SAVE THE TRAINING STATION

A movement is being started by friends of the Great Lakes Naval Training Station to enlarge upon the scope of the activities of that institution so that they may at least be made equal to those in progress prior to the war. The success of this move depends entirely upon how it is received by the people of the Middle West, as represented by their commercial, industrial, civic and other organizations, and the effort they put forth in developing the force of public opinion in its favor.

At present the activities of the Great Lakes Naval Training Station are confined to the operation of two relatively small trade schools, which together accommodate about 500 men. It is desired to have the work of these two trade schools supplemented by a resumption of general recruit training which was discontinued during the past year.

The cost of operating a training station as large as Great Lakes for such a relatively small number as 500 men is excessive, if not prohibitive. Unless more men can be placed under instruction at this training station, as would be the case if general recruit training were resumed, the opinion has been expressed by persons well informed that it is only a question of time until Great Lakes will be closed entirely. The gradual curtailment of its activities can have but one significance. It means that this splendid institution is slowly, but nevertheless surely, undergoing strangulation.

The friends of Great Lakes do not wish to wait for such an eventuality as its closure before exerting their efforts to save this fine training station for the Navy and for the Middle West. Its achievements in the past and its present and future potential value are such as to merit in this crisis the staunch support of the section of the country it represents.

PETITION REQUESTS PARK FOR MEMORIAL

Legion Post Starts Move to Set Aside City Property for That Purpose

With a view to establishing and maintaining a permanent memorial to the citizens of Highland Park who served in the World War, Dumaresq Spencer post of the American Legion, is circulating a petition, which is being largely signed, asking the city council to set aside for memorial purposes the triangular park, bounded by Linden, Laurel and Prospect avenues, the property of the city, and which the post regards as a suitable and central location for the planned memorial.

If this action is taken by the council, of which there seems to be little doubt, it is planned first of all to erect thereon the highest flagstaff in these parts. Later the Legion post will father other projects along the same line, and eventually it is hoped that a monument or a memorial building to be used as a social center may be erected on the plot in question.

GEN. MOSELEY CALLS UPON MAYOR HASTINGS

Urges Co-operation Between Communities and Army Posts

General Geo. V. H. Moseley, commanding officer of Fort Sheridan, and since the latter part of September in command of the Sixth Corps Area, called on Mayor Samuel M. Hastings at the beginning of the week, accompanied by members of his staff.

In the course of conversation the General stated that although the reservation had been granted the government without restriction, no activities would be carried on that were not in accord with the wishes of the people of the communities adjoining.

A wreckage company is now dismantling the buildings on the old parade ground. As soon as completed the parade will be leveled and frequent military ceremonies and other events will be scheduled to which the public will be invited.

The post will be made as attractive as possible and more use will be made of it by members of the National Guard, Organized Reserves, Boy Scouts and similar organizations.

General Moseley desires that the local communities look at Sheridan as their army post and will make every effort to make it so.
