

Ford
THE UNIVERSAL CAR

That Dependable Ford Quality

Ford durability began back in 1903 when Henry Ford started experimenting with Vanadium steel and heat-treating processes. He knew that a more exact tempering of steel for motor car building must be worked out. Vanadium, it was learned, when added to molten steel, gives to that steel a greater toughness and adhesiveness. And now other alloys have been found which are superior to Vanadium. With the Ford Motor Company constant progress in the daily companion. The Ford products — Car, Truck, Tractor — grow in quality daily. Heat-treating tempers each part so that it will best withstand the wear or tear to which it is subjected. Ford chemists and analysts have created formulas and standard specifications for every individual part of the Ford car — not only for the steel but for everything from pneumatic tires to top.

Ford durability isn't a matter of accident, it is a matter of painstaking thoroughness in laboratory and factory. The Ford is a car to precision — of standardized values. Order your Ford car now. No matter how fast they may be made the demand multiples faster. Order today for we can make fairly prompt deliveries — Runabout, Touring Car, Coupe, Sedan, Truck and Fordson Tractor.

NATIONAL SILK WEEK
FEB. 28 TO MARCH 5

HELD THRUOUT COUNTRY

The Latest American Creations
In Spring and Summer
Styles to be
Shown

In celebration of the four thousand five hundred and sixty-first anniversary of the discovery of silk by the Chinese Empress Si-ling-chi in 2640 B. C., National Silk week is inaugurated here today. Local merchants, from department store proprietors to the owners of the smaller individual shops that handle merchandise in which silk is used in production, will feature silk and silk merchandise for the entire week. Not only here but throughout the entire country this idea will be carried out. In China at a specified time each year, the Chinese commemorate the memory of Si-ling-chi who is known as the "Goddess of the Silkworm." The ceremonies are extremely picturesque and quaint in China, but in the practical United States the form assumes a distinctly commercial aspect which is however enlivened by the delight of women — a styles show.

Many of the latest American styles creations shown at the recent International Silk exposition in New York will be shown here in replica either as window displays or upon the forms of beautiful girl models. It will be the first public showing of these styles outside of New York and gives National Silk week much the aspect of a spring styles salon.

Local merchants anticipate that this silk week will give a remarkable impetus to the spring and summer buying season and have laid their plans accordingly to afford their customers the best possible opportunity to see all that is new in everything into the manufacture of which silk enters, which means a very wide range of articles for men as well as for women. One big department store in New York found that silk had to be featured in forty of its divisions because of the varied uses to which the fabric and its products are put.

From the time when in Rome silk sold for its actual weight in gold and was worn only by royalty, to today when it is within the reach of the average person as to price and is universally worn, is a long jump but has been accomplished through the ingenuity of American manufacturers who have succeeded in perfecting processes of production that silk is now an economy instead of an extravagance as it was first considered.

The United States leads the world in the manufacture of silk with an annual output of approximately \$715,000,000, buying 70 per cent of the raw material produced in the Orient and Italy and producing every conceivable article in which silk can be advantageously used.

It is doubtful if there has ever been in this city a better rounded display of merchandise that appeals to women than has been prepared locally for this week. From silk or satin slippers, lingerie, hosiery, to dresses, wraps, hats and gloves with scores of other accessories in between, the assortments are strikingly complete. Colors and designs are novel and beautiful but not bizarre and the lines of the newest costumes are gracefully artistic and lack the somewhat startling semi-cubist effects of past seasons. Both arbiters and critics of styles have unanimously agreed that this is to be distinctly a silk season and the retail merchandisers are apparently taking full advantage of that decision.

CHRISTIAN SCIENCE

Subject for next Sunday's Lesson Sermon, "Man."

Services are held in this church every Sunday morning at 10:45. Sunday School meets immediately after the morning service, and is open to pupils up to the age of 20 years. The Wednesday evening meeting, which includes testimonies of Christian Science healing, is at 8 o'clock. You are cordially invited to make use of the reading room at 387 Central avenue, which is open every week day from nine o'clock in the morning until six o'clock in the evening and Sunday afternoons from two to six o'clock.

When we expect the best from anyone we usually get it. How simple! Let's do it.

Well times are looking better. Things seldom go as bad as we fear. Folks that follow like sheep, like sheep get their wool clipped.

The men who sit back waiting for things to break will wake up to the fact that their competitors have been making things break.

It looks as if the penny might become useful again some day.

Vanity — what a lot of "public spirited" work is done in thy name.
