

GROUND GLASS USED IN NEW PAINTINGS

IS APPLIED ON COPPER

Beautiful and Artistic Effect Is Explained at Institute By Expert; Results Are Pleasing

The new art of painting with ground glass upon copper has only recently been developed in this country. It has reached its highest state of perfection under the skillful direction of Mr. Frank Gardner Hale of Boston. Mr. Hale is counselor of the Boston Society of Arts and Crafts, and Dean of the Jewelers Guild.

An exhibition of his work, consisting of seven cases, containing 165 articles of jewelry, enamel ware, paintings, etc., was exhibited at the Art Institute last week.

Renaissance in Art
In a lecture on this fascinating subject, given at the museum last Tuesday, Mr. Hale stated that the renaissance in the applied arts in this country was simply amazing. The first guild for hand-made ware to be established in this country was established in Boston some twenty-five years ago. This was followed immediately afterwards by the founding of a guild in Chicago.

The Art Institute, Mr. Hale stated, is the only art museum in this country holding annually, an important exhibition of applied art. At this exhibition there are over one thousand objects of art exhibited. This is in great contrast to the days of the World's Fair in Chicago, when the Art committee of the exposition sent out invitations to American craftsmen to participate in the showing of native applied art. There was no response, for there was little or no art of this kind at that time.

Inherited Craftsmanship
In Europe the craftsman's art instinct comes to him through inheritance. Generation after generation of workers follow the same line of art endeavor and it is not to be wondered at that they excel. The art of painting on copper with ground glass, originated in France. Mr. Hale displayed some beautiful pieces executed by himself in Limoges ware, while he explained the method of making it.

For the blue color a piece of of the desired shade is ground to a fine powder mortar and pestle. With a quill pen this fine powder is distributed over the copper plate, wherever, in the picture, blue is desired. Red glass for the red shades, yellow glass for the yellow shades, is treated in the same manner.

Baked in Furnace
When the design is completed, either of still life, or of a landscape or marine, the copper plate with its carefully arranged design is thrust into a furnace and the whole thing

fuses into brilliant, translucent colors. Sometimes as many as eight firings are required.

NO DECISION ON STATE BONUS BILL

The state supreme court adjourned today without handing down a decision on the constitutionality of the bonus bill.

"There are two members of the court who are disqualified to take any part on account of personal interest in the bonus and considering the circumstances and the condition of the docket, it has been found impossible to decide the case at this term and it will be continued under advisement," acting chief justice Cartwright said.

NOTICE OF BIDS FOR LABOR AND MATERIAL FOR THE ADDITION AND ALTERATION TO THE LAKE COUNTY COURT HOUSE.

The Board of Supervisors of Lake County, Illinois, will receive bids for labor and material for the Addition and Alteration to the Lake County Court House in Waukegan, Ill.

Drawings and specifications are on file with County Clerk at the Court House in Waukegan, or may be obtained from the architect by a deposit of Five Dollars which will be refunded when plans and specifications are returned in good condition.

Bids must be sealed and delivered to architect on or before Thursday, March 15, 1923, at eleven o'clock A. M., at the Court House when they will be publicly opened by the Board of Supervisors. Bidders may bid upon the general contract which embraces the following work: 1—Masonry, 2—Structural Steel and Iron, 3—Miscellaneous Steel and Iron, 4—Carpentry, 5—Painting, 6—Plastering, 7—Glass and Glazing, 8—Roofing and Sheet Metal, or upon any combination of the above, or any separate part of the work.

The following subjects will be let separately: 9—Heating and Ventilating, 10—Plumbing, 11—Electrical work, 12—Terrazzo Floors, 13—Linoleum Floors, 14—Electrical Elevator, 15—Vault Equipment, 16—Furniture, 17—Window Shades.

Bids on General Contract must be accompanied by certified checks, or cash, in an amount equal to 3% of the amount of the bid; and bids on separate contracts in an amount equal to 5% of the bid, for the faithful acceptance of the contract in case of award; said check, or cash, to be returned promptly if bid is rejected.

Owner reserves the right to reject any or all bids and to take into consideration, in awarding contracts, the financial standing, business experience and general ability to carry out the contract.

BUILDING COMMITTEE,
Wm. J. Obee, Chairman
George H. Bairdow
Thos. V. Murphy

BRIEF NEWS ITEMS FROM LAKE COUNTY

NEIGHBORHOOD JOTTINGS

Happenings of Interest Here and There Throughout The County; News of the County Seat

In Waukegan there are two candidates for the mayoralty nomination March 13, T. H. Durst and M. H. Hussey and 23 candidates for commissioners.

Bids will be asked within the next three weeks for a new school to care for domestic and manual training classes on the south side by the Waukegan school board.

A Girls Rifle Club, an auxiliary of Co. B., Illinois National Guard unit of Waukegan, has been launched with an initial enrollment of fifteen young women from Waukegan and vicinity.

Mr. and Mrs. Silas Nichols, of 506 Poplar street, Waukegan, will celebrate their golden wedding anniversary March 2 at an informal reception that will be held at their home.

The steel doors of the Lake county jail at Waukegan clanged last Friday behind George Cessar, former Waukegan saloonkeeper, when he started serving a seventy day sentence in jail, imposed by Judge Persons in County court here early in the year 1916. He must also pay a fine of \$600.

Mrs. Anna Coulson of Highland Park is critically ill at the Lake County General hospital as a result of a fracture of the leg, last Saturday.

Fire of unknown origin, last Saturday completely destroyed a railroad bridge west of Libertyville, on the Chicago, Milwaukee & St. Paul railroad, and menaced the lives of passengers on a southbound train, but the blaze was discovered in time to prevent an accident.

Prosecution of the school violation has been a powerful factor in keeping the children in the county schools at classes this term, T. A. Simpson, county superintendent of schools, declares. There have been between 25 and 35 cases prosecuted during the year and this has affected more than 75 children in school attendance in the county.

Mrs. Rebecca F. Voliva, 77 years old, mother of Overseer Voliva of Zion, died last week. She lived with Voliva in the hotel at Zion. She was conscious until the end. Two sons, Wilbur Glenn and Arthur and other close relatives were at her bedside. Her eldest son, Horace S. Voliva, of Pueblo, Colo., arrived shortly after his mother's death.

C. A. Newcomb, Jr., to Henry Florence, lot 6, block 35, North Chicago. Deed \$200.

LAND AND WATER TANK IS INVENTED

Latest Thing in War Engines Demonstrated Recently in New York

The last work in war vehicles is an armored truck that travels by land or water, that climbs steep embankments, that jumps over trenches, and that makes short work of any obstacle such as wire entanglements, walls, or breastworks. In general construction it is more like an armored truck than the tanks that took part in the World War, but it does all that these did, and more.

A demonstration of one of these war machines was recently given in New York City, and was attended by enthusiastic representatives of the army and navy, and by several hundred members of the American Society of Mechanical Engineers. It traveled along Riverside Drive at a speed of 25 miles an hour, followed by a long column of automobiles, and was then ferried across the Hudson River to the New Jersey side. Here it climbed the towering palisades on a 40 per cent grade to a height of 100 feet, where it reached a level spot, turned around, and then slid back to the road at the riverside. After incidentally bumping over a 4 foot stone parapet, it drove to the water's edge, where propellers were mounted on shafts provided for the purpose at the rear end of the truck. Then it crossed the river, which is at that point nearly 2 miles wide, in about 45 minutes, the steering being done by means of the propellers.

DR. WADE SPEAKS AT M. E. CHURCH
Says America and the Church Need a New Vision of God, in Revival

"America needs a new vision of God, as does the Methodist Episcopal church," said Dr. R. J. Wade, Chicago, corresponding secretary, Committee on Conservation and Advance of the Methodist Episcopal Church at Grace Methodist Episcopal church, here, Sunday evening, February 25.

Dr. Wade was speaking in the interest of the centenary program of the Methodist Episcopal church which secured in subscriptions \$102,000,000, payable in five years. Three years of this period have passed and over \$55,000,000 have been paid into the treasury.

"The great need of the Methodist Episcopal church," Dr. Wade, said "is a general revival. We do need a new consecration to higher ideals. We do need as America needs a genuine revival of religion. The big need today is spiritual power and only religion can create it. All of the vital questions of today center in religion."

"The Methodist Episcopal church has a God-given task to present and live Christian principles that will remake the world in righteousness. Confronted with this task and our own responsibility in prayerful devotion the Methodist Episcopal church will not diminish but increase her offerings for Christ's wide-world plans."

Dr. Wade suggested that a survey should be made in the city and country from house to house in every Methodist parish not for the purpose of getting statistics but to bring a warm-hearted brotherhood to lost and indifferent members of the church as well as to come in contact with unreached and unconverted peoples.

LAKE FOREST GRADS DINE IN NEW YORK

Pres. Moore and Prof. McNeil Go East to Attend; Rev. Hillis One of Speakers

President Herbert M. Moore and Prof. Malcolm McNeil of Lake Forest college have gone east to attend an alumni dinner of the college held yesterday, at Hotel McAlpni, New York. There are about 100 Lake Forest men within a radius of 100 miles of New York.

The meeting was addressed by Newell Dwight Hillis, '84 and John H. Findley.

Did You Ever Stop to Consider

It is a common failing among auto owners to believe that all gasoline and all motor oils come out of the same tanks and that there is not enough difference to warrant discussion.

We contend that there is as much difference between gasolines as there is between various brews of coffee and as much difference in motor oils as there is in clothes.—AND WE ARE WILLING TO PROVE OUR CONTENTION.

LACO

"That high powered gasoline" is of superior quality—it puts pep in your motor, and LACO motor oils if consistently used will keep your motor out of the repair shop so far as wear is concerned.
