

The people of Highland Park are exhorted to get behind their home enterprises and push them, but some folks get behind them for the purpose of kicking them.

The Germans claim they can't get on their feet until they are loaned enough money to pay their debts with.

Fact that a lot of folks are writing "free verse", doesn't prove that the bookstores are giving away any poetry collections.

With coal as hot as a Sunday sun, put Old Man Winter on the run.

WHEN Old Man Winter comes sneaking along with his zero smile you want to be on the firing line.

As an ex-officio Recorder of Deeds Mr. Brockway's office shows some very interesting statistics.

During the year ending December 24, 1921, 780 cases were filed, which included 135 bills for divorce and separate maintenance; 13 bills to annul marriage; 26 bills of foreclosure; 23 bills to quiet title; 19 bills for partition and 63 mechanics lien notices.

In the Naturalization division the records show 250 declarations for citizenship papers and 202 petitions for second papers.

As ex-officio Recorder of Deeds Mr. Brockway's office shows some very interesting statistics.

During the year ending December 24, 1921, 9320 instruments of all kinds were filed. The total amount of loans being approximately \$3,500,000.

Many interesting real estate deals were recorded.

The following summary includes only the more important deals in this vicinity:

Highland Park

BOUNDARY LINE IS WRONG, SAYS LAVERY

Writer in Illinois Law Review Declares That North Line of State Zig-Zags

Uncertainty as to the boundary line which is supposed to divide the states of Illinois and Wisconsin from a legal and technical standpoint is expressed in an article in the January number of the Illinois Law Review by Urban A. Lavery. Mr. Lavery's article is entitled, "The Boundaries Article of the Illinois Constitution."

This divergence, according to Mr. Lavery's investigations which have been historical and aged, is described as follows: "The line does not represent the parallel 42°30' as the constitution of Illinois and Wisconsin prescribes. It zig-zags to and fro having been made with a surveyor's compass in the hands of Lucius Lyon, United States Commissioner. The line should go further south than it now is—about three-quarters of a mile in the western part of Wisconsin, and further north in and east of Beloit."

"Many years ago this matter was taken up and a letter was written by the County Surveyor of Rock County, Wisconsin, who claimed that the boundary varies as indicated. He added: "I refer you to the Rockford and Belvidere Quadrangle, U. S. Geological Survey. . . . The City of Beloit is situated on the north side of the state line, and, if the true line were observed, would probably lose three blocks of residence and business property, while South Beloit, Illinois, would gain."

Just how valuable these several blocks of business property in Beloit now are, Mr. Lavery does not attempt to show, and admits that he is not concerned especially with that feature of the matter. He says: "It is difficult at this time to understand how such a patchy job of surveying so important a line as the boundary between two states could have been conducted in this haphazard manner. He adds that the various commissions in charge of the various parts of the work failed to comply with the instructions, apparently finding it impracticable to do it, according to historical data. It required two years to do the work and at times the party was annoyed by Indians, while at other times the severity of the weather interfered. Mr. Lavery declares that a very careful search fails to show him that there has ever been any official action on the part of the state of Illinois which would approve the line as surveyed, notwithstanding the precedent set by Congress by the Act of June 23, 1836. Both the state legislatures of Wisconsin and Illinois, however, are admitted to have recognized the degree of north latitude along which the mythical line is supposed to go, by paying various expenses in connection with the survey. Mr. Lavery discusses in this connection, however, the recognition of the dividing line in the various state constitutions in Illinois and takes up the further matter of settling the problem in the proposed new State Constitution of Illinois.

63.1% INCREASE IN TEACHERS' SALARIES

Only One Other County in Illinois Pays Pedagogues as Much as Lake County

School teachers in Lake County have no cause to complain of their lot for, according to the January issue of the Educational Press Bulletin, they are the best paid teachers in grammar schools in the state of Illinois outside of Cook county. The average salary paid teachers in the Lake County schools for the year 1918-1919, was \$858. For the year 1919-1920 the average salary paid teachers in the county of Lake had been increased to \$1165, an increase of 35.7 per cent. For the school year 1920-1921 the average salary of Lake county teachers was increased to \$1400, an increase of 20.1 per cent. The increase in salaries in 1921 over 1919 was 63.1 per cent. The percentage of increase in salaries was exceeded in a few counties but this was due to the fact that the previous salaries paid were much lower than in Lake County. For example, the per cent of increase in salaries in Henry County was 67.2 per cent, but the average salary paid in 1919 was but \$588 and that in 1921 was but \$975. In Cumberland county the average salary paid in 1920 was 7.6 per cent lower than in 1919.

The helpful service rendered without charge brings something more satisfying than the ring of the cash register.
