

REPUBLICAN RULE BRINGS PROSPERITY

BUSINESS METHODS USED

Conditions Almost Chaotic When G. O. P. Returned to Power Over Three Years Ago; Cut Expenses

When the republican administration came into power, roughly three and a half years ago, conditions were almost chaotic. Industry, commerce, transportation and agriculture were suffering from the most violent dislocation of the nation's history.

Taking hold of this deplorable situation, the Republican administration realized that the first essential was installing an orderly and businesslike method of handling the public finances. President Harding in his first message called attention to the crying need for this action.

Budget Law
The Budget and Accounting Act was the response of the Republican Congress to the President's appeal. A similar act had been passed by the Republican Congress preceding that which came in with President Harding. President Wilson vetoed this act.

President Harding called upon Charles G. Dawes to set up the budget machinery and operate it until the wheels were running smoothly and without a hitch. With the earnest co-operation of the heads of federal departments, bureaus, and commissions, the program of rigid economy was put into effect.

The most astonishing results were shown by the end of a year. Although the appropriations of Congress for the year were \$714,000,000 less than for the previous year, many departments returned unexpended moneys to the treasury—the first time in American history that this had occurred.

Cut Expenditures
From that beginning the steady downward march of public expenditures under the administration of Harding and Coolidge has kept on steadily. First of all, the estimated requirements of the various branches of the government have been revised and reduced by the Bureau of the Budget. Then Congress has still further cut the requested appropriations. These Congressional figures and Budget Bureau has considered as maximum expenditures that might be made, and has continued the practice of turning back unexpended balances at the close of each fiscal year. In brief, under the Republican budget

system, the government has used less money than was provided for it, which in turn was less than was sought from Congress.

RECENT PROCEEDINGS IN PROBATE COURT

Orders and Docket Entries Made In Number of Cases Up For Settlement

Among a large number of matters in probate court last week was included the filing of a petition to admit the will of Mrs. Amarilla M. Dow of Waukegan, who left an estate of \$40,000, of which \$10,000 is in real estate. Hearing on the petition was set for Sept. 8.

The will of Richard W. Stafford of Gresham, Ore., was admitted. He was the father of Frank Stafford, Libertyville, and left a \$50,000 estate in Oregon. He also owned considerable real estate in Lake county.

Other matters were disposed of as follows:

Clement Hamel, Libertyville. — Petition of Celia Hamel for probate of will filed and set for hearing Sept. 8, 1924, at 10 a. m. Estimated value of estate \$211 real estate.

Andrew Smith, Russell — Final report and account approved. Estate closed.

Rosina Dunlap, Town of Warren — Supplemental proof of heirship made. Final report and account approved. Estate closed.

Katherine Murray — Final report and account approved. Estate closed.

Ella N. Doolittle — Hearing on petition for probate of will continued to Aug. 14, 1924.

Archie Gibson, Lake Villa — Hearing on petition for sale of real estate continued to Aug. 25, 1924.

William F. Haase, Waukegan — Hearing on final report continued to August 14, 1924.

William E. Howell, Libertyville — Will admitted to probate. Letters of administration with will annexed issued to Harriet Howell. Bond of \$200. All property, real and personal, bequeathed to Harriet Howell, his sister.

Frank Jocus, Waukegan — Appraisers appointed.

Henry Zitt, insane, Waukegan — Conservator authorized to borrow \$1000 and give mortgage as security.

James Monroe Laird, minor, Highland Park — First account and report approved.

Westel Sebastian Stipe, Highland Park — Record amended to show name as sometimes written Westel Stipe.

Irving E. Stieglitz, Highland Park — Executrix authorized to sell automobile.

Candace E. Winter, Wadsworth — Inventory approved.

STATISTICS SHOW CAUSES OF FIRES

Seventy-five Per Cent Due To Failure in Precaution, It Is Claimed

A healthy program of common sense will be handed the public through the schools, public meetings and press during fire prevention week, Oct. 5 to 11.

Some of the biggest fire losses come through the following channels:

1. Carelessness is the underlying cause of most fires. It is estimated that 75 per cent of them are avoidable if ample precautions are taken.

2. The five leading causes of fire are all in the preventable or partially preventable class. In order of importance, they are "Matches and Smoking," "Defective Chimneys and Flues," "Stoves, Furnaces, Boilers and Their Pipes," "Spontaneous Combustion" and "Electricity."

3. Matches and smoking caused a loss of nearly \$26,000,000 in 1922. These fires could have been prevented if care had been taken in extinguishing matches, ashes and butts before disposing of them.

4. Defective flues and chimneys destroyed property valued at \$18,550,000 in 1922. This is an increase of \$3,750,000 over the preceding year.

5. Fire loss from stoves, furnaces, boilers and their pipes totalled nearly \$17,000,000 in 1922. Most of this waste was caused by improper installation or overheating.

6. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

7. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

8. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

9. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

10. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

11. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

12. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

13. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

14. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

15. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

16. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

17. Electricity caused the destruction of almost \$12,000,000 worth of property in 1922. The use of improper fuses and fuse substitutes and the improper care of electric pressing irons are two leading sources of electrical fires. All electrical installation should be inspected and approved before the current is connected.

18. Proper disposal of oily rags, waste and rubbish will prevent many of the fires caused by spontaneous combustion. Loss from this source was \$14,500,000 in 1922.

The radish was grown in Mr. Bohl's garden and it has two parts. The original radish is about six inches in circumference and at the bottom of that a new radish has grown which is about three inches in circumference. From the top of the original radish to the root of the new one is nine inches and the "two-in-one" radish weighs one pound. The radish is of the Crimson Giant variety. Mr. Bohl has put it on display in J. Y. Huisenga & Co.'s store on River avenue.

RAILROAD TO GIVE PRIZES FOR CATTLE

Northwestern Plans to Stimulate Raising and Judging Dairy Stock; Details

For the purpose of stimulating interest in the raising and judging of dairy cattle, the Chicago & North Western railway company has in co-operation with Mr. W. E. Skinner, general manager of the National Dairy exposition, to be held at Milwaukee, Wis., September 27 to October 4, 1924, arranged to award three prizes for each of the following states in which that company operates, Illinois, Iowa, Wisconsin, South Dakota, Nebraska, Wyoming and Upper Michigan, and one prize to be awarded in North Dakota, the latter on account of their limited mileage in that state.

At practically all of the state fairs, a team of three has been picked as winners in an elimination contest in the selection, feeding and fitting of dairy calves. The winning teams will give demonstrations of their work at the National Dairy exposition.

A WORD TO THE MAN WHO WORKS

By Charles E. Hood
When business and work have been shattered.
And smashed to the very last root,
When all the banks have been plundered,
And everyone's shared in the loot,
We shall pause—when our last cent is squandered—
And say, with a sad, hungry sob:
"We were lured by the third party system—
Now, I wonder who'll give us a job?"

President Coolidge having been photographed while pitching hay, it is up to the other candidates to be filmed while harvesting the corn or pulling up the turnips.

It is claimed that only 20 per cent of the American people brush their teeth. This makes a big opportunity for the false tooth business.
