The Man Who Must Always Be Right

In almost all walks of life, in all studies, professions and businesses mistakes can be made. In our business, however, mistakes are impossible, otherwise lives are in jeopardy. Bring all your prescriptions here where you get the finest of drugs and the greatest of care, supported by the best knowledge and good, long experience. These are the things that count in intricate or even simple prescription work. And unless you get them you get less than the best and less than the doctor expects. Here patient and doctor alike get the satisfaction and the safety that good medicines properly put together can afford, and it is cheaper in the end to bring prescriptions here than to go shopping for them somewhere else.

United States uses three and one half times as much electricity per capita as does Great Britain. Use of manufactured gas in the United States has increased 133 per cent in 20 years. It would take 460 sperm candles to equal the illumination of the average electrically lighted home.
