

Yellow Cab

Offers Standardized Meter Service

BECKER'S YELLOW CAB promised a "cab revolution" in Highland Park. It is already under way. It is now possible to ride anywhere in our village at a fixed rate day or night.

YELLOW CAB meter service is the only fair method of reckoning cab rates. You pay for just what you get and no more. The meter does not know whether it is day or night but figures one rate for all. The short haul does not pay for the long haul.

We want to express our appreciation for the many kind things that have been said by grateful Highland Park citizens on the establishment of real taxicab service in our community.

In return, we promise to maintain the same high standard of service that distinguishes organized responsibility.

Call Highland Park 31 and get a safe, clean, heated YELLOW CAB, in charge of a responsible driver.

IDENTICAL panels with frames four feet high and eight feet long, constructed with sills and studs 7/8x3 1/2 in. and studs placed 16 in. on centers, were prepared. FRAME A had one side covered with 3/8 in. dressed sheathing nailed at each stud with 8D nails, and the other side covered with common lath spaced 2 in. on centers and staggered in the usual way. FRAME B was covered on both sides with Expanded Wood Lath sheets 8 ft. long and 16 in. wide, fastened at the juncture of each rib and stud with 5D nails. In testing these panels the bottom sill was clamped to the base of testing machine and the pull applied to the top sill in the direction of its length. Expanded Wood Lath, by this test, has been proven much stiffer than the old standard construction. But added to this advantage are its high insulating qualities and the much lower construction cost when used for either exterior stucco or interior plaster.
