SEEK TO PREVENT POULTRY DISEASE

Lake County Breeders Fear The Appearance Here of Epidemic In South

Poultry raisers in Lake County are much concerned over the reports that have been received concerning a mysterious poultry disease that has developed in the southern part of the state, but has been reported from many other sections. Lake county farmers are keeping a close watch on their flocks so that in case the disease appears, prompt steps may be taken to eradicate it. Every possible precaution is being taken. So far as known the disease has not yet appeared in this county.

Severe measures to check the disease which has resulted in embargoes against live chickens from Illinois and surrounding states, are recommended by Dr. J. B. Boughton, acting chief of the animal pathology and hygiene division of the college of agriculture, University of Illinois.

Sick chickens showing signs of the disease should be killed and burned along with those that already have died. Dr. Boughton recommends. Following this, the pens, houses and lots should be disinfected thoroughly and faulty house conditions corrected so that the chickens will be protected from drafts and cold, and damp floors, he said. Grain rations should be reduced and laxative feeds substituted.

Radical measures such as these may seem severe, but they are justifiable in the face of the enormous losses that already have been caused by the present outbreak, Dr. Boughton stated.

Use of medicine and the treatment of individual fowls have little, if any, value as a means of checking the disease, he said. Sanitation proper housing and the right kind of feeding are at present the only hopes of getting the sickness under control.

HOLDUP MEN'S CAR STOLEN; BEING HELD

Bandits Who Took Goods From Delivery Trucks Here Used Packard

The twin-six Packard, employed by the lone bandit to hold up two trucks carrying goods for Christmas delivery at Highland Park, was located at Glencoe, and held for an Elgin man, who notified the Glencoe police that it had been stolen several weeks ago. At first the report was that the men had lost several hundred dollars, as they had been delivering parcels sent out from two big Chicago stores on a C. O. D. basis. Later it was learned that the total loss would not exceed \$30.

Claimed that regular exercise is beneficial to the health, and the young crowd are willing to attend to this by being present at all the dances. Many persons are getting awfully worked up for fear that the European nations may not pay their debt to us about 100 years hence.

The time for the girls to propose has gone, but as usual they are permitted to lead the men up to the proposing point.

The professor in an Italian university wrote 10,000 words on a New Year's post card, and if after the good old time manner the postal clerks did their duty in reading it, it must have been delayed in reaching its destination.

If the business boosters all succeed in getting their towns on the map, the school geographies will have to be enlarged.
