The Correct Way to Signal the Operator

MOVING the telephone receiver hook up and down causes a small electric lamp to flash on the switchboard in front of the operator.

If the hook is moved rapidly, the light does not flash and the operator cannot see the signal, hence does not know that you are trying to get her.

The quickest way to signal or to recall the operator is to move the hook up and down slowly.

Studebaker

Ask your neighbor about his SPECIAL-SIX

THE SPECIAL-SIX should be the best car in the world for the money—and it is! It's the sum of great engineering and manufacturing resources — millions of dollars in factories and machinery, and 70 years of manufacturing experience.

With these resources concentrated exclusively on the building of six-cylinder cars, it is no wonder that Studebaker produces a car of such intrinsic value as is represented by the SPECIAL-SIX.

—No wonder every Studebaker sells another!
