Customer Cooperation

FLEPHONE service consists essentially in providing the facilities for communication.

Reduced to fundamentals, it may be stated thus:-A is provided with a

telephone.

B is provided with telephone.

C, through wires mechanism, connects these two telephones

Satisfaction with the serve e-depends largely on A and 13. From the very beginning

their cooperation is imperative. A must call B and B must stiswer. Doing these things in the way which makes for good service involves: -

1 -Such care in asking for the number as one would use in addressing a letter.

2-Such promptness in answering the call as one would give to keeping a personal appointment.

3-Such courtesy as one would show in making or receiving a business or social call.

4-Such clear, correct speech as one would use in the face-to-face transaction of the most important business.

Each subscriber can increase the effectiveness of his telephone communication by such thoughtfulness as he would employ in his daily life.
