Read This

Toledo, Ohio,
 August 11, 1922.

Springer & Person,
 Highland Park, Ill.

Dear Sirs:

I wish to tell you of my trip to Toledo, Ohio, in my Ford Roadster which I purchased from you. I filled up my tank with De Luxe gasoline at your place before I left and it run me all the way into Toledo, Ohio. I think this is remarkable because of the mileage covered. I covered 300 miles on the ten gallons of gasoline. I have always complained of the amount of gasoline I consumed and I thought my carburetor was no good, but after limbering up my motor and trying this new gasoline I am more than satisfied. I had no motor or tire trouble on the way and I enjoyed the trip. "Me for a Ford and De Luxe Gasoline all the time." Will see you next week.

THE ORIGINAL AMERICAN

GRAY GOOSE—he was here when Columbus came. Nature has not developed Gray Goose in a day, nor a hundred years. His poise, his speed, his endurance, his self-reliance, have been developed by his necessities. Q The Wills Sainte Claire was not developed in a year, nor a decade. Back of it is the momentum of engineering since the beginning of time. Q Necessity—necessity for more flexible power, more comfortable riding, for better materials, for lighter weight, for safer and easier driving, for more scientific transportation—has produced this car. The Wills Sainte Claire is not inspiration. It is Evolution.

Have you ridden in the Wills Sainte Claire?

GREAT CHI-COOK FAIR OPENS AUGUST 26th

AT CHECKERBOARD FIELD

Will Exhibit and Demonstrate
 All Kinds of Farm Machinery. Horse Racing to be Feature

Manufacturers and dealers of farm implements will hold an educational machinery exposition in connection with the Great Chi-Cook Fair on Checkerboard Flying Field, Speedway, Maywood, August 26 to September 4, in which men of city and farm may study at first hand the best, up-to-date farm machinery now on the market.

Illinois is the leading state in the production of agricultural implements the value of its products being \$65,337,663, more than one-third of the total value reported for the entire United States. Illinois is third in number of implement manufacturers. These manufacturers, as well as farm implement dealers, are now arranging for space in which to exhibit their products at this great agricultural-educational exposition where town and country meet.

Representatives of these firms will be present during the ten days of the fair to explain and demonstrate the newest labor-saving devices in farm equipment. The best methods of keeping the harrow, truck, mower, plow, thrasher, hayloader, etc., in good condition from year to year will be explained and various repairing demonstrations given.

Printed matter outlining the advantages of using the best farm machines will be distributed. One dealer will show a number of implements dating back to the period before modern farm machinery came into general use, thus making it possible to compare new methods with the old. Numerous exhibits

are being planned, tracing the development of the farm machine industry, showing its direct bearing upon agricultural and industrial development.

Other displays are designed to illustrate the value of machinery to the farmer, showing how improved equipment has relieved farming of its excessive drudgery, making the hours of service less and the laborer, a more efficient worker and a better citizen.

Officials of the fair are planning daily running races. Those wishing to enjoy the "sport of kings" will have the opportunity to witness some thrilling races as thoroughbred horses from Kentucky will be among the racers. All forms of gambling and bookmaking are strictly prohibited and there will be an adequate police force on the grounds to arrest offenders.

C. N. S. & M. WANTS "T" RAILS IN WILMETTE

Petition Made to Illinois Public Utilities Commission to That Effect

"T" rails will be laid on the Chicago, North Shore and Milwaukee Electric railway right-of-way along Greenleaf avenue, Wilmette, if the Illinois Public Utilities commission acts favorably upon a petition about to be filed with the commission by the road.

Attorney Bradley, speaking in the interests of the North Shore line, appeared before the Wilmette Village board and formally made known the fact that the petition of the company was prepared and ready to be filed with the commission.

Several residents of the village attended the meeting and offered objections and it was stated officially that Village Attorney Crossley would appear at the prospective hearing before the commission to enter formal objection in the name of the village.

Attorney Bradley appeared before the board in conformance with a promise made by him some time ago to the effect that he would give the vil-

lage officials due notice before the petition was filed.

The proposed new right-of-way along East Railroad avenue in Wilmette and Jenks street and its continuation in North Evanston is so involved in litigation, Mr. Bradley asserted, that it was not probable the proposed route could be projected for some years.

He declared the laying of "T" rails along Greenleaf avenue was a matter of public safety and that it would have the effect of lessening the noise attendant upon the traffic over the present time-worn roadway.

COWS "DOLLED UP" FOR COUNTY FAIR

Latest Style in Bovine Dress Will Be Featured This Year

A style show presenting all the latest fashions in bovine dress will be a feature of the dairy cattle exhibit at the Lake County fair, Libertyville, September 4 to 8.

The dairy cow who visits the fair this year and expects to take any prizes, will have to be dressed in the most up-to-date way to make a hit with the judges. Appearance of animals in dairy cattle judging, including weight, form, quality and condition, and temperament will count for twenty-eight points out of a total score of 100 points. All other things being equal the best dressed cow will win first prize.

Dairy cattle being made ready for the judging ring are first washed with warm water and soap. Their hoofs are then trimmed to enable them to stand squarely on their feet. Too long toes give an animal an unnatural position in standing. The hoofs later are smoothed down with emery paper to take off the rough spots.

If the horns are crooked they are straightened with clamps or weights hung from the tips of them months in advance of the show to pull them into shape. Later the horns are

smoothed with rasp files and emery paper and rubbed down with wolen rags dipped in oil. Clippers are used to give the body a close, sleek, smooth appearance. The tail is braided tight after being washed; when the braids are unloosed the switch flares out in a bushy way.

The dairy cattle show promises to be a big one. Premiums totaling \$1,600 are offered, practically all of which will be awarded. Entries for the show will close at noon on September 4th.

RESORT MEN LOSING MONEY THIS YEAR

Summer resort keepers in Lake county report that the present season has been the most disappointing from a monetary standpoint that they ever have seen. Many of the resort men say that their business is from twenty-five to fifty per cent under that of last year.

Some of them, in speaking of the matter are inclined to blame the unusually cool weather that has prevailed this summer. They say that this has kept away thousands of summer resort visitors.

Another reason ascribed is that the strenuous campaign conducted by States Attorney A. V. Smith has made it next to impossible for resort keepers to handle liquor as they have done in other years and this has kept away many of their old time patrons.

But there is still another reason. It is claimed that hundreds of those who patronized the summer resort hotels in the past have purchased summer cottages on the different lakes and are living in them instead of in the hotels. The truth of this is borne out by the fact that the lake region is building up very rapidly. Hundreds of new cottages are going up in various places and available lots are fast disappearing.

Summer resort keepers assert that they stand to lose many thousands of dollars as a result in the slump in their business.
