COMPANY ABLE TO PAY ITS DIVIDENDS

Annual Report Shows that Holders of Public Service Co. Stock Number 12,748

In spite of continued high price of fuel and all other materials entering into production of service, the Public Service Company of Northern Illinois was able to continue payment of usual dividends to holders of common and preferred stock. The annual report shows these owners number 12,748, including those who are purchasing securities on the partial payment plan and practically all are customers and live in the territory served.

The report contains striking figures showing the extent to which the investment necessary to supply the growing population has expanded. Investment in plant and equipment and miscellaneous property, total the vast sum of \$60,884,580, while other belongings of the Company, not included in plants, bring the total assets up to \$68,881,630.

Total sales in 1921 amounted to \$12,233,315. After payment of operating expenses, including fuel, wages, taxes and plant maintenance, bond interest and making provision for depreciation, there remained \$1,579,532 for payment to stockholders, giving ample proof of the stability of the business, even in the face of adverse conditions.

Showing the growth in the territory and the wider use of electricity and gas, the report gives this comparison of customers:

Class of Service	1921	1920
Electricity	118,308	106,305
Gas	74,056	71,164
Water	5,735	6,018
Heat	1,127	1,122

The slight decrease shown in the number of water customers is due to a change in the method of registration, whereby the number of water customers is recorded by accounts or meters, rather than by families served. The increase in electric customers accounted for 27,000 kilowatts of additional business being added to the lines.

The report pays a tribute to the loyalty and efficiency of employees and lauds their efforts towards producing better service even in the face of the unusual situation which affected all business during the year.
