

**MAY 30<sup>th</sup>**  
*"There's a Wealth of Sentiment Attending this Day"*

It is altogether fitting that the great American people should set aside one day for the purpose of honoring our heroic dead.

It is right that this should be done.

The memory of those who fought and died that this nation might endure should be kept forever green.

They made the supreme sacrifice to uphold the principle of universal liberty.

All honor to them.

And we can accord them no higher honor than to continue the work which they so courageously started — until their object is achieved — until universal liberty is indeed "universal" and the "world is made safe for Democracy."

**UNIVERSITY SAVES MONEY FOR FARMERS**

**TEACHES CORN PLANTING**

Short Courses in Agriculture Enable Farmers to Get Much Greater Yield Per Acre

Urbana, Ill.—That the University of Illinois was responsible for adding to the wealth of the State anywhere from \$11,680,000 to \$46,720,000 by just one piece of work, is a conclusion of a prominent farmer who has written not only University authorities but to his State Senator of what he has accomplished.

He stated that at a short course given in agriculture two years ago he learned to judge whether the ear of corn was diseased by the looks of the grains and the appearance of the shank. Using this information as a basis, he made a germination test, using the sand bed method, and took six grains from each ear in order to get that which was the least diseased. "The results were very surprising," he said, "about 98 per cent of the corn came up but upon examination of the roots and stalks I rejected 27 per cent of the ears tested because of the diseased condition which was easily seen. Now let us see about what the results of rejecting this 27 per cent will be.

"There are 3,600 hills or 7200 grains planted in an acre of corn, using 2 grains to a hill. 27 per cent of 7200 is 1944 or in other words 1944 visibly diseased stalks eliminated and good ones planted in their place. These 1944 stalks would not make over 1-3 of a full yield or say, about 600 good ears. This would mean about 5 1-2 bu. where the same number of good stalks would make about 17 1-3 bushels thus showing a loss of about 13 bushels per acre by planting the 1944 diseased grains. This bears out the claim made by the Experiment Station that the yield can be increased from 10 to 15 bu. per acre by planting disease free seed. Now to carry this further, 12 bushels per acre on our last year's corn acreage in Illinois would be an increase of our crop of 103,824,000 bu. At 45 cents per bushel this would mean an increase of \$46,720,000 in our wealth. But it is not likely that every farmer would go to the trouble to do as I have done; so let us assume that 25 per cent of them would, which is reasonable. That would mean an increase in our wealth of \$11,680,000 in one year—more than the University is asking for 2 years.

"I get my living off of the farm and I will say that farming is a discouraging proposition at present, but that is all the more reason why the farmer should be in favor of the legislature making the appropriation asked for by the University that they may continue the great work they are doing and thus make more money for the farmer. The University does for the farmer what he could never do himself."

**RESUME WORK ON BELVIDERE ROAD**

Expect to Complete "Section I" This Year; Grayslake Road Finished

Paving contractors began work this week on "Section I", county bond issue improvement, which takes in Belvidere road at Combs' corner, where work was stopped last fall, to a point two and a half miles east. They expect to complete this section this year. Thirty-four carloads of sand and gravel are being unloaded and two carloads of cement will be ready so that concreting will be started the first of the week.

The Standard Paving company has practically completed Section G, which includes Belvidere road between Milwaukee avenue and Grayslake.

**STORM VICTIMS TO BE REIMBURSED**

Bill in Legislature Provides for \$250,000 Relief Fund for Tornado Sufferers

Residents of Will and Kane counties who suffered in the tornado March 1920 in those counties and in Cook county will be reimbursed by the state if a bill advanced to third reading in the senate is passed. The original bill as introduced by Senator Roos provided only for the relief of tornado victims in Melrose Park, Maywood, Bellewood and vicinity.

When brought up in the senate on second reading the measure was amended to include all tornado victims in Cook, Will and Kane counties. The original bill carried an appropriation of \$150,000. The measure was amended and now carries \$250,000. The state executive is authorized to appoint a commission of three members to carry out the provisions of the act.

Post office department buys 50,000 revolvers for its mail clerks but the people won't be quite satisfied until they have to buy about 50,000 coffins to plant the hold up men where they belong.

**The Best Shoe Service comes from Footwear that fits.**

WHEN you "a shoe buying go" you want style, service and quality all combined. But most essential is the "fit," without it you are sure to have some sort of foot trouble.

It's an absolute fact that shoe troubles are due to foot troubles and it will more than pay you to come here for your next pair of shoes, just to learn what genuine fit and foot comfort service means.

Our entire stock and the service of our Graduate Practitioner is at your command.

We carry a complete line of

**Dr. Scholl's Foot Comfort Appliances**

and our Foot Comfort Dept. is in charge of a man specially trained in the Dr. Scholl method of Foot Correction. He knows feet as well as shoes and can demonstrate to your entire satisfaction that it is needless to have any kind of foot troubles.

Don't let this foot comfort opportunity pass without doing duty to your feet.

Examination and advice free. Not necessary to remove the stockings.

To strengthen the weak arch, lift the body's weight from the tender joint and prevent the forming of bunions, Dr. Scholl's Foot-Easener is especially designed. Price \$3.50 per pair.

The Foot Specialist will be at

**SHERIFF CAPTURED RAILROAD ROBBER**  
 Exciting Chase Through Fields Near Grayslake Ends When Thief is Caught

A running gun battle with Sheriff Elmer Green in pursuit, while deputy sheriff Elvin J. Griffin cut off the retreat of an alleged train robber in an automobile which sped through pea fields, late Friday afternoon, resulted in the capture of robber and the recovery of \$1,800 worth of burglarized cigarettes.

At noon Friday Sheriff Green received a tip that a man was trying to sell a large quantity of cigarettes which apparently had been stolen and the undersheriff Griffin hurried to Grayslake.

In a field on the old Phillips farm southwest of Gage's near Grayslake they saw a man sitting under a tree. When the officers came within two blocks of him, the man started running across the fields. He was nimble as a deer and hurdled high fences like an athlete.

The man jumped a ditch, scurried across the railroad tracks and was sailing across a pea-patch when Sheriff Green attempted to halt him. The fugitive continued running and the sheriff took a shot at him.

The people who buy their goods out of town believe that railroad passenger rates cost altogether too high.
