

URGES DEVELOPMENT OF ARMENIAN ART

CRAFTSMANSHIP SPLENDID

Founder of Camp Fire Movement Visits Near East and Gets Big Idea for Benefit of Orphans

Just back from a visit to the Holy Land, Mrs. Charlotte V. Gulick, famous founder of the campfire movement, is fired with a new enthusiasm.

Has Big Idea

When Mrs. Gulick left New York she carried letters of introduction to officials of the Near East Relief at various Mediterranean points and a cordial invitation to visit the various orphanages and school of the organization.

These visits became to her the absorbing object of her pilgrimage. Hours that she might have spent in sightseeing were spent in studying orphanage work and the craftsmanship of the dark-eyed Armenian children.

Missionary Zeal

"I have returned to America filled with a real missionary zeal, determined to find the means somewhere and somehow to encourage and assist these children in designing needlework and pottery and to train them in making the beautiful things which Armenians would like to buy.

"In my mind is a vision of Armenian homes beautified with exquisite Armenian embroideries, colorful with lovely Armenian pottery, of tables adorned with Armenian table-covers, of bouquets dainty with Armenian handicrafts.

"Most Americans have seen the fine embroideries that come from the Near East. Many of these are made by small children, who seem to take to needle work as the average American child takes to baseball or football.

exceedingly beautiful, with rare and unusual combinations of color.

Good Workers

"Craftsmanship is imbued in the Armenian child. It is surprising how patiently, how spontaneously, how interestedly the boys and girls labor, and how willing they are to do this work when they might be at play.

"Every aspect of Near East Relief work in Bible Lands is a revelation: It is a marvel how the workers have been able to keep their work free from a too institutional taint; how they kept alive the spirit of happiness and play in these children nurtured in tragedy and deprived at an early age of parents and friends.

"In many of the orphanages, I found that the favorite sport is basketball. I was naturally thrilled at this, because my husband, the late Dr. Luther Halsey Gulick, was the father of that sport in America."

DAKOTA'S BUSINESS EXPERIMENT FAILS

State-Owned Activities Have Not Proved Successful There, Report

South Dakota's plunge into private business several years ago has not proved as successful as was predicted by its sponsors, and has brought a persistent demand from many quarters that all such enterprises be abandoned.

The state-owned cement manufacturing plant cost the people considerably more than the \$2,000,000 appropriated for its construction, and more than it should have, according to a legislative investigating committee.

Recently it has been necessary for the state to issue a half-million dollars worth of bonds to meet deficits of the state hail insurance department. Sponsors said this would show a profit.

Closed state banks, whose soundness was guaranteed by the legislature, will cost the people of South Dakota \$20,000,000, it is claimed.

The greatest failure occurred in the rural credit venture, which was recently investigated by a legislative committee. Unwise loans were made and the state will lose several million dollars. This muddle resulted in the state treasurer being given a penitentiary sentence.

The spring poets are said to have been so busy on cross word puzzles, that they are not offering many verses this year, but watch for some high sounding lines next season.

CEMENT MAKING IS REDISCOVERED ART

MANY LOST IN ANTIQUITY

Malleable Glass, Tyrian Purple and Other Processes Known to Ancients Disappear; Modern Uses

Of all the much discussed "lost arts" of antiquity, cement making is the only one which has been rediscovered in modern times.

For centuries scientists—real and pseudo—have puzzled over malleable glass, which was a form of glass said to have existed in the days of Rome's grandeur and which could be bent or worked like metal without breaking.

Ancient Malleable Glass

Early historians had quite a little to say about this substance, alleging that it was introduced to the court of Nero by a Roman who had been held prisoner in Africa. According to the account, the ex-prisoner brought back a glass goblet which could be tossed about freely, and could be straightened easily whenever dented or crushed.

Modern glass makers are skeptical of the existence of such a glass at any time, and all efforts to rediscover the art of making it, if there ever was such an art, have failed completely.

That copper was tempered to the hardness of steel centuries ago is now pretty well established. Copper chisels have been found in Peru of a hardness far greater than any which it is possible to impart in this day, although modern metallurgists have tried diligently to find a method, and in one or two instances it has been possible to harden the metal slightly.

Every once in a while someone announces the rediscovery of the lost art, but the fact that such claims are not followed by the appearance of manufactured tempered copper on the market is the best disproof of the assertions. Could copper be tempered to the hardness of steel there is no doubt that manufacturers would utilize it for some purposes in which iron and steel labor under disadvantages.

Tyrian Purple

The dye-masters of ancient Tyre are asserted by historians to have evolved a shade of purple so beautiful that it was eagerly sought all over Europe and northern Africa by nations which had themselves progressed well in the art of dyeing. Except that the extraordinary shade was obtained from clams or other mollusks, nothing is known of its manufacture, and all efforts to reproduce it failed. With the fall of Tyre the secret was lost and has never been brought to light.

Forum clearly show on the concrete, marks of the ancient wooden forms, such as present day concrete shows the same patterns. As with Tyrian purple, the art of cement making was lost when Rome fell before the Vandals, and during all the Dark Ages and the Renaissance the secret remained buried.

Cement Rediscovered

But enough information remained so that some time prior to the American Revolution investigators in various parts of Europe began to make cement of varying qualities in a small way. The first notable use of cement in modern times was in the Edystone Lighthouse off the English coast. This was in 1756. It was also employed in the Erie Canal about 1820.

These cements were much like the Roman variety, which has stood for nearly 2,000 years. They were made of materials which nature had already mixed in the proper proportions. But in 1824 an Englishman, Joseph Aspdin, succeeded in making a stronger cement from materials which nature had not already prepared for him. This he called portland cement, because it resembled a durable building stone from the Isle of Portland, used in building Westminster Abbey.

A highly developed form of this early portland cement is the cement of modern commerce, so that the secret of the ancient Romans in this instance has not only been rediscovered but also has been improved upon.

TELLS HOW MUSCLE SHOALS GOT NAME

So Called by Indians Because Rapids Hard to Paddle Up in Canoes

How Muscle Shoals, the government's giant power project on the Tennessee river in Alabama, derived its name, was told to the Lions club at Waukegan last week by Prof. H. Holp at the Chamber of Commerce quarters.

After explaining that the rapids extend 10 miles, and are shallow all the distance, Prof. Holp said that Indians in attempting to navigate up the stream found the task almost impossible because their canoes struck bottom.

Thus came the word "muscle," symbolical of the strength required to paddle a canoe up the rapids. The Indian who could perform the feat became the chief of the tribe.

Prof. Holp, who has been in Muscle Shoals studying the enterprise, said 6,000 government employees are now at work there, building the Wilson dam. During the war about 20,000 were employed.

MAYOR ELECTED YEARS AGO TU
DECADE OF ACHIEV
Period of Notable Growth Lines in Highland City 'Great Credit'
Tuesday of this week was the 10th anniversary of the Highland Park, for it was years ago on the third of April that Samuel M. Hastings first elected mayor of this city. He has held continued having been re-elected to that time.
Mayor Hastings has been cutive of Highland Park for any mayor in the city's history his administration has been one, marked by extensive improvements and achievement lines. It has been a decade of progress and general advancement of the community, the credit of which is due Mayor Hastings the able men who have cooperated with him in the administration of civic government.
Notable Feature
And a remarkable feature of his administration is that in all ten years there has not been a single veto in the city council upon any proposition. Mayor Hastings and council have worked together for the best of the community, all of their accomplishments for the advancement of the city and fit of its people are important.
And here is another notable feature of his administration: in all of his years he has never, when in his office in his hall, each week-day morning, considered of city business, always maintained a zealous interest in city affairs, given liberally of his time, digally of his executive ability, wide business experience in the affairs of the city, and...

DAYLIGHT SAVING BEGINS ON S

North Shore Towns and to Resume Schedule; way Schedules

Next Sunday morning, April 18, daylight saving time will be resumed by most towns in this region. Railway lines operated on standard time their patrons will have to themselves accordingly.

Highland Park, Lake Park, North Chicago, Waukegan and Bluff plan to adopt daylight again this year so that North Shore will be on the same time as the rest of the North Shore Line. Northwestern will modify its plan scheduled to conform new time but will operate as at present.

Libertyville, Antioch, and the other towns in the country, it is understood, will follow the same plan as they other years and remain on time.

JUNIOR PROM HELD SATURDAY EV

Big Annual High School Promises to Break Records Here

Invitations are out for the Junior Prom at the Deerfield high school, which will be held on Friday evening of this week. The program will include Purple Jazz Kings, an Eva Chestra, will furnish music to 11:30, and the receiving line on the floor from 8 to 8:30. The Junior Prom is a great event, and the student body is greatly over the prospect of the best ever held at Deerfield.

One-Minute Ser

Satisfaction in Living If we choose to live in and indifference, however, we may be to live lives of social decency and good behavior only half fulfill our destiny. Not live to ourselves alone. The greatest satisfaction life offers is knowing that we have made of ourselves. But we can't be the most of ourselves unless our best to help others to most of ourselves.
