Landscape Harmony

The evident harmony of arrangement between the house and surrounding landscape is what first impresses one in viewing Italian landscape architecture.

A consideration of the design as a whole, including gardens, terraces, groves, and their necessary surroundings and embellishments, brings out the fact that no one of the component parts was ever considered independently.

If you are contemplating having some landscape work done, it pays to employ one who is an expert in his line. Right now is an opportune time to make preparations for fall planting, tree trimming, and other work around your place. Do not put off making your arrangements, as the fall is a very busy season.

Estimates promptly furnished upon request.

SERVICE MARKET

offers you a complete line of feeds for every feeding purpose. Come in and get acquainted with our Quality Feeds.

SCRATCH FEED

Every Feed

we offer our trade has been tried and tested for its productive value before it receives our endorsement and guarantee.

PALATABILITY is the big factor in a scratch feed and a variety of choice grains, scientifically balanced affords the bird a palatable ration and consequently greater digestibility—that means economy.

Sincerity Scratch Grain is all grain. It is thoroughly cleaned and scientifically balanced. Not an ounce is wasted; it is entirely free from dust and fine matter.

With poultry, more vigor means more eggs and you cannot get vigor with inferior feeds. Quality in the breed—quality of meat—and an abundance of eggs requires an abundance of vigor and if you want "quality"—you must feed "quality" feeds.

RAVINIA SCHOOL

Friday evening, Jan. 14, at the village house the older children of the Ravinia school are to give two plays. The fifth and sixth grades will present several scenes from Robinhood, the seventh and eighth grades from Treasure Island. These presentations are an outgrowth of their class work, the staging and costuming having been planned by the children. An admission fee will be charged to be used for decorations for the school.

Bell System

Your Exclusive Telephone

It would be possible so to construct a telephone instrument that a person using it might sit across the room and have his voice transmitted over the wires.

The trouble with such a telephone would be that not only the speaker's voice, but all sorts of other sounds would be picked up at the same time—the click of typewriters, noises from the street and conversation of others in the room.

Your standard telephone is designed for exclusive, individual service. By talking with your lips close to the mouth-piece of the transmitter, your voice alone is transmitted to the ear of the listener at the other end of the wire.
