

Lake County's Most Beautiful Land- scape Garden

NORTH SHORE CEMETERY is now the most refined and pleasing Garden Cemetery in America, and its perpetuation for untold Centuries is assured by an ample trust fund held by a great trust company and so managed that each lot owner may check up on the statements of the management. This is the only cemetery in the country which follows this practice.

NORTH SHORE CEMETERY never has been so attractive before as it is today. Its seven varieties of lilacs and its Spirea Van Houttei ("Bridal Wreath") are now in full bloom. It is probable that neither of these displays is excelled in the State of Illinois, whether in park or Cemetery or Private Estate. Honeysuckles and many other shrubs are in bloom and many large groups of five other Spireas will bloom later. Forty-five varieties of trees are in full or half leaf. Scores of Red Maples and groups of Purple Leaf Plums and Golden Leaf Elder are dotting this exquisite garden all over with their unrivalled warmth of color. The gentle slopes of velvety lawns, the white driveways, the presence of many birds and their palatial homes, all add to the charm of this picture.

THE NEW MASONIC SECTION'S verdure is making good progress. Its soil is already consecrated by its first grave. Many lots in this section are sold, while its massive and artistic monument is being made at the quarries of the J. D. Sargent Granite Company at Mount Airy, North Carolina. This Memorial will be without a peer in any Masonic section in the United States. It will be erected in June at a cost of \$20,000.

THE ROSES OF NORTH SHORE CEMETERY have been admired by hundreds of visitors during the last two seasons, and now we have planted 1500 more expensive bushes of the choicest varieties. These, when established, will give a wealth of bloom from June to late October, annually.

THE SPECIAL CARE of graves now in evidence all over the grounds is a never-to-be-forgotten illustration of the finest tribute which can be accorded by the living to those who have passed the unseen portals.

THE GREENHOUSE OF NORTH SHORE CEMETERY is now being patronized by scores of visitors daily. It contains many varieties of plants which are ideal for the Summer blanketing of graves; also a supply of cut flowers.

SHARVIN POST OF THE AMERICAN LEGION conducted Memorial Services at **NORTH SHORE CEMETERY** on Memorial Day, as is its custom. Four thousand people visited the grounds and enjoyed its many charms during the day. They began to arrive at 8 in the morning and continued to come until 9 p. m. Many were so delighted with what they saw in the morning that they returned with friends and neighbors in the afternoon. It was an occasion well suited to inspire artists and poets to their best work.

LOT PRICES in beautiful new Section E are now less than one-third the prices in the leading Chicago cemetery and **NORTH SHORE** is superior in all points of merit. The prices in Section D—the new Masonic Section—are also very low, and we now wish that twice as much space had been set apart for this section. Hence our prices must necessarily be advanced from time to time.

VISITORS WELCOME at all times.

JOHN WESTERN, President.
