

# Time to Live

Taking time to live takes will power and planning for a busy mother. You want to do so much for your children that you forget your own self too much, which defeats just the purposes you have in mind for them. Increase your joy in living—increase your influence with your children—lengthen your life, by handing us the drudgery of your washing.

The washing will be well done and the flat work ironed for a very reasonable charge. The rest will be returned ready to iron, or for a slight extra charge, we will iron everything.

Try it this week!

# Landscape Harmony

The evident harmony of arrangement between the house and surrounding landscape is what first impresses one in viewing Italian landscape architecture.

A consideration of the design as a whole, including gardens, terraces, groves, and their necessary surroundings and embellishments, brings out the fact that no one of the component parts was ever considered independently.

If you are contemplating having some landscape work done, it pays to employ one who is an expert in his line. Right now is an opportune time to make preparations for fall planting, tree trimming, and other work around your place. Do not put off making your arrangements, as the fall is a very busy season.

Estimates promptly furnished upon request.

### OCTOBER NINTH IS FIRE PREVENTION DAY

Fire Losses in United States Amount to Almost Million Dollars Every Day

Fire losses in the United States are matter of gravest concern. Material sources in this country are being burned at the rate of almost a million dollars every day. In the state of Illinois the fire loss is averaging more than a million and a half dollars a month. Lives lost through fire and accidental burns number close to 25,000 annually in the United States, to say nothing of the countless persons injured and maimed.

The wholesale waste of life and resources not only adds to the burden of high prices, but is a handicap to our national prosperity. Inasmuch as more than 75 per cent of this waste is preventable, the record is deplorable, particularly at this time, when conservation should be uppermost in the minds of all.

Governor Lowden, has proclaimed Saturday, Oct. 9, as Fire Prevention Day, urging that this day be made the occasion throughout the State of bringing to our citizens the meaning of the enormous unnecessary destruction of life and property, and the necessity of reducing it.

That appropriate educational exercises be held in every community in order to stimulate individual carefulness and a sense of personal responsibility on the part of everyone as regards fire;

That the lessons of fire prevention be particularly impressed upon the children in all schools for seed effectively sown in the minds of the young is sure to bear fruit in the rising generation;

That public and private places be thoroughly cleaned up and all rubbish and waste safely disposed of, to reduce the danger of fire, as well as to promote health.

That all heating apparatus, chimneys, electric wiring and ventilating devices be carefully examined and necessary repairs made, so that the hundreds of fires due to these causes, with their attendant suffering and loss, may be materially reduced;

That all public and private places where people assemble — especially hotels, factories, theatres, schools, institutions and churches, to the end that our State be spared from holocaust; That fire drills be held and con-
