EIGHT-CYLINDER, V-TYPE, 90° ENGINE

CADILLAC

There are two fundamental reasons for the deep-rooted preference for the V-type, 90°, eight-cylinder Cadillac—a preference proved by the sale of more Cadillacs than all other cars combined at or above its price.

First—Cadillac has won this leadership by its dependability—by a mechanical superiority which the public has found to give more value for less expenditure than any other fine car in the world.

Second—Cadillac, instead of selling for more, actually sells for less than any other car which has a valid claim to comparison with it.
