

## Promptness

ONE of the essentials of a good bank is promptness. In practically every transaction the element of time plays an important part.

It is a matter of pride with us that in our dealings with customers there is the utmost promptness.

This characteristic will appeal especially to the business man who, from personal experience, knows the necessity for quick action.

### SUPPORT LOCAL ENTERPRISE

Highland Park merchants deserve the patronage of the people of this city. They live here and do business here. They pay their taxes and other costs of doing business here. They help bear the burden of the community in all matters of community interest, and are always ready to help every worthy cause. No class of citizens is oftener called upon to aid in local projects with time and money than are the merchants. No one is more liberal than the merchant in helping every good cause.

The merchants are boosters who can be depended upon in every emergency. Because they are loyal and willing they should have the support of their fellow citizens. The business men are always ready to go to any reasonable length to please their customers. They advertise their goods through the columns of the Highland Park Press and through printed announcements, seeking the trade of their neighbors. Is it more than fair that they should have it?

Only by co-operation can the prosperity of a city like Highland Park and the prosperity of its merchants and people generally be maintained. The community spirit means that every one is willing to pull for the best interests of the community. It is not for the best interests of the community for its people to trade with outside concerns. The local business concerns should be supported by the people of Highland Park just as any other local institution or enterprise is supported.

The merchants are the pillars of the commercial structure of this city. It is the duty of the people to uphold them by giving them their patronage whenever and wherever possible.

### BE SURE TO VOTE AT SCHOOL ELECTION, SAT.

(Continued from Page 1)

a kindly interest in Elm Place School. Of the three districts having to do with the education of Highland Park public school children, District 107 is the only one whose limits are entirely within the city of Highland Park. The District came into existence in 1876 and has continuously maintained school facilities at Elm Place and Sheridan Road up to the present time. Its present Board, a capable and disinterested body of citizens, asks permission to give to Elm Place much needed equipment in the way of class rooms, shops and laboratories, and while doing that to construct a gymnasium and an auditorium of the most approved type, all this with the design to make the whole school plant a complete and modern unit. This, we believe, is Highland Park's opportunity. It is a forward looking event. It is left for Elm Place, and very appropriately,

too, to have a public auditorium owned by Highland Park and adequate for its needs.

The Press warmly welcomes the prospect. Further, the Press is authorized to state that the Board has recently secured an option upon a piece of land with one hundred feet of frontage immediately adjoining the north limits of the present Elm Place site. If the decision to build is made, this land will be immediately available. This will more than compensate for the space taken up by the proposed new building. This announcement will reassure those who, while giving favorable consideration to a building on the Elm Place site, have had misgivings as to available space.

We congratulate the voters of District 107 upon their opportunity. We advise all to vote yes on the propositions to build and to issue bonds.

The polls will be open at Elm Place School Saturday afternoon, January 21, from one to seven o'clock.
