

If the scorching drivers are determined to go into the ditch, it would be advisable to pick out a spot where they won't have to roll over three or four times before reaching bottom. From the way speeding motorists fear around the streets in some places, one might think they were observing the hunting season by trying to bag the pedestrians.

GRACE M. E. CHURCH
Corner North avenue and Laurretta Place, William E. Grose, Pastor. Preparations are already underway for Christmas. Nearly every class in the Sunday school has planned to take part, and there will be a spirit of friendly rivalry as to who will lead in quality and interest.

Our beginners department in the Sunday school is keeping up a fine record of attendance and interest. Mrs. Goosman, the superintendent and her corps of teachers are doing most excellent work. In this department rests the hope of the Sunday school and church for the future.

The Ladies' Aid society will meet at the home of Mrs. R. S. Black, corner Beech and Logan streets, Friday afternoon, Nov. 17. All members and friends are urged to attend.

The Womans' Foreign Missionary society will hold their November meeting at the home of Mrs. Thompson, on Waukegan avenue next Tuesday afternoon.

The pastor had the privilege of being present at the Armistice Day celebration at Deerfield-Shields high schools last Friday. To have seen that splendid company of students march into the assembly room to the music of the band, heard those recitations by members of the class in public speaking, and the various songs in which all joined heartily was an experience not soon to be forgotten. The climax of the hour was the showing of slides from photographs of interesting places on the battle fields in France, taken by Prof. Sandwick last summer. The whole exercise was one that should have been enjoyed by all patrons and friends of the school. It was a most inspiring occasion.

Next Sunday morning and evening the pastor will give a continuation of the series of sermons on Mountain Top Experiences. In the morning we will visit Mount Horeb, and in the evening Mount Sinai. You will be welcome at both of these services. Remember 10:30 a. m. and 7:30 p. m.

The Epworth League service next Sunday evening will be led by Miss Minta McGath. 6:30 is the hour. All young people are urged to attend.

PRESCRIPTIONS COUNTERFEITED

BIG PLANT DISCOVERED

Largest Outfit of the Kind Is Located Accidentally by Government Agents and Raided

What is believed to have been the largest plant ever assembled in the United States for the printing of counterfeit physicians' whiskey prescription blanks has just been seized in Chicago and with it were taken finished fraudulent blanks to the value of several hundred thousand dollars. In finished product, alone, 100,000 books were taken. The regulation book consists of 100 blanks and the regulation fee charged by physicians for filling them out is \$3 which means that in finished product the plant gave up \$300,000.

Accidentally Discovered
The discovery of the counterfeiting plant was brought about in a most unusual manner. A fire broke out in a private home at 1141 School street, this city. When the firemen arrived they found a completely equipped printing plant set up in the house but had no idea that it was being operated for an illicit purpose.

Much of the finished product was thrown from the windows and a number of the prescription blanks fell into the hands of Richard, 7 year old son of Agent David R. Edfeldt, from Director of Prohibition Gregory's office.

The book, upon which the small boy was doing a school problem, fell under the eye of Agent Edfeldt, he questioned his son, was told where he had picked it up and the raid by agents from Director Gregory's office followed.

Find House Deserted
When the agents reached the house they found it completely deserted but the counterfeiting machinery, consisting of three Peerless printing presses, plates for the making of the blanks and great quantities of raw stock were found.

In the printing the blanks had to be put through six processes and the work was so thoroughly done that even the most expert government agents could not distinguish the counterfeit blanks from those printed by the government. The most remarkable part of the entire process was the putting of the paper manufacturer's water mark into the paper, this having been accomplished through the use of a printing plate, lead being employed on the press, instead of ink.

Seals Counterfeiters
Agents from Director Gregory's office are now conducting a search for the owners and operators of the counterfeiting plant and it is said that there is excellent reason for believing that they will be placed under arrest within a short time. That their arrest will mean the landing in federal prison of one of the most extensive gangs of counterfeiters operating in the United States, there is no doubt among revenue operatives.

HELPING ORGANIZE RUSSIAN BUSINESS

Prof. Howard of Northwestern Completes Mission in Moscow

Notwithstanding that the heads of the Russian government are not in sympathy with American institutions democracy, Lenin and Trotsky have called on two Americans to journey to far-away Russia and apply Yankee business methods to the manufacture of clothing. One of these men is Prof. Earl Dean Howard, professor of economics at Northwestern University, who has been prominent, on the economic and financial side, in organizing the clothing industry of America. Prof. Howard went to Russia several weeks ago with Sidney Hillman, president of the Amalgamated Clothing Workers of America who is said to have the confidence of both Lenin and Trotsky, and is due to return to Evanston within the next fortnight. While Mr. Hillman has been instructing Russian clothing workers and managers respecting details of inside operation of a modern clothing plant, Prof. Howard has been offering effective counsel on the financial side.

A recent report from abroad which has just reached Evanston is to the effect that the Northwestern professor has about completed his part of the work and that Mr. Hillman has been equally successful.

All things that grow and bark do not have four legs.

NEW SORORITY AT NORTHWESTERN U

Dot and Circle Society Being Organized by Experts in Marksmanship

Welcome the youngest sorority in America—the Dot and Circle Sorority now being organized by the members of last year's rifle team at Northwestern University. Out of a possible percentage of 100, only those girls who can average at least 75 will be permitted to enter the new sorority. Besides expertness with the rifle the organization will require of new members an adequate amount of sportsmanship, such as being game losers, being able to go through a hard siege of shooting without calling for mother or for smelling salts and similar tests of gameness. The following rifle teams have been sent a circular letter by the Northwestern girls, asking that the sorority be established at their institutions: Drexel Institute, Philadelphia; Oregon Agricultural College; Michigan Agricultural college; Cornell University; Knox college; University of Illinois; University of Georgia; Oklahoma Agricultural college; University of Washington; Syracuse University; Louisiana State University; University of Michigan; De Pauw University and the University of Vermont.

LIGHT BILLS GROW IN WINTER SEASON

Reason Is That There Are More Dark Hours, Public Service Co. Explains

"This is the season when residential electric lighting bills rise" said an official of the Public Service company. "It happens every year and the simple explanation is that lighting hours lengthen. October bills show an increase over September and those for November will be higher than October. The minimum number of what we call daylight hours come on in December. In January the number lengthens and that process goes on until June when the minimum is reached. "In June the average use of electric

light in residence is 1.55 hours per day. In December it is 6.85 hours—nearly four times that of June. "The daylight saving time system in general use operates to reduce the time people use electric light in summer thus serving to increase the difference between summer and winter bills. The fact should be borne in mind at this period and with it the other fact that there are fewer hours of daylight now than in summer and will be fewer yet until the cycle begins its repetition." A notice to this effect has been sent to customers of the company.

ELEVEN CASES ON CRIMINAL DOCKET

Called for Hearing at Opening of December Term of the Circuit Court

State's Attorney A. V. Smith has placed on the trial call for next Monday eleven criminal cases. The case of Dominic Patracia, of Kenosha, charged with attempt to kill Peter Carney, aged Russel resident is the first on the call.

That of Sam Shockley, charged with the murder of C. F. Burns, of Glenocoe, is second. Frank Gaffney of Lake Bluff, charged with attempting to kill Peter Adams, his neighbor is third on the list.

The cases on the call are as follows: Dominic Patracia, Samuel Shockley, Frank Gaffney, John Pappas, George J. Dow, Sarkis Phillibosian, Frank Liczkus, Frank Petlikovsek, William Bock and Otto Kranz, John Callahan, and Martha Abbott.

At 18 the youth is sure he wants to marry 25; at 30 if rich, he woos 18. The most forlorn looking man in the world is the lone guest at a hotel on Thanksgiving day.

With a thought for tired shop girls, but at the risk of seeming trite, may we suggest "do your Christmas Shopping early."

Twenty-five years ago mother said, "Nellie don't you dare go without rubbers. Today she haltingly says, "dear I do wish you would wear your rubbers."

The folks who say a thing can't be done, are of course, talking from experience.

WOMAN WANDERER PICKED UP HERE

Margaret Curry of Chicago Is Found on Street Mentally Deranged

Last week the police picked up a woman on the street who appeared to be mentally deranged. She carried a blanket and sweater under her arm and was poorly dressed. Among other names she gave "Margaret Curry", said she was 47 and had left her home in Chicago because her husband abused her. At one time she denied having any relatives and at another claimed she was on the way to Racine where she had friends and relatives. Once she said she did not care where she was going nor what became of her. The police communicated with the Chicago authorities and at first it was suspected that the woman might be the Margaret Curry known to medical authorities in that city as a typhoid germ carrier, but this proved not to be the case, as the woman's husband was located and came to Highland Park later and took her back to Chicago. He said she had been absent from home for a week.

THREE YOUNG MEN START FOR COAST

Highland Park Boys on Long Motor Trip to City of The Angels

Three Highland Park young men started on Monday, November 6, bound for Los Angeles by the "flivver route". They were George Bahr, son of Fritz Bahr; Herman Hart, son of John Hart and Harold Hart, a nephew. They loaded the five passenger Ford with a varied assortment of accessories, including a cooking outfit, and started on the long trail to the southwest at 6 a. m. They go by the Lincoln highway.

Cards received by relatives say the boys had reached Trinidad, Colo., last Sunday, and they expected to be in New Mexico by the middle of the week.

SAYS DRY LAW IS BEING ENFORCED

"Effectiveness of enforcement is shown by the results in curtailing the source of supply of whiskey for medicinal use and grain alcohol for industrial and drug purposes, such curtailment being reflected in the reduction of tax paid withdrawals of alcohol as measured in tax gallons" said Federal Prohibition Commissioner Haynes a day or so ago. "In the year ending June 30, 1921, withdrawals aggregated 26,275,605 gallons and in 1922 only 16,390,603 gallons. Red liquor withdrawals have been reduced from 12,500,000 gallons in 1920 to an estimate of about 2,000,000 for this calendar year. "Concentration of bonded supplies in a few centralized warehouses will also make for curtailment, and also result in an annual saving of \$300,000."
