Platinum Mountings

You will be surprised to see what can
be made from one or more diamonds you
have laid away because they are not set
in a platinum mounting.

Let us make you a design and give you
an estimate of the cost of resetting.

A platinum mounting, a few small
stones together with your larger ones
will not be expensive, you will be pleased
and the cost will be trifling compared
with the satisfaction.

**NOTICE OF AWARDED
CONTRACT**

Notice is hereby given to all per-
sons interested that the bids for the
furnishing of all labor, tools and ma-
terials necessary for paving First
Street from Laurel Avenue to Elm
Place and Elm Place from St. Johns
Avenue to Second Street, were opened
on the 26th day of May, A. D. 1922,
and E. E. Farmer, being the lowest
responsible bidder, the contract was
awarded to said E. E. Farmer on the
2nd day of June, A. D. 1922.

Said bid for the work is as follows:
2500 Cubic Yards of grading, for road-
way and combined curb and gutter,
including the preparation of the
subgrade and removal of all sur-
plus excavated materials, measured in
the cut, at Eighty Cents per
cubic yard, \$2000.00

300 Cubic Yards of grading for park-
ways, measured in the cut, at Sixty
Cents per cubic yard, \$180.00

8500 Square Yards of reinforced con-
crete pavement, composed by vol-
ume of one (1) part Portland ce-
ment, two (2) parts sand, and three
(3) parts gravel or crushed stone,
mixed with sufficient water, with
asphaltic felt expansion joints;
three-eighths (3/8) inches thick,
spaced thirty (30) feet apart, ex-
tending from the bottom surface to
the top surface of the pavement;
reinforced with forty (40) pounds
of effective steel fabric per one hun-
dred (100) square feet of pave-
ment; the thickness of the proposed
pavement shall be eight (8) inches;
including protection from the
weather, curing from the water and
cleaning surface of the pavement
after construction, laid complete,
at Two Dollars and 75/100 per
square yard, \$23875.00

3500 Lineal feet of Portland Cement
concrete combined curb and gutter,
the body concrete composed by vol-
ume of one (1) part Portland ce-
ment, two (2) parts sand and three
(3) parts crushed stone or gravel;
the exposed surfaces plastered with
a one (1) inch layer of mortar
composed by volume of one (1) part
Portland cement and two (2) parts
sand; all mortar and concrete shall
be mixed with sufficient water,
height of curb and gutter over all
shall be fourteen (14) inches, width
of curb seven (7) inches, width
of gutter seventeen (17) inches, laid
on a six (6) inch layer of crushed
stone taken from the old pavement;
said combined curb and gutter shall
be cut into blocks six (6) feet in
length, with three-eighths (3/8) inch
open expansion joints extending
from the top to the bottom of said
curb and gutter and spaced thirty
(30) feet apart, laid complete, at
Eighty Cents per lineal
foot, \$2800.00

10 catch basins, constructed of brick
masonry, brick laid with mortar
composed by volume of one (1) part
Portland cement and three (3) parts
sand mixed with sufficient water;
inside diameter three and one-half
(3 1/2) feet, inside depth six and
three-quarters (6 3/4) feet below the
established grade where located,
side walls eight (8) inches thick,
bottom six (6) inches thick; includ-
ing all excavation; each furnished
with an eight (8) inch inside diam-
eter, vitrified tile outlet pipe and
a four hundred (400) pound asphal-
tic coated cast iron inlet cover,
constructed complete, at
Sixty Dollars each, \$600.00

1 inlet basin, constructed of brick
masonry brick laid with mortar
composed by volume of one (1) part
Portland cement and three (3) parts
sand mixed with sufficient water;
inside diameter two (2) feet; inside
depth three (3) feet below the es-
tablished grade where located, side
walls eight (8) inches thick, bot-
tom six (6) inches thick, including
all excavation; each furnished with
an eight (8) inch inside diameter
vitrified tile outlet pipe, and a four
hundred (400) pound asphaltic
coated cast iron inlet cover; con-
structed complete, at
Forty Dollars each, \$40.00

19 "manhole-catch basins" construct-
ed of brick masonry, brick laid with
mortar composed by volume of one
(1) part Portland cement and three
(3) parts sand mixed with sufficient
water; inside diameter three and
one-half (3 1/2) feet, inside average
depth seven (7) feet below the es-
tablished grade where located, side
walls eight (8) inches thick, bot-
tom six (6) inches thick; including
all excavation; each furnished with
an eight (8) inch inside diameter,
vitrified tile outlet pipe, and a four
hundred (400) pound asphaltic
coated cast iron inlet cover, con-
structed complete, at
Sixty-seven Dollars each, \$201.00

4 manholes, constructed of brick
masonry, brick laid with mortar
composed by volume of one (1) part
Portland cement and three (3) parts
sand mixed with sufficient water;
inside diameter three and one-half
(3 1/2) feet, average depth five (5)
feet below the established grade
where located; side walls eight (8)
inches thick, bottom six (6) inches
thick; including all excavation; each
furnished with an eight (8) inch
inside diameter vitrified tile outlet
pipe, and a four hundred eighty
(480) pound asphaltic coated cast
iron manhole cover, constructed
complete, at
Sixty Dollars each, \$240.00

2550 Lineal feet of eight (8) inch
inside diameter, vitrified tile hub
and spigot pipe drain, laid at an
average depth of five (5) feet six
(6) inches, including all trenching,
backfilling trenches with crushed
stone taken from old roadway, laid
complete at
Seventy Cents per lineal foot
\$1785.00

1140 Lineal feet of ten (10) inch in-
side diameter, vitrified tile hub and
spigot pipe drain, laid at an aver-
age depth of five (5) feet six (6)
inches, including all trenching,
backfilling, trenches with crushed
stone taken from old roadway, laid
complete, at
Eighty Cents per lineal foot
\$912.00

1 new asphaltic coated cast iron man-
hole cover weighing four hundred
eighty (480) pounds, set to finished
grade where located, complete at
Twenty Dollars, \$30.00

2 fire hydrants moved and reset, in-
cluding thirty (30) lineal feet of
four (4) inch inside diameter, cast
iron water pipe weighing twenty-
two (22) pounds per lineal foot,
laid with lead and oakum joints at
an average depth of five (5) feet,
including trenching, cutting pres-
ent water pipes, furnishing and set-
ting cast iron water pipe fittings,
set complete at
Sixty-five Dollars each, \$130.00

1 present drinking fountain located
on First Street, moved five (5) feet
east of its present location, includ-
ing all fittings, piping, trenching,
connections, reset complete in place,
on new foundation, similar to founda-
tion now in use at
Twenty Dollars, \$30.00

4 present manhole covers adjusted
to finish grade where located, at
Five Dollars each, \$20.00

400 Square Feet of side walk ap-
proaches adjusted to meet the grade
of the proposed combined curb and
gutter of the pavement where lo-
cated by raising or lowering said
concrete walk, at
Twenty-five cents per square foot
\$150.00

4000 Square feet of concrete side-
walk constructed, average thickness
of concrete five (5) inches, laid on
a six (6) inch foundation of gin-
ners, said concrete to be composed
by volume of one (1) part Portland
cement, two (2) parts sand, and
four (4) parts crushed limestone
or gravel mixed with sufficient
water to make a quaking mass, ex-
cept the top one (1) inch which shall
be composed by volume of one (1)
part Portland cement, and two (2)
parts torpedo sand, mixed with
sufficient water to make a quaking
mass, at
Thirty Cents per square foot
\$500.00

260 Square Yards of present pave-
ment adjusted at
Seventy Cents per square yard
\$182.00

50 Lineal Feet of present curbing ad-
justed at
Fifty Cents per lineal foot, \$25.00

17 abandoned catch basins, old covers
removed, outlet of basins plugged,
backfilled with crushed stone taken
from old roadway, at
Five Dollars each, \$85.00

1260 Lineal feet of old curbing re-
moved, including all trenching and
backfilling of trench with crushed
stone taken from old roadway, at
Thirty-five cents per lineal foot
\$441.00
