**NEW NORTH SHORE HIGHWOOD STATION**

Plans for the North Shore station at Highwood are completed and preliminary work on the surroundings has begun. Mayor Thomas Welsh this week went over the plans with the engineering department of the company and finds them to be wholly satisfactory. The structure will be of the uniform red brick adopted for new stations along this line and the building will be a handsome one adequate in size and equipment and of pleasing architecture. It will comprise a general waiting room and smoking room, a ladies rest room, lavatories and all other accessories to afford comfort and convenience to the traveling public. The new shelters adjoining have been built, cement sidewalks and lighting facilities will next receive attention, and then the station building will be erected, Mayor Welsh is informed.

Anyway when the politicians have their ears to the ground, they can't very well be putting their feet in their mouths.

The country is said to be threatened by a labor shortage, and it certainly looks so around the house when mother wants dad and the boys to beat the carpets. Many people deny that they are not in favor of Sunday observance, as they always observe it by tearing around the country in automobiles.
