HOW U. S. REVENUES ARE BEING SPENT

HOW DOLLAR IS DIVIDED

Budget Bureau Report Showing How Misleading Is State- ment Largest Sum Is Spent for War

The estimate of appropriations needed for the fiscal year beginning July 1, 1923, and ending June 30, 1924, as submitted by the Budget Bureau, completely demolishes that standard piece of fiction which has been in service for many years, to the effect that 90 cents out of every dollar expended by this government is expended for war purposes.

The Budget Bureau analyzes the estimated expenditures, showing how the average dollar appropriated will be divided. The division will be as follows:

How Dollar Is Divided
For support, of the legislative branch of the government, four cents; for the Veterans Bureau, 14.5 cents; for other commissions, boards and bureaus outside the regular departments one cent; Department of Commerce, six cents; Department of the Interior, 10 cents; Department of Justice, including United States Supreme Court and other federal judiciary, six cents; Department of Labor, two cents; Navy department, 10.1 cents; State department, five cents; Treasury department, including appropriations for payment of interest on public debt and reduction of principal, 46.5 cents; War department, including administration of Panama Canal, river and harbor improvements and other non-military activities, 9.9 cents; District of Columbia, eight cents. The post-office department is largely supported from postal revenue.

Not Militaristic
This clearly shows that the United States is far from being a militaristic nation. In fact, in another chart furnished by the Budget Bureau it is demonstrated that out of every dollar expended only 13.5 cents goes to purely military and naval purposes in the interest of national defense. The total expenditures charged as "military functions" are 32.7 cents out of every dollar. This includes the 13.5 cents above mentioned for strictly defense purposes and 19.2 cents for pensions, retirement pay, Veterans Bureau, etc.

According to this chart 34.4 cents out of what is classified as "non-functional" purposes—that is, payment of interest on public debt, retirement of principal of public debt, etc. For the purposes of "general functions" such as cost of the legislative branch of the government, and general overhead of the various administrative agencies, 2.8 cents of every dollar is expended. For what are known as "civil functions," which constitute practically all of the administrative agencies of the government, 27.3 cents are expended.

General Reduction
A table accompanying this chart compares the expenditures of the present fiscal year and the estimated expenditures for the next fiscal year, beginning July 1, 1923, with expenditures as far back as the fiscal year of 1915. This comparison shows a general reduction in all classes of expenditures, but the greatest reduction to be in the expenditures for military and naval purposes. In 1915 41.6 cents out of every dollar was spent for military functions.

The budget Bureau also submits a comparative statement of the appropriations proposed for the fiscal year beginning next, July with those which were made for the current fiscal year. This shows a decrease of \$169,956,934. The principal decreases are in the Department of the Interior, approximately \$11,000,000; Treasury Department, — approximately \$12,000,000; War Department—approximately \$20,000,000; Shipping Board — approximately \$50,000,000.

A few departments show an increase in estimated appropriations for next year over this. Agriculture and the Veterans Bureau, these increases are small. The Department of Agriculture shows an increase of approximately \$20,000,000 due to the increased appropriations for high way improvements. The Veterans Bureau shows an increase of \$18,000,000 over this year.

POSTAL BUSINESS SHOWS PROSPERITY

Return of Better Times Indicated by Increase in Revenues

The country is on its way to an area of industrial prosperity such as has never been seen before, is the opinion of First Assistant Postmaster General Bartlett.

In substantiation of his opinion Mr. Bartlett says: "No better proof of this can be found than our postal business. The mails are running heavier than at any time in history. Receipts at our postoffice from the sale of stamps are going upward. The amount of parcel post matter going through the mails at the present time is taking the capacity of the entire system.

"The postal service is widespread, extending into the most remote corners of the republic, and feels more readily than any other business organization both the blight of commercial stagnation as well as the flourish of its revival."
