

Ironing without Rubbing

How often you have wished for an ironing method that would make the rubbing of dainty things unnecessary! And haven't you yearned at times, too, for protection against scorching—and for a cooler way of ironing?

You get relief from the discomfort of hot-weather work, while your clothes are given a most beautiful lustre with no rubbing at all, when you send your washings.

The very simplicity of our methods will appeal to you. Instead of the antiquated hand-iron and mangle of the laundress, we do your ironing with steam-heated presses that never scorch and never rub. The most

cobwebby and filmy things can be ironed on them without so much as a thread being misplaced.

You can secure the benefit of these better laundry methods by sending us your family washing.

The ease and simplicity of it all will appeal to you. No laundress to dicker with. No steaming boilers. No smelly kitchen or sour washroom. No unpleasant splashing of wash water. Our driver calls for your family bundle and we do the rest—leaving you leisure and a home undisturbed by washday muddle.

Telephone us and our driver will call.

GRAMMAR SCHOOL NOTES

By Erna Neargardner
Mrs. Davenport has been ill the past two weeks and Mrs. Olendorf has substituted for her.

The grades had a number of visitors last Friday. We are always glad to see visitors and wish more of the mothers of the upper grade pupils would come and see the work of the older pupils.

We are again grateful and indebted to the P. T. A. for the comfortable rest room they have fitted up for us. Mrs. Supple devoted a great deal of time to the making and hanging of the pretty blue cretonne draperies. She also upholstered two chairs with the same pattern of cretonne. Mrs. Hole donated a medicine cabinet of golden oak finish and Mrs. Woodman filled the same with the necessary bandages and medicines. Mrs. Woodman donated two small rugs and a mirror. The scales recently purchased by the P. T. A. had also been placed in this room and the children are to be weighed and measured for February, this week. The boys and girls offer their sincere thanks to the association in behalf of our welfare.

HOW TO WRITE ADVS.

WORTHY OF ATTENTION

An advertisement is well written when it makes an appeal to the basic desires of the buying public. If you can find out what the people most want, and show that your goods supply that want, you have sold them.

A writer said before the war that the basic desires of women buyers in such lines as dry goods, clothing, house furnishings, etc., is for style, service and economy. The same writer today would probably reverse the order of importance and put in economy, service, and style.

If you show that you are giving exceptional value, that your goods have enduring qualities of wear, and that they have the touch of modern style, you will sell them.

The ad writer should bend all his thought to making his notice convince the public that his goods have these qualities. Quote prices, demonstrate that the stuff comes from the most reliable sources, yet are offered at bottom prices, and show that it is fresh and up to date.

Have You Traveled
in Italy?

If you have not done so, you should go over now. I believe you will find some of the beautiful gardens left, not destroyed during the war. You would get an idea of the beautiful surroundings it is possible to have right here on your own grounds.

You say the climate is different. That is true; but we have a great variety of trees, shrubs, evergreens, roses and other flowers which grow very well here. Even with the limited variety we have in this country you can make your home not only beautiful, but wonderful, in Italian styles.

I am prepared to draw plans for your garden and grounds after the Italian style, and will be glad to talk over such plans with the owners of North Shore property. I handle the work either on a time basis or by contract. No job is too small to have my attention; still I am prepared to handle contracts running into thousands of dollars.

Won't you think it over? If you would like to beautify your grounds, call up Highland Park 523 now, and I will prepare a plan during the Winter. The work can then be done early next Spring. Bear in mind that a job of this kind well done never needs to be done again. You save money by having it done right.
