only 1 1/2 to 2 feet, and 3 to 4 feet according to the variety used. Green is the predominating color in nature and most landscape architects use only green leaved trees and shrubs in their planting. While this plan must be approved, some very striking effects may be seen in Versailles, Moscow, and Nice where a good bit of colored foliage has been used to great advantage. As to the most hardy and effective varieties I would recommend the Spiraeas, Berberis, Lilacs, Japan Quinces, Upright Honeysuckles, Highbush Cranberries, Double Flowering Plum, Hydrangeas, Forsythias, Diervillas, Lignstrum, Euonymus, Dogwoods, Matrimony Pine, Tamarix, Rosa rugosa and numerous others. The most important planting is generally around the home itself, often called foundation planting. Here good planting will relieve the harsh lines of the building and soften them. It will make the house appear as growing out of the shrubs and give bloom and fragrance from early spring until fall. The lawn itself should be free of shrubs, a cluster of trees may be placed to advantage, but the boundary lines must be planted. Planting in the park-space is very effective, connecting the grounds with the street. A small formal garden is always lovely. Such a garden should be located either on the axis of dining or living room, preferably in the rear of the house. Here all the old garden favorites may be planted, perhaps a gazing globe and sundial placed; and on the other end of the garden one may build an inexpensive pergola, very often a rustic one, covered with one variety of clinging-roses, or wisterias, or clematis paniculate, is the most effective. If the owner should like a lily pond, a square one may be placed in the center of the old fashioned garden, keep the lilies confined along the edges by placing two oak boards parallel with the concrete pond walls, thus leaving an open mirror in center, to reflect the beauty of the garden. While the cost of the planting material may be kept low, stress should be laid on correct and good planting. We cannot dig our holes too big, in fact for shrub and perennial planting the whole area utilized should be mounded and spaded to a depth of 1 1/2 feet. After good watering, all plantings should be mulched with leaves and stable litter. Work thus executed will show up most satisfactorily the next spring, and if the owner likes bulbs, to be planted in front of the shrubbery border, this must be done in the fall. For best results in bulb planting, use a small handful of sand for each hole, and plant your bulbs deep, from 4 to 8 inches, according to the variety used.

Roses are garden failures, mostly due to the bad planting and wrong selection of varieties. We have now Hybrid Perpetuals that not only excel all others hardiness, but in beauty of form and color as well. If I can keep the reader interested I shall be glad to describe such a rose garden and name the best suited and available varieties in my next article.

O. C. DORRIER,
Landscape Architect and Forester.

NOTICE

The Park Board wishes to acquire a tract of land of 100 acres or less in extent, situated in the territory lately annexed to the Park District, said land to be used for park purposes. Owners of such land wishing to dispose of same may submit propositions with sketch maps, to the undersigned, until October 1st, 1919.
P. W. CUSHING, President.
Highland Park East Park District.

UNITED STATES RUBBER COMPANY AND ASSOCIATED COMPANIES

Here's the way we look at it

Just for a minute, look at the tire proposition from our standpoint.

We are in the tire business here, to stay. We can remain in business only so long as we please our customers.

Consequently, it pays us to handle good tires—United States Tires.

They're the tires we sell.

They're the tires you should use.

We have them to meet every need of price or use.

United States Tires are Good Tires

We know United States Tires are good tires. That's why we sell them
