Newspaper Ideals  
A newspaper differs from other enterprises, in that it has a double function. It is a business and like other commercial undertakings it has to market its product at a price that will pay its cost. But it is more than that. It is or should be an educational force, and a means by which the community can gain certain desirable public ends.  
It provides publicity for all kinds of community projects. It gives loyal support to community enterprises. It helps organize sentiment in favor of all co-operative movements. Unless a city has one or more good newspapers that are working effectively along these lines, the place is bound to fail to realize its possibilities.  
Thus the citizen gets substantial benefits out of the work that a good home newspaper performs. It is his interest to do what he can to see such a publication perform its function, and realize its ideals of newspaper service.
