Four Buicks FREE!

IT won't cost you a cent to enter this contest of skill. Four Buick automobiles will be awarded as first, second, third and fourth prizes. The only requirement is that you come to our store during the

Devoe Interior Decorating Demonstration

Ask the Devoe Expert to explain to you on what basis the four beautiful Buicks will be awarded. Remember! This contest is open to all without cost or restrictions of any kind. Come to our store during the Devoe Demonstration. Get contest blanks, rules, and other facts about the contest. Absolutely no one can enter the contest after the DEVOE DEMONSTRATION ON

APRIL 20-21
Highland Park Hardware Co.
18 NORTH SHERIDAN ROAD

Come to our store-get the entry blank that may put one of these Buicks into your garage

TELLS SOMETHING OF FAMOUS SHEIK HAD 500 VISITORS DAILY

Near East Director Home on Vacation Describes Experiences with Kurdish Chieftan

Dr. Harry P. Packard of Denver, who for many years has been in charge of the American Presbyterian hospital in Teheran and medical director of Near East Relief in Persia, has just returned to America for a vacation.

During his work in Persia, Dr. Packard supervised the care of 250,000 patients and himself performed 5,000 major operations.

Attacks on Consul
The doctor, who stands 6 feet 4 inches, was at the bedside of Major Robert Imbrie, American Consul in Teheran, when the latter died from injuries received when attacked by a mob of fanatics last July. "The attack on Imbrie was a cowardly and dastardly act," said Dr. Packard. "Major Imbrie was assaulted not only in the streets but also in the hospital, which was stormed by the mob. Internal political troubles were the reason for the attack. Demagogues wanted to bring about a situation which would result in the proclamation of martial law and their plan was successful, though at great cost to Persia's good repute in the world. The country is now quiet under martial law."

Friend of Sheik
Dr. Packard is a close friend of Sheik Sayed, the great Turkish chief who threatens to shake the new Turkish republic from its foundation. Sayed has proclaimed himself Caliph and is fighting the Turkish army over a wide area of Asia Minor.

Sayed lives in a forty-room palace of walnut in the ancient canyon citadel of Nehri, into which none but a Kurd can go on horseback or without taking off his shoes as a sign of submission. The only foreigner who has ever been made an exception to this rule was Dr. Packard, who was thus honored because his medical skill had saved the life of the Sheik's brother.

The famous British diplomat, Sir Percy Sykes, once visited the Sheik and carelessly neglected to remove his shoes on reaching the capital. When he walked over the threshold, he was caught up in the arms of two massive seryants, without so much as "by your leave" and set down again in his stocking feet.

Patient Has 500 Visitors
"When the Sheik's brother was a patient in our hospital," said Dr. Packard, "he arrived with a body-guard of thirty armed men, his private valet and cook, his pipe attendant, and his favorite wife. He spent seventeen days in the hospital, living in state and receiving sometimes as high as 500 visitors in a day until I persuaded him to give up his public receptions during the treatment."

"The invalid took a marked fancy to American rocking chairs and had a dozen made for him during his hospital experience."

PLAN COMPILATION OF ILLINOIS DATA

Commerce Chamber to Collect Information for Permanent Record

Work has been started by the Illinois Chamber of Commerce on compiling for permanent record data on every city and village in Illinois. This is in the nature of a complete industrial survey for the use of persons seeking factory locations, for newspapers and magazines which may want information or individuals seeking knowledge for any constructive purpose.

The work is being done in connection with the Second Annual Illinois Products exposition which will be held in Chicago from October 8 to 17, 1925. The exposition, which is not operated for profit, has as its sole object the "selling" of Illinois to the world as the best place to live in and to do business in.

Local chambers of commerce, industrial clubs or individuals are requested to send in any data or information which will help to make a complete file concerning this city or any other towns in Illinois where this paper is read. This information service will be carried on by the Illinois Chamber of Commerce 52 weeks in the year without cost to those who benefit.

Address information to director of publicity, Illinois Chamber of Commerce, 10 South LaSalle street, Chicago.

PROSPERITY WELL ON WAY IS BELIEF

Observers in Washington Are of Opinion That Good Times Certain

Reports of observers in Washington all express the belief that so far as the United States is concerned prosperity is well on the way and is arriving to stay for some little time. These reports declare that the fundamentals of business throughout the country are solid and that there are no present prospects of any slowing down activities. On the other hand there are reports of the increasing of activities in many sections of the country.

The industries which are supposed to be the barometers for the industrial condition of the country are all said to be in a healthy shape at present and in fact some of these steel industries are said to be running at a more than normal rate.

The Department of Labor reports that there is no more than the usual seasonal idleness in the trades and that unemployment seems to be growing steadily less, as the year advances. In most instances the relation between employers and employees is most cordial and there is said to be less prospects of an epidemic of summer strikes in 1925 than there has been for several years.

It is feared in some quarters that the speculative markets during the past few months may have an adverse effect on business and the treasury is now studying this situation to determine whether the continuing of this speculation should not be discouraged in order to protect trade conditions and keep the money in commercial channels.

STANDARDIZATION OF RADIO PARTS

WILL BE AID TO BUILDERS

Plan Use of Same Kind of Wire Throughout for Hooking Up Sets, Companies Reporting

That radio equipment is fast becoming standardized will be welcome news to radio users and people who would like to enjoy radio, says a bulletin just issued by the American Radio association, the national organization representing the listeners-in. It is said that a large number of people express a desire to own receiving sets but are fearful that they cannot hook up the batteries and antenna and make other electrical connections properly.

Order Out of Chaos

"Standardization means no less than bringing order out of chaos," said Alfred M. Caddell, secretary of the association. "Purchasers of radio equipment not otherwise skilled in the art will now be enabled to hook up the right battery to the right terminal in the set without fear of making a wrong and sometimes unfortunate mistake. For instance, a blue cord will be used to designate the antenna circuit, due to the fact that the antenna is always associated with the blue sky. Yellow cord will be used for the filament circuit to suggest the color at which the filament of the tube burns. Bright red had been chosen to indicate the highest positive B battery potential, this being conventional electrical engineering practices. Black cord designates the ground wire, and so on. Telephone plugs and jacks, vacuum tubes, dry batteries and the like have likewise been standardized from the standpoint of terminology, physical dimensions, constructional details and features involving operation.

Means Progress

"If progress is to be assured in any art, standardization must go hand in hand with its development. This is very necessary to avoid confusion on the part of the users of the equipment and also desirable from the standpoint of inter-changeability of one manufacturer's product with another. The credit for bringing about these welcome advances belongs to the standards committee of the associated manufacturers of electrical supplies, who made a thorough survey of the situation and decided that radio was sufficiently developed to warrant standardization of certain necessary elements, with assured benefits to all concerned."

Proves Valuable

"Our successful treatment of our royal patient afterward proved very valuable, as his intervention enabled us to save the lives of 16,000 refugees a year later at Urumia. 'Whatever the Americans desire I will do,' he said to me on that occasion."

So science supplemented nature, and the greens were ready for use in two months instead of seven.
