

Put a Warm Heart inside your furnace

COAL or OIL

must be used this winter. An oil burner that is as simple to operate as a gas stove, clean, odorless and economical in fuel, is a fine thing on a chilly or damp spring, summer or fall morning. Everyone who has looked at our burner has said it is the best and the simplest gravity feed burner they have seen.

Save money by installing now. They will be higher priced this fall.

A DRUNKEN GIANT

No motorist would willingly turn his auto over to a drunken giant whose destructive powers were well known.

Yet thousands of motorists turn their motor over to a destructive gasoline for operation.

REMEMBER THIS

A poor grade gasoline, a mixture of high and low end points, heavy oily ends, and plenty of carbon, destroys pistons, scars cylinders and creates repair bills. Poor gasoline and poor Motor Oil are the repair shops, the used car dealers and the manufacturers' best bet for more business.

LACO GASOLINE, is high test straight run, guaranteed to be uniform and complete in explosion, full of POWER, packed with miles and filled to the brim with dollar for dollar value.

Use LACO GASOLINE and MOTOR OILS. You will appreciate the difference.

SALE OF OBJECTORS PROPERTY ORDERED

RESULT COURT DECISION

County Treasurer Authorized to Sell Realty Affected in Recent Tax Case From North Shore

County Judge P. L. Persons last week approved the application of County Treasurer Ira Pearsall to sell a large amount of Highland Park real estate the owners of which fought objections to the Supreme Court, where they were defeated in seven of the eleven objections these being among the most important issues involved so far as the county is concerned.

The order of Judge Persons is in accordance with a mandate issued by the Supreme court recently which was remanded back to the local court for entry of judgment against the property.

The case was brought against the county treasurer by George D. McLaughlin and other of Lake Forest and Highland Park restraining the treasurer from collecting the taxes included in the 30 per cent blanket increase of the board of review, on the claim that it was illegal, and they made a like objection to their portion of the \$1,000,000 road bond issue, besides several others. In the county court a number of objections were sustained and others were overruled. Both the county and objectors took appeals to the Supreme court on the points in which they were defeated, respectively. The Supreme court issued a mandate sustaining the county in the most important points, with the result that the county treasurer now can demand payment of about \$85,000 in back taxes or sell the property, under the order of Judge Persons.

SAFETY OF WORKERS SAFEGUARDED WELL

BY PUBLIC SERVICE CO.

Methods of Reviving Those Who Are Injured Also Studied and Employes Trained in First Aid

The Public Service Company devotes great attention to the safety of its employes especially those engaged in more hazardous work. It has a regular safety organization and carries on a constant educational work instructing men how to avoid unsafe practices. Methods of reviving and resuscitating persons victims of accident have been evolved by the electrical and gas industries generally and these in practice prove effective.

First Aid Work
So familiar have many Public Service men become with these methods that they have more than once been called on by local municipal authorities for service which they are always ready to give. Recently two children in a town served by the company, were overcome with gas from an open jet. The local experts were unable to resuscitate them but a lineman in the company's employ did so.

The company is extending the scope of its safety bureau. It will shortly begin training all employes so they may be prepared to render first aid in case of emergency. The course to be established will include tuition in methods of applying bandages, splints, etc., and the application of tourniquets to check bleeding. The first team will consist of twenty employes who will be trained in Chicago under the supervision of a qualified director. As soon as the course of this team is completed, others will be organized.

Training Employes

It is hoped that within one year each of the male employes of the company will have received a course of training in first-aid work. As the work progresses, it is planned to select a team of twenty men to act as the company's exhibition first-aid team. This team, of course, will be uniformed, and will be entered in competition with teams of other companies, including the Elevated system, Commonwealth Edison Company, Peoples Gas Light & Coke Company and the Chicago Telephone Company.

Frankfort sizzlin,
Hungry for a hog,
Mustard enna bun, please,
Atta—H-O-T D-A-W-G!

Judge—"youretobeshotatdawn."
Prisoner—"idontgetuptheartly."

One little motorist to other little motorist—"What's the matter? Fixing a puncture?"
"Nope, Old dear—I'm just changing the air in the tires."

He (walking by a graveyard)—
"Wouldn't it be ghastly if all the dead people would come to life again?"
She (yawning) "Oh, I don't know, I wish one of them would."

Suitor—"May I call you by your first name?"
She—(shyly) "Yes, if you will let me call myself by your last name."

This Residence Sheeted with **EXWO** Expanded Wood Lath The Expanded Plaster Key, as Backing for Stucco Saving 35% of First Coat

George E. Bowden residence, 625 Central Avenue

Mr. Bowden has the following to say regarding the use of EXWO Wood Lath: April 23, 1923

Expanded Wood Lath Co.

Gentlemen:

While figuring on my new home sometime ago, one of your stockholders after considerable arguments, (I was a skeptic) convinced me to use Expanded Lath, so I decided to have it put on the outside of the house, and had regular lath put on the inside.

Have occupied my home about nine months, and have discovered the Great Value of Expanded Lath, not a single crack appearing on the outside, but have discovered several cracks in the plaster all over the inside of house. I also have put Expanded Lath on the inside of my Garage and find it very satisfactory, and will highly recommend it.

Yours very truly
GEO. E. BOWDEN
