9 A. M. Until 8 P. M. Daily Including Sunday

SYNOPSIS OF LECTURE ON CHRISTIAN SCIENCE

BY RES. A. J. GRAHAM C.S.B.

Large Crowd Attends Lecture Monday Evening, at First Church of Christ Scientist

A crowd that filled First Church of Christ Scientist, to overflowing, listened to a lecture by Rev. Andrew J. Graham, C. S. B., member of the Board of Lectureship of the Mother Church, The First Church of Christ Scientist, in Boston, Mass., Monday evening. The speaker was introduced by Mrs. Hamlin. A short synopsis of the lecture is as follows:

The Foreword

Mary Baker Eddy, the Discoverer and Founder of Christian Science, and the author of its textbook, "Science and Health with Key to the Scriptures," has given us a compact definition of Christian Science. On page I of "Fundamental Divine Science," she has defined it as "the law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony." From this and kindred passages in her writings, we learn that Christian Science is the reconciler and consoler of mankind. It is the only way to universal harmony here and now and throughout all eternity. Christians of every name will accept this statement as true when they come to see that Christian Science means Christ-knowledge,—that is, knowing God, man, and the universe as Jesus the Christ knew them. Paul writes to the Corinthians: "We pray you in Christ's stead, be ye reconciled to God." In Christian Science we would add a word, saying: "Be ye reconciled to God"—good. The addition of this word identifies all good with God. To be reconciled to God—good—is the basis for all lesser reconciliations. This is the only source of consolation for earth's woes. Consolation never precedes reconciliation. One must first be reconciled before he can be consoled. He must begin to see and accept the truth before his sins and sickness and woes can be permanently driven away. The English word "reconcile" is derived from the Latin "re" and "conciliare." Literally it means "to be brought together again." There is a supposition that harmony is broken, resulting in separation. The theological dogma known as the Fall of Man declares that the man whom God created and pronounced perfect fell away from God—became separated from his Creator. This belief is deep-seated and tenacious. Reconciliation is the act of destroying this belief and of restoring the sense of unity, harmony, or at-onement. Christian Science or Christ-knowledge is the power through which this result is accomplished. There is no other way.

Reason and Revelation

Coincident with the "Rise of Learning," in the fifteenth century, the Holy Scriptures appeared in languages understood by the people. Then was hastened a great intellectual and religious awakening. Prior to that time very few Christians had access to the Bible. But with its translation that precious volume became the object of widespread study. It was not long, however, before thoughtful students began to be puzzled over apparent contradictions in the Holy Bible. Human reason discovered many passages which did not seem to be in harmony with the character of a loving Father. Very justly did they feel that,

*"The loving worm within its clod
Were diviner than a loveless God."*

The Church had no adequate explanation for these antinomies. The number of intellectual doubters increased. Hume, Voltaire, Paine, and Ingersoll were representatives of a large class of skeptics, stretching down to present days. Human reason, unilluminated by Spirit, could not be reconciled to revelation. Christendom, for more than three hundred years, struggled with the problem. Book after book was written, in the futile attempt to reconcile reason and revelation. In 1866, the dawn of the day of understanding was drawing near. Mary Baker Eddy was reared in orthodox Christianity and was familiar with its problems. For twenty-five years she had studied the Bible with great care. Through this study she had gained a spiritual understanding not equalled by any since apostolic days. She applied this understanding to the interpretation of the Scriptures; and through this understanding she was instantaneously healed of severe physical ills, while reading in one of the Gospels. She writes on page 109 of Science and Health: "For three years after my discovery, I sought the solution of this problem of Mind-healing, searched the Scriptures and read little else, kept aloof from society, and devoted time and energies to discovering a positive rule." On page 110 of the same volume she writes: "In following these leadings . . . reason and revelation were reconciled." Then came to her spiritual sense of compassure, certainty, security, consolation, which preeminently marked her whole subsequent life.

"Key to the Scriptures"

This truth which reconciled reason and revelation for Mrs. Eddy was Christian Science. She has made the reception of this truth possible to all

mankind. By means of it the Bible is unlocked and its real treasures made available. In the Christian Science Church, throughout the world, are multitudes of men and women who knew little about the Bible and cared less. To these persons that book has become a daily companion, whose reason. All of Mrs. Eddy's writings elucidate the Scriptures. But the three chapters in the Christian Science textbook, entitled Genesis, The Apocalypse, and "Glossary," constitute especially the "Key to the Scriptures." A few months' study of these chapters gave to me a workable understanding of God which nearly forty years of study and of preaching in an orthodox church had not revealed. We lovingly commend, to all honest thinkers, a careful perusal of these chapters. They throw a clear light upon the darkest pages of Holy Writ. They have led some of the closest thinkers of the age to accept the Bible as the highest expression of reason known to man. Christian Scientists do not hold to the Bible on mere blind belief. They accept it because they see and know that, rightly interpreted, it is the living Word of God in this and every age. So understood through Christian Science, this Word runneth very swiftly on its loving errand of consolation,—removing manifold perplexities which have vexed Bible students for centuries.

AUTO LICENSES ARE MORE THAN IN 1922

EXCEED 12 MONTHS TOTAL

Secretary of State Reports That Number Already Issued is in Excess of Record for Previous Year

More automobile licenses have been issued already this year than were issued during all of last year and a quarter of a million dollars more in fees has been collected than was collected in 1922, Secretary of State Louis L. Stevenson stated a few days ago.

Since January 1 this year 787,660 automobiles have been registered in the Secretary of State's office. The total registration for 1922 was 786,190. The fees collected to date this year total \$8,118,469. The total collections of the automobile department last year were \$7,861,211.

Month Earlier

The previous year's total registration has been reached this year a month earlier than usual. Last year the previous year's total was not reached until June 20. This speeding up of registration is attributed by Secretary of State Emmerson to the efficiency of the force of inspectors working under him. More than 400 arrests of drivers who have neglected securing their 1923 licenses have been made since March 1 when the round up of delinquent drivers began.

A motorcycle squad of inspectors has been started out by the State. This is the first time motorcycles have been used by the State inspectors and those who are still violating the law by using old licenses will be rounded up in a hurry.

No Excuse for Delay

"There is no excuse," Secretary Emmerson said today, "for any automobile owner operating his car with a 1922 license. The automobile department of my office has been right up to date all of the time in issuing licenses and there has been no delay. We have worked out a system which enables the applicant for a license to get his plates as fast as the mail can deliver his application and return the plates. We intend to see that the law is obeyed.

"Inspectors will enforce not only the license law, but all other automobile laws and by the use of motorcycles we believe that more effective work in the future can be done than has been done in the past. This is the third season we have had the use of inspectors and they are bringing in many times over their cost to the State besides contributing materially to the safety of the public on the highways."

TWILIGHT BASEBALL PLAN OF BOYS CLUB

Make Application to Chicago Boys League; Team Making Good Showing

The Community Boys baseball team is making application to the Chicago Boys league for twilight games this summer. The Boys club have a pretty good looking team at practice and should they be accepted in the league they will play mid-week games on the City Field. Last week they played a practice game with the Young Mens club team of Lake Forest and were beaten 3 to 0. If they succeed in getting in the Chicago League they will strengthen up some weak spots and with a good coach hope to bring one of the several cups to Highland Park.

LESSONS IN ETIQUETTE

By Miss Vera Deuce

When taking a young lady for an automobile ride do not insist that she pay for all the gas and oil at every filling station. If she wants to buy a new tire occasionally do not mar her pleasure by refusing.
