

Food For Thought

It requires 1900 cubic feet of air to burn one gallon of oil. The Kleen-Heet motor and blower unit measures out and delivers that amount of air. The result is perfect combustion.

Don't be lead to believe that you can burn oil relying on flue draft alone; if you do, you are going to have a costly and sad experience. Invest in a Scientific and Reliable Automatic Oil Burner, the

Represented in Lake County by Heating Engineers, which assures owners of correct installations and prompt attention. Send for names of KLEEN-HEET owners in your own neighborhood.

AMERICAN AID IS SAVING ARMENIANS

BY CARING FOR ORPHANS

Ancient People Given New Lease Of Life After Centuries of Persecution; Reclaiming Waste Lands

Centuries of persecution and suffering has decimated the ancient Armenian peoples and has finally driven them from their former patrimony. Had it not been for the generosity of American people here in the United States and the heroic self sacrifice of Americans with their helpers, across the seas, in the Near East, these people would have all perished and their remembrance would be but the record of history.

But they did not all perish and, although there is still much suffering in the Near East and but little to pass around among the many who are in need, the Near East relief are assisting at the rebirth of a nation in the Republic of Armenia in the Russian Caucasus.

Prepared For Citizenship
The orphans are being cared for in the orphanages and prepared for useful citizenship in the state. Of the work so done by Near East relief much could be said and words are so weak in their power to express the full measure of sacrificial, self-denying service that is being accomplished in this respect. But outside of this work there are other projects being carried out that are perhaps just as great and certainly very vital to the development of the Armenian republic.

Large tracts of waste land are being reclaimed by Near East relief under the encouragement of the governing body of the republic. This gives profitable work to orphans and others and gives promise of an adequate food supply in the future years. The organization has aided in the revival of cotton growing, a crop that will give work and raw material to the people. Farm colonies of orphan boys have been established where modern methods of agriculture are taught, which methods those boys will eventually be able to practice for themselves and teach to others who are still tilling the soil in the primitive fashion. High grade cattle have been introduced and also hogs, as a resistance to the Siberian plague. Near East relief has inaugurated plans for opening an area of virgin land to homeless farmers who have been dispossessed of their former homes by forcible deportation by the Turks. In these and other ways the foundations are being solidly laid for future building. Agriculture, the basic industry, is being developed; other industries are being taught; education of a high type is being given to thousands of orphan children, and who can deny the statement, in the face of this evidence, that we are assisting at "The rebirth of a nation."

Huge Task
This is but one part of the huge task that is being carried on by Near East relief in the countries of the Near East. Funds are urgently needed to continue the work of building what has been saved from the wreckage of the war; food, clothes, medicine and equipment are inadequate to the pressing demands in all parts of the Near East. The work must continue, if what has been done is to be preserved, and the destiny of thousands hang in the balance, dependent upon individual American generosity. Checks are now being received by the treasurer, Mr. George M. Reynolds, at the Chicago office of the Near East relief, 37 S. Wabash avenue, Chicago.

FRAMED PICTURE IS VALUABLE AS GIFT

Increasing Vogue for Pictures In Home Decoration; Copies of Paintings

A gift of a framed picture has 100 percent joy-power. It blesses the one whose good taste is shown in its selection as a gift. It blesses the one who receives it and has it to admire the whole year. And it interests and delights everyone in the home which it adorns.

It was once the privilege of only a few people to own the finest pictures; nowadays, however, with the exquisite reproductions of paintings of every kind, inexpensive prints which have the color and other qualities of the originals, everyone alike may have the joy of looking again and again at a lovely picture and having it on his own wall.

One reason for the increasing great vogue for pictures as decorations for the home can be found in the fact that reproductions from original paintings are now come in so many thousands of subjects and sizes, and another reason is the great advance made in recent years in the art of framing pictures artistically, to bring out their beauties, and make the picture a part of the furnishings about it.

With the development of good taste, people find that they can not get along without pictures, which are an expression of an artist's finest feeling in the combination of colors. Brilliance of coloring in modern home furnishings has prompted people to find the center of decorative interest in the pictures on the wall.

A gift of a picture, at Christmas or at any time, is a gift of rare beauty, and reflects distinction both on the giver and the one who receives it.

Why Not Let Your Savings Work For You?

In North Shore Gas Company 7% Preferred Shares. There is no greater evidence of foresight than in saving and investing.

Prudence and foresight, and even a little self sacrifice never have failed to pay handsome dividends in increased happiness.

North Shore Gas 7% Preferred Shares represent the highest degree of sound investment because safety of principal and never failing dividends are assured. The price of these shares is \$100.00 per share.

You may purchase them outright or on a savings plan of \$5.00 or more per month per share.

Don't put this off. See us today about putting your savings to work at a high rate of interest.
