

Announcement

We wish to announce that we have taken over the distributorship of the Marmon 34 for Lake County.

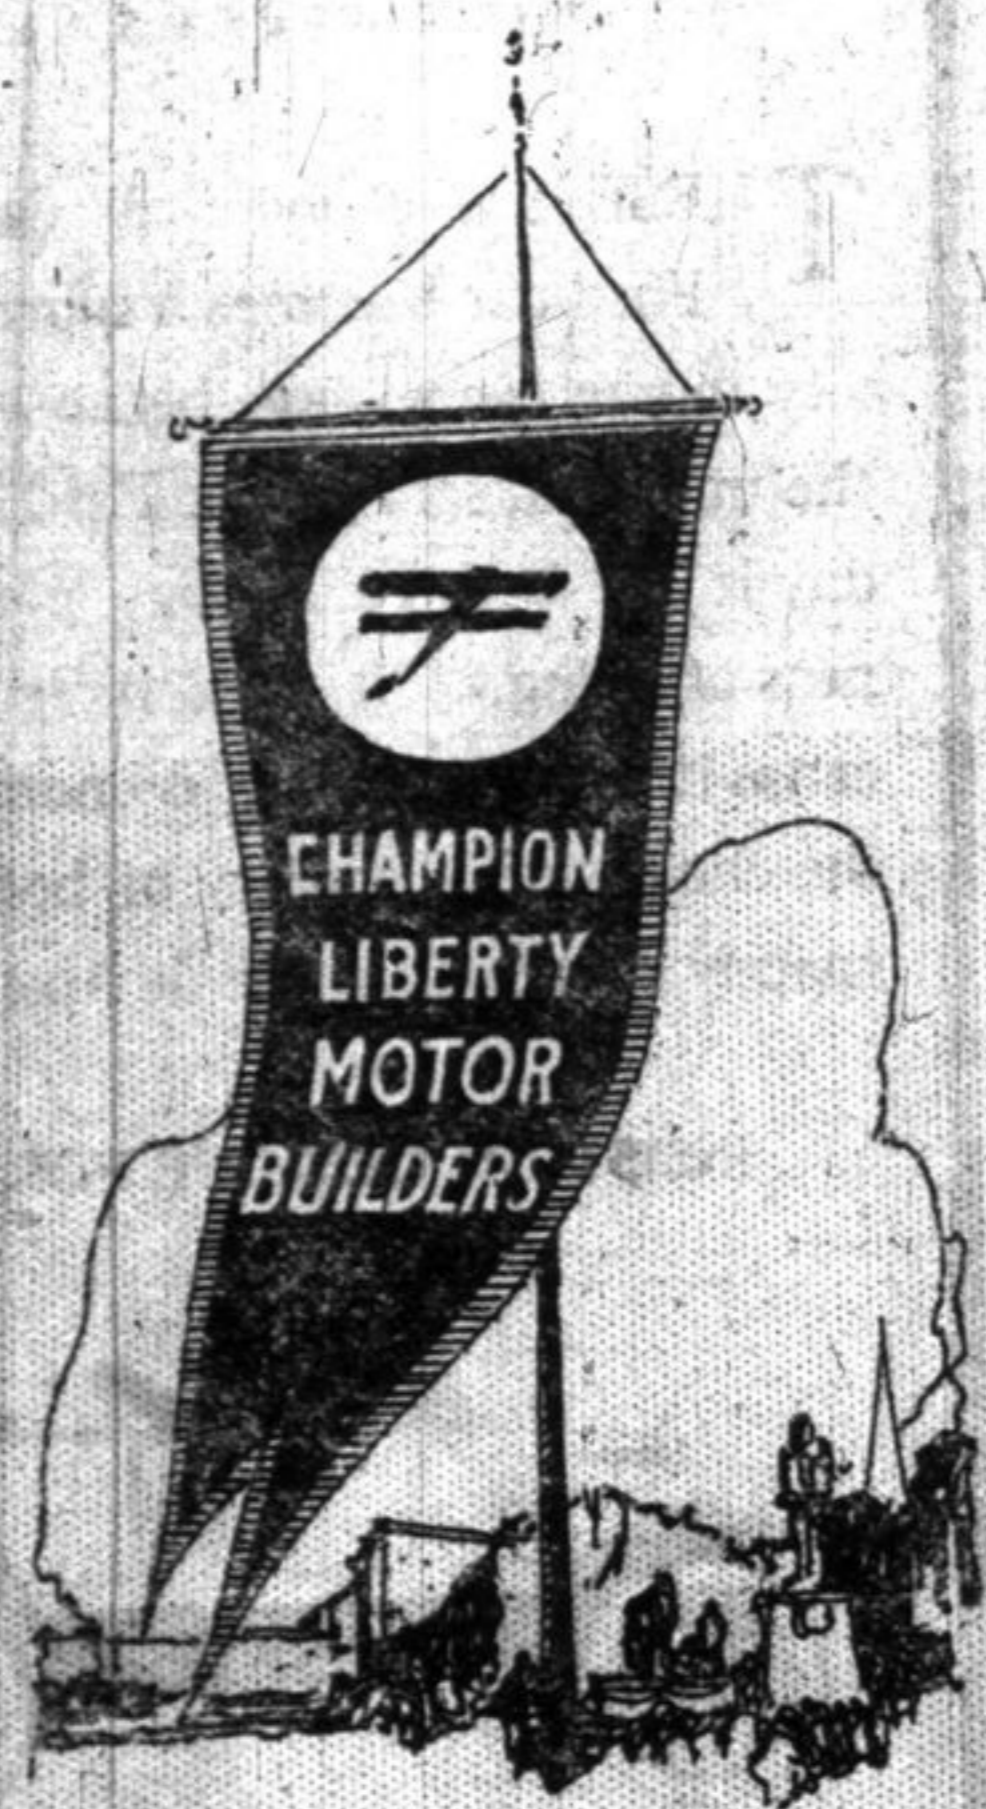

We wish to extend to those interested in the Marmon 34, with high efficiency motor, an invitation to call and inspect the new post-war model now on our sales floor.

The New Series Marmon is the embodiment of the great lessons learned by the Nordyke & Marmon Co. in building air-craft engines for the government.

The motor has new features of design and it is built to an extraordinary degree of accuracy. It is, as a result, a High Efficiency Motor. It produces results that are new to motor experience.

There is a new rapidity of pick-up. New ease in hill climbing. New power ranges. And withal, there is a smoothness of operation, and an immunity to trouble and wear that means the exceptional economy of maintenance and long life.

We are now explaining and demonstrating the new Marmon 34. Tell us when it will be convenient for you to visit our showrooms and we will send a car for you.

Pennant Awarded to Nordyke & Marmon Co., Nov. 1, 1918, by United States Government, Bureau of Aircraft Production, for October Competition. Permanently awarded Nov. 16.
