

Your Lawn

A so-called Lawn is composed of hundreds and often many thousands of individual plants of Grass, according to its size, strange as it may seem, yet each one of these individual plants if given proper room for development as nature has intended, would occupy at least a space from 8 to 12 inches square and the plant itself would grow up to two feet or more, flower, go to seed, die down and grow up again, the decayed foliage acting as a protection to the roots as well as Fertilizer and this holds good with practically every variety of Grass used for Lawn, the Kentucky Blue, Red Top, Foxtail and other sorts.

When growing such Grasses in a Lawn in a crowded condition and using the Lawn mower once a week during Summer, the best Lawn will run out sooner or later if plant food of some kind isn't supplied, every time the grass is being cut additional nourishment is needed to produce new growth, that is why Lawns, not fed, run out, why weeds take the place of the Grass and why Moss will spread, both Weeds and Moss only get a foot hold where there is a weak stand of Grass or where Grass has died out.

In England and other parts of Europe, they have perfect Lawns consisting of a velvety turf, forty and more years old, because they are tended to, kept clean, nourished and rolled, with us it means to oftentimes dig up and reseed a Lawn every five or six years due to neglect, the Owner doesn't notice anything wrong with his Lawn until the Grass is all starved out and weeds are in its place, a good Lawn can't be developed in a year, it takes time, labor, patience and above all plant food to encourage a healthy growth and the more shade there is, the more attention is required if results are wanted.

Right now is the best time to go over the Lawn with a sharp iron rake, remove moss, dead grass and weeds and stir up the surface of the soil between the Grass, apply a good dose of Darling's Blood and Bone Phosphate Fertilizer followed by a liberal amount of Grass Seed and a light rolling, get some life into your Lawn, a little Fertilizer applied each year doesn't cost much but will be of greater benefit than anything else you could do to your Lawn. A good Lawn is so important to the Home Ground and with each year more attention is being paid to it, all else you may have in the way of Trees, Shrubs or flowers will never take the place of your Lawn.

May be that you like us to look over your Lawn and tell you just what is best to do with it, this doesn't cost you anything nor put you under any obligations, if you like, of course we will be glad to do the work or furnish what you may need in the way of Fertilizer or seed but that is up to you, whether you buy or don't, let us offer you suggestions on your particular needs, we like to have you get into the habit of consulting us over Telephone 85 on any and everything pertaining to Gardening.

We have sent out over 2000 copies of our Spring list of desirable Hardy Roses, Perennials and Shrubs and there is still a copy here for you, if you have been overlooked, let us mail you one and if you don't find what you want in it, call us up over 85. The Flower Phone of Highland Park. We have had that number now for over 26 years and we are surely proud of it. When in doubt, call up 85. Your troubles are over.

Bahr FOR FLOWERS

Joe says this is a real sensible Ad this week, strictly business and but little attempt to be funny and work in poetry taken from the Book of Knowledge. We let it go with that, but would like you to glance over this page next week and read "The Romance of the Easter Lily." I am sure you will enjoy it and who knows but what it might mean a Lily or some other flowering plant for your home on Easter. It seems too bad that you can't see our display at the Greenhouses, it is really well worth your while.
