FOUND — A watch. Owner may have same by properly identifying. Call H. P. 729-J. 11

ARCHBISHOP PURCHASES LARGE TRACT OF LAND

UNIVERSITY TO BE BUILT

Cost of Proposed Buildings to be Approximately \$5,000,000. 260 Acres Procured on Lake Area

Early this week Senator R. B. Swift consummated the sale of the Rodney farms, consisting of 260 acres near the western border of Libertyville village to Archbishop Mundelein. Two sets of fine farm buildings and two residences, one the home of Senator Swift, are included in the purchase.

The Swift farms border on Lake Area and their acquisition by the archbishop completes the holdings it has been desired to purchase, and give complete control of the lake to the great Catholic institution.

Senator Swift still has about 160 acres adjoining the two farms he sold, and has recently added extensive improvements to this smaller farm, the buildings on which occupy a site on what was formerly the Daniel Lee farm.

For Great University
With the Swift holdings more than 1,100 acres have been purchased on Lake Area, the original location of the Sheldon school. Upon this site will be located one of the largest universities in the world, the first group of which will embrace the theological and philosophical departments, together with the administration offices, a large auditorium, a library and a gymnasium, as well as dormitories for students and professors. The new institution will be conducted under the old charter of St. Mary's of the Lake, which was secured from the state by one of the first bishops of the diocese of Chicago.

The buildings are estimated to reach a total cost of \$5,000,000, of which the first group to be begun will cost more than \$3,000,000.

The buildings at Area will be constructed in colonial style, modeled after famous buildings connected with American history. One will be a reproduction of brick and stone of Independence Hall. The home of the rector and his immediate aids will be a replica of the Washington home at Mount Vernon.

All of the present Catholic universities and colleges in the archdiocese, including Loyola, De Paul, Ignatius, St. Stanislas and St. Rita, for men, and the new Rosary College, Xavier Academy and others for women will be made a part of the university, which will have for its faculty the best forces which the various religious orders of teachers conducting these, and augmented by Dominicans and others, can furnish.

Wednesday, announcement of a \$500,000 gift by Edward Hines, millionaire Chicago lumber man to Archbishop Mundelein was announced.

It was stated in church circles that the Hines donation, which is made in memory of his son, Edward Jr., who died in France, and which will be used for the building of the university chapel, is the largest single individual gift ever made by a layman to the cause of Catholic education.

Simultaneously comes the announcement that a purse of \$300,000 is being raised by a committee of the clergy of the archdiocese, headed by Bishop McGavick, as a gift to Archbishop Mundelein upon the occasion of the diamond jubilee of the priesthood, both of which will be observed in June. This purse, in accordance with the expressed wish of Archbishop Mundelein, will be used for the erection of one of the university buildings.

THE PRINTING ART
Type metal is made of soft material and it is easy to smash it out of shape by too much pressure in the press. It would make an old time printer's hair stand on end, to see how type is handled in many offices. The old time office kept a force of "hands" for years, as they were thoroughly trained. Today with printers roving around, and many green apprentices, good type is constantly being rendered unfit for service.

Many print shops spend enough money for type, but injure it irreparably after a short time. The fine lines are easily broken or squeezed out of position. Then printed matter shows the gaps in the broken lines, and little pockets form where ink collects.

We would rather junk a font of type any day than use worn and broken stuff to set up a job with. We look after our type, and when it shows wear, it goes.

The Bolshevik sympathizers positively deny those stories of Bolshevik atrocities in Russia, as they are personally assured by Lenin and Trotsky that they are not true.

And Here You Will Find Three of the Most Wanted Styles

SUMMER, 1920, will long be remembered among those who follow fashions closely as the summer of dainty apparel. After war times years of severe, near-masculine attire this change is most refreshing.

And nowhere will you find this change more pronounced than in our beautiful footwear designed to accompany your airy, happy costumes.

Below are briefly described some of the many varieties of the mode which are already assured great popularity because of their winsome charm.

<p>WALKING OXFORDS of fine brown kid, or tan calfskin, with welt soles and leather military heels. A real value at \$12.50</p>	<p>NEW EYELET TIES of black fine calfskin, with hand sewed soles and wood French heels. See them early. \$13.50</p>	<p>SEMI-DRESS OXFORDS of black kid or brown havanna, with leather French heels, and welt or turn soles. Excellent quality. \$12.00</p>

AMERICAN LEGION

To the people of Illinois State Commander Milton J. Foreman issued, on May 1st, this proclamation on the American Legion membership drive.

"May 2 to 21 has been designated as the period of the American Legion membership drive in Illinois by proclamation of Governor Lowden. During this time it is hoped to enroll a very large proportion of those who are eligible for membership.

"It would help the movement tremendously as well as accelerate patriotism if, during this time, the citizens of Illinois towns would prominently display the American flag on their homes and buildings.

"Patriotism and love of country are symbolized by our flag, and the purposes for which the American Legion is organized, which are set forth in the preamble to its constitution: 'For God and Country, we associate ourselves together for the following purposes:

"To uphold and defend the Constitution of the United States of America; to maintain law and order; to foster and perpetuate a one hundred per cent Americanism; to preserve the memories and incidents of our association in the Great War; to inculcate a sense of individual obligation to the community, state and nation; to combat the autocracy of both the classes and the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom and democracy; to consecrate and sanctify our comradeship by our devotion to mutual helpfulness.' Make it the agency by which our people can and will become truly nationalized.

"May I, therefore, as Commander of the Illinois Department, appeal to all during this week not only to display the colors wherever available, but to help in the work in which the Legion has embarked.

Very truly,
MILTON J. FOREMAN."

"SAY IT WITH VIOLETS"

The recent statement of Federal Judge Landis that the U. S. government was the most unfair employer of labor in the country is the echo of a sentiment in the heart of many patriotic Americans. Perhaps it is because we want everything connected with the intimate workings of the government—including its salaries—like Caesar's wife, above reproach perhaps it is because of the seeming hopelessness of effecting a salary increase for these truly loyal and efficient workers that we make it our concern.

The accuracy with which the matter is handled; the few errors occurring in its transmission; the regularity with which the local postman rings the bell two or three times a day, makes us wonder where they get the vim that results in so much efficiency. Hardly from their salary, it must be from the fact that they overlook Uncle Sam's indifference in paying them a higher wage and simply work on for the joy of helping him out.

Judge Landis has come out openly as their champion in the matter of securing justice for them. "During the war," he said, "I advised postal and other federal employes to hold on—to go easy—to stick to their jobs because we were at war, and when the war was over, I told them: 'I will go to the front for you and try to get justice.'"

Yes, it is merely that, the postal and other federal employes work. The question of where the money to come from is important, we know, but here is a simple little idea and we are sure that if it means doing the right thing by the federal employes no one will register a complaint.

During the war we all remember that we had to decorate all mail not strictly local with a violet stamp. That meant an extra cent for each letter. No one complained. It is true, we were at war, and no one would think of complaining, but now that we are practically at peace, what is the objection to reviving the little violet stamp and hurrying the exera cent into the coffers of the government for increase in the wages of postal and other federal employes? We are so used to being throttled by our greaser, and bruised by our butcher, and boxed by our baker and froze by our coal dealer, that an extra little tap by the government to the tune of one cent could no more hurt our harassed pocketbooks than a fly could hurt a steel ball.

PAPER INVESTIGATION

The daily newspapers of April 27, announced a congressional investigation of the print paper shortage by a sub-committee of the United States Senate Committee on Manufactures headed by Senator James A. Reed of Missouri.

The paper manufacturers, justly, we believe, have complained of a shortage of spruce for the manufacture of paper and this has been caused by the great consumption of American spruce in paper making and the prohibition of the export of spruce logs from the Dominion of Canada which went into effect July 23rd, 1911, a most unfriendly act from an international standpoint which should have been corrected by President Taft or President Wilson.

There is ample opportunity for retaliatory prohibition, especially as we are still technically upon a war basis. If the Administration and the Congress would prohibit the export of coal to Canada it would raise the Canadian prohibition on spruce logs in 24 hours. There is absolutely no excuse for a shortage of raw material except the lack of nerve and Americanism.

Some paper manufacturers have large mills in Canada and this expatriated Americanism has an influence against natural patriotic action at Washington.

Naturally there are other matters in connection with the production, distribution and prices of paper which will have careful investigation by Mr. Reed's committee when it gets to work.

LEGION MAKES PLAN FOR UNIQUE PAPER

The Dumaresq Spencer of Park, will hold an entertainment at Witten's hall Wednesday, May 26th. The purpose is to devote an evening to the members of the post only and to prospectively from Highland Park, Deo Highland. A nationwide effort now under way to enroll men and there are many veterans who have served past war, who are earnest to join the local post as a 100 per cent organization are very nominal and it is patriotic duty of all eligible in their application at once.

The entertainment, arranged for a very unique which will tend to make a very enjoyable one. A speaker has been engaged evening and there will be spectacular boxing exhibitions, little entertainment and don't forget there will be everything.

Only legion members are eligible to come.

A request is made by committee to all members who are interested, to turn out for a work High school diamond Sunday, May 22nd. App gloves and other paraph asked to bring it along. has arranged for some to all report on Saturday.

On Sunday, May 30th, service will be held at the church at 4:30 p. members are asked to make to participate at this session.

Entertainment and Plan for Members and Pratives Wednesday

The people who are ashamed to buy low priced articles because it seems mean, are usually also ashamed to call at the bank, as they never had a dollar deposited there.

"Side creased pants" said to be the latest fad this year. But so far no one has landed a good job as the result of wearing them.

WINTER 1920

EXPLAIN WINTER WORK OF ARDEN SHORE

DRIVE FOR FUNDS NOW

Plan to Make Only One to Support Institute During Winter and Summer Camps

As the summer work of the Shore association, which gave vacations to nineteen and two people, is better known the winter work, the object of which is to give an idea of what there during the winter months.

About ten years ago the decided that the camp with its equipment should be used in winter as well as summer—advice of one of Chicago's physicians, it was opened to valiant men and boys from city hospitals. This work was on successfully for a number but during the last two years war was discontinued on a scarcity of fuel, etc. Last year, it was possible to re- camp for a type of work different from that done in winters. The vocational of the Chicago Board of Education Arden Shore Association solve a problem with which been confronted for some time generally known children aged in this state to go to the age of fourteen, but in order it is necessary, between the fourteen and sixteen, to health certificate. The vocational issues these certificates were found that many boys, able to claim them as they reach the required standard and height. This defective condition of the boys was due to insufficient food, and in poor home and living conditions.

It was at this point that Shore took up a piece of work so far as known is not done in the country. It undertook a grip of boys into condition the work which they need 14th of November the with opened with thirty-four in the time camp closes at 5 May they will have handled
