### HIGH SCHOOL NOTES O CONTROLO C

Charley Steele "Few things are impossible to dilgence and skill."-Johnson

Charley Steele has just returned to us after two years' absence. During his first year at high school he did not play on the team, but this year he has come out, and he is rapidly making up for lost time. So far this year he has passed our highest expectations. He has proven himself to be a played through his skillful actions in the game. He can go through the line at the right time and in the right place. His ability to fool his opponents can not be classed as cleverness, for it seems to be uncanny. When yards are needed and when yards must be had the ball goes to Steele and the yards are gained. So Steele is the kind of a man that it pays a team to possess. A man who can set an example to others through the efforts that he expends in the game. This is not Steele's last year on the squad and so next year there is no doubt but that he will be a more formidable man than he is at present, if such is possible. Right now Steele is in the prime of his playing. It's a real pleasure to sit on the sidelines and watch a man like him take the ball and make a pretty run of twenty or thirty yards around the end, or worm through center for a clear gain of ten or so. There is about one in a hundred who can do that and Steele is that one. And yet some of us low-brows may say in our ignorant manner, "He was born that way," but that's all wrong. Steele has become a football man, not because he was born that way, but because he has worked long and hard and made himself that way. When he goes on the field for practice or for a game, he is on that field for football and football alone. And because he goes on the field with that idea it brought out so much that he earned the reputation of being Churches at 11 o'clock. There will of the most skillful players that the Deerfield Shields high school has ever possessed.

# Landscape Harmony

The evident harmony of arrangement between the house and surrounding landscape is what first impresses one in viewing Italian landscape architecture.

A consideration of the design as a whole, including gardens, terraces, groves, and their necessary surroundings and embellishments, brings out the fact that no one of the component parts was ever considered independently.

If you are contemplating having some landscape work done, it pays to employ one who is an expert in his line. Right now is an opportune time to make preparations for fall planting, tree trimming, and other work around your place. Do not put off making your arrangements, as the fall is a very busy season.

Estimates promptly furnished upon request.
