

To those who did not see the New Series Marmon 34 at the Show

Pennant Awarded to Nordyke & Marmon Co.,
Nov. 1, 1918, by United States Government,
Bureau of Aircraft Production, for October
Competition. Permanently Awarded Nov. 16.

ON account of the congestion at the Marmon exhibit at the Automobile Show many were denied a close inspection of the new series Marmon 34.

For the benefit of those who "tried but could not see," we announce a special private show.

Our entire show, including every feature, is now on view at our retail salesrooms.

See the High Efficiency Motor

You will see a motor car engine here with exceptional features.

An engine embodying new refinements of crankshaft and bearing construction, piston design, valve operating mechanism and system of automatic lubrication.

An engine built to the close "me-

chanical limits," the accuracy and precision achieved for the first time in quantity production in the construction of the aircraft engines.

A Greater Motor

For the High Efficiency Motor that drives it, and for the notable improvements in clutch and steering gear, the new series Marmon 34, with its basic superiority of design as a scientifically constructed lightweight car, gives a new meaning to the name motor car.

We are now explaining and demonstrating the new Marmon 34 at this private show. Tell us when it will be convenient for you to visit our show rooms, and we will send a car for you.
