Afternoon
Sandal

A remarkably beautiful Afternoon Sandal. Vamp and heel of pointex satin. High arch. Hand-turned soles.

Appropriate and Distinctive Hosiery for All Occasions

Alfred J. RUBY Inc
On Washington near Michigan

HOUSE No. 404

This is just one of the many beautiful houses we have to show you. Come and see them.

How to Get the Most For Your Building Dollars

The answer is short. USE FACE BRICK. It gives you the most in beauty, comfort, fire-safety, durability and economy.

We realize that is a big claim to make. But facts prove that it is true. We haven't space here to give you all the facts, but you will find them fully discussed in "The Story of Brick," a booklet every prospective builder should read before he builds. Come in and get a copy—or send for one.

We have a fine collection of 3 to 8-room Face Brick houses. One will surely meet your taste and needs. Come see them.

The Doctor Was Right

When the good old family doctor was asked about baking powders, he said:

"Use Royal. It is made from Cream of Tartar and is absolutely pure. You could dissolve a couple of teaspoons of Royal in water and drink it with benefit. That's a health test mighty few baking powders can meet."

The doctor was right.

ROYAL Baking Powder

Made from Cream of Tartar derived from grapes

Contains No Alum—Leaves No Bitter Taste

ENGAGEMENT RING ORIGIN AND USES

FIRST BOND FOR FICKLE

Used as Sign of Betrothal For First Time in Second Century B. C.: Custom in Many Lands

Romance was not associated with engagement rings when they first came into fashion.

The engagement ring is said to have originated as an institution to hold the fickle and forgetful man to his bargain from the time he declared his passion until the wedding ceremony took place.

It was during the second century B. C. that women began to flash an engagement ring on the fourth finger of the left hand as a symbol of betrothal.

On Fourth Finger
It was displayed on that particular finger because of the belief, prevalent at the time, that a special vein ran from that finger to the heart. Later, this idea was scouted and other fingers became fashionable.

In Russia the ring was worn on the forefinger, and in France on the middle finger, while during the seventeenth century English women wore the ring on the thumb.

At one time the engagement ring consisted of three hoops looped together into what was known as a puzzle ring. On the wedding day one of these rings was given to the bridegroom, another to an intimate friend and the bride kept the remaining hoop.

Origin of Wedding Ring
For many centuries the engagement ring did duty as a wedding ring as well. The wedding ring, also, was not given from sentimental motives, but was at the start an article almost as practical as a frying pan! The wife was given a plain gold ring with a key attached, so that

she, and she only, could have access to household goods.

The wedding ring was adopted by the Anglo-Saxons about A. D. 860. During the generations since then it has been alternately plain and elaborate. Very often the rings were inscribed in a puzzling fashion by interlocking the names of bride and groom.

BOY ARRIVES AFTER LONG VOYAGE ALONE

Armenian Waif Who Escaped Turks Comes to Waukegan To Relatives

Lavon Boghosian, 13 years old, son of Margonos Boghosian, former employee of the wire mill in Waukegan, has at last arrived in Waukegan after traveling alone over 7,000 miles, from Aintab, near the Mediterranean Sea, across Europe to New York and thence to Waukegan.

Captured by the Turks in the Armenian massacres and sold into slavery among the Arabs, with whom he lived for seven years, speaking the Arabic tongue and thinking himself an Arab, such was the story of the boy who arrived Sunday to make his home with his uncle, Avedis Chazarian, living on south Utica street, Waukegan.

The boy remembers his father, Margonas, who was killed by the Turks when he returned to Armenia from America to bring his family here, and his mother and sister who died of exposure on the march to Aintab. After living for seven years with the Arabs he discovered that he was white and escaped to live under the protection of the British soldiers.

Now the question rises whether the track athletes who are throwing the hammer and putting the shot, will be able to throw the hay on the cart and put a forkful on the barn loft this summer.

INCREASED PAY FOR BUILDING LABORERS

Boost of Fifteen Cents an Hour in Lake County Allowed In Agreement

An increase of 15 cents an hour will be received by Lake county hod-carriers, building and common laborers, beginning June 1, under an agreement signed last week by Local No. 118 and the Associated Building Contractors of Lake county, it was announced today. The minimum scale now is 72½ cents an hour, and the minimum will be 87½. Lake county has launched the greatest building boom in its history.

The new agreement will be effective until May 31, 1924. Those who signed the agreement are E. S. Hines, president pro tem, and A. S. Weeks, secretary of the Associated Building Contractors and Peter Muller, Dominic De Santos and N. M. Jorgensen, signing for the union.

The joint agreement does not contain any radical departures from the present rules governing both parties to it.

CENTRAL AMERICA'S PREHISTORIC RACES

Relics of Ancient Peoples Are Exhibited at Institute and Are Interesting

Egypt is not the only country which, at the present time, is yielding treasure to the diligent excavator. In Gunsaulus Hall, Art Institute, there are some cases containing many strange objects of art which were dug up from ruins in Central America. Mr. Henry Wunsch, of Chicago, whose business frequently calls him to Central America, has lent to the museum a number of extremely fascinating objects made by the prehistoric inhabitants of that country. Whether these remarkable utensils

antedate the Christian era, or were made since then, is not known. A study of the food bowls shows a high degree of artistic skill. This particular bowl has three legs, or supports fashioned after the form of sharks, and the bowl itself is of beautiful contour and finely proportioned. Others show various animals native to Central America. Still others are designed from plants or the native fruits of the district.

LARGEST BUILDING OF ORIENT IN JAPAN

Now Nearing Completion in Tokyo; Is of Eight Stories and Wholly Modern

The Marumouchi Building, now nearing completion in Tokyo, Japan, is said to be the largest office building in Asia. It is an eight-story structure built on a ground area 350 by 300 feet, and is 110 feet tall. The weight of 87,000 tons is supported on piling that extends nearly 100 feet below the ground line. It contains approximately 800,000 square feet of floor space that will be devoted almost entirely to office purposes, and is of fireproof construction throughout. Modern equipment, such as fire and ventilating systems, bathrooms, and other conveniences for the tenants, has been included, and the building houses its own power plant.

Radicals planning to overturn the government, but the only thing overturned so far is speeding autos.

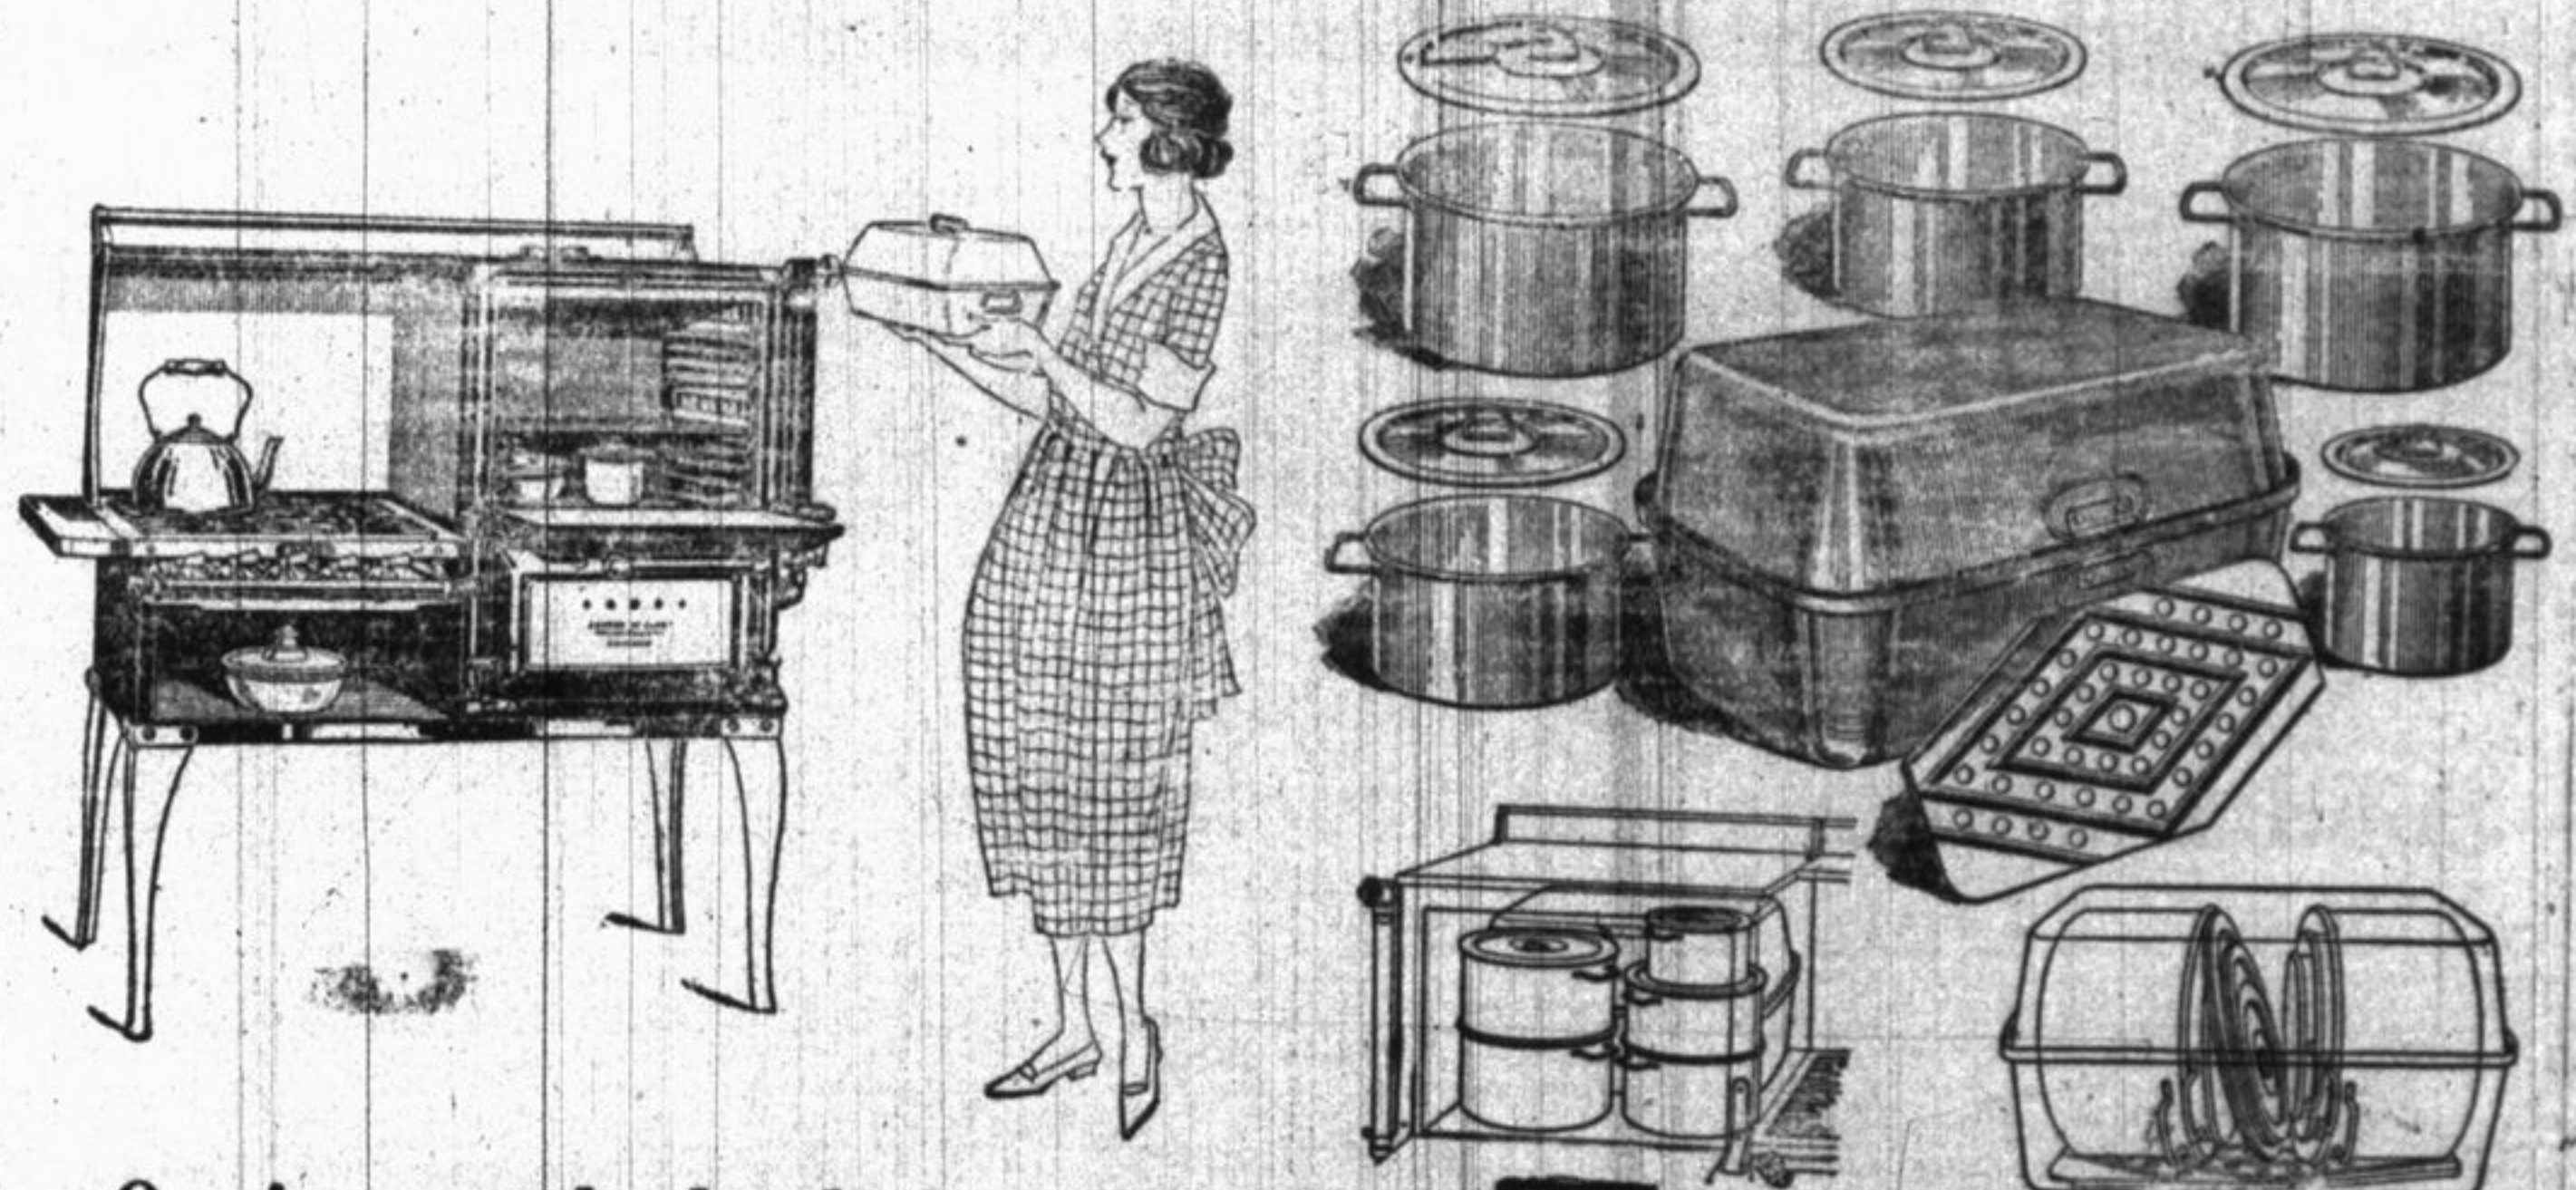

Dr. Melvin B. Hasbrouck
having been associated with the late Dr. John L. Rabston announces that he will continue in the general practice of

Osteopathy
at 253 Park Avenue, Glenview, Illinois.
