PROMPT ACTION NECESSARY

It is a matter of gratification to the North Shore communities interested to know that active steps are being taken to interest the state highway department in the early completion of state bond issue route No. 22, the Barrington-Lake Forest road, which will open Green Bay road between Highland Park and Lake Forest by a direct paved highway on the west side of the railroad. This route has been tentatively mapped out since the system of roads under the \$60,000,000 bond issue plan was arranged, and unless its completion is soon provided for the fund will be exhausted before this section is reached, those who are informed in this matter report.

In many parts of the state interest in securing as large a share of the bond issue appropriation for roads is intense, and every possible influence is being brought to bear on the governor and highway department to build roads where these sections desire them. Naturally where widespread interest in getting roads built is shown and strong influence is exerted results are obtained more readily than where apathy is manifested. Hence it is necessary for this section to show revived interest in this route 22 project if the state authorities are to be expected to give it early attention. The larger and more influential the delegation sent to Springfield to boost the construction of this road, the better the prospect of success.

It is a proposition that should have the prompt and hearty support of everybody in the communities to be benefited, and the organizations which already have displayed interest in the plan, the Lake Forest Kiwanis club and the Highland Park Business Men's association are entitled to credit for their activity in the matter. Through their interest and readiness to do everything possible to push the project before the proper authorities and in the proper manner it is believed the road can be secured next year. But prompt action is necessary, and the time to do good work on the plan is now.
