NUMBER 22

THURSDAY, JULY 30, 1925

THE TEST OF OUR GENERATION

The days of the pioneer are not over. There are continents of science in which we have penetrated but the coastal plain. And from our industrial revolution we are confronted with economic frontiers and unexplored plains as forbidding, as romantic and as pregnant of added happiness as our fathers ever knew. The test of our generation, says Secretary Hoover, will be whether we maintain the character that can overcome these frontiers, whether we can master the forces we have created, whether we can maintain the advantages we have received from these vast gifts of science, whether we can secure their just diffusion to all who will work and strive, whether we can hold ourselves a nation dedicated to equal opportunity for all. We have not lost those pioneer qualities of independence, of rugged character, of self-reliance, of initiative. Nor have we lost that great quality which they imbedded in American character—the quality of neighborly co-operation and service for mutual advancement. And it is in this quality that our hopes must lie. For if we are to find the solution to our many problems, it will be in our ability to command an enlarged vision of neighborly relations by stretching them over the nation as a whole. Nor is this theme so far from intelligent self interest as to divorce it from the realism of life.

DOES NOT THRIVE HERE

According to the United States Chamber of Commerce there is a motor car in operation in the United States for every seven inhabitants of the country. Eight billions of dollars are spent annually for automobiles. Two billions go for new cars, and the balance for gasoline, repairs and accessories. There are 17,500,000 motor cars in use in the United States according to the figures presented.

Without going into a discussion of the economic effects of the motor industry, it is shown that during the rise of the motor era in America saving deposits have nearly doubled, individual bank deposits have more than tripled and life insurance in force has increased two and a half times.

One of the first facts which strikes the average tourist to Europe is the scarcity of motor cars. In Bulgaria there are no more automobiles than in the average small American city. Nowhere across the Atlantic is there anything like the proportionate number of automobiles as in America.

Here may be found another reason why radicalism does not grow and prosper in America, comments the National Republic. Our automobiles are not owned principally by the wealthy as in Europe. The greater proportion of them belong to the farmer, the teacher, the mechanic, the clerk, the small merchant, the railroad man, and so on. They are indicative of the progress and general prosperity of America, all the more significant that in addition to growing automobiles, we have been growing savings bank accounts, individual bank deposits and life insurance at the same time.

Bolshevism will not prosper under conditions which produce in a nation such prosperity and progress among all classes of citizens.

DISCUSSES CAUSE OF RECENT QUAKES

OPINIONS OF GEOLOGIST

Dr. Grant Read of N. W. U. Department Tells How Scientists Determine Probability of Tremors

It is not likely that there is any connection between the recent earthquake in Montana and the tremor which levelled the business district of Santa Barbara, according to Dr. U. S. Grant, head of the department of geology and geography of Northwestern university.

Prof. Grant, just returned from a geological trip, looked over his California earthquake maps and found that they showed a dead fault running west from Santa Barbara through the town of Elwood, some fifteen miles away. He said this suggests that the statements of Prof. Bailey Willis and Dr. S. D. Townley of Leland Stanford university that the Santa Barbara quake was largely a local demonstration is probably correct.

Earthquake Map

"The green line on our earthquake map runs into the ocean through the city of Santa Barbara and west through Elwood," said Dr. Grant. "This green line is symbolic of a dead fault, or an earthquake rift which hasn't been active in recent historic times. The probability is that the Santa Barbara quake followed this ancient rift, though of this we are not certain. On the other hand, the fault which caused the San Francisco earthquake nearly twenty years ago was an active rift running northwest from lower California up through San Francisco into the sea and thence to Alaska. That earthquake doubtless may have produced a condition which resulted in the subterranean readjustments at and near Santa Barbara, but I see no reason, with present evidence before us, to link the Montana quake with the one in California."

San Francisco Quake

Dr. Grant ascribed the San Francisco quake in part to the condition existing in the Pacific ocean west of the California coast where the bottom of the sea slopes down to 12,000 feet, which is a depth lower than the highest elevation of the mountains directly east of the same region. Dr. John F. Hayford, recently deceased, and for many years director of Northwestern University Engineering school, Prof. Grant pointed out, not long ago called attention to these conditions in demonstrating his theory of isostasy which proved that the earth is solid all the way through but that readjustments of its crusts cause earthquakes and similar phenomena.

Theory is Sound

"It is conceded by nearly all geologists that this theory is sound and that the depth of the ocean off California and Japan is an influence resulting in subterranean adjustments," commented Prof. Grant. "But all the quakes in the west cannot be ascribed to the same cause. The Montana tremor was very far distant from Santa Barbara which at this time impresses one as of a local nature. It is interesting to note that the surveys by the Seismological Society of America under the direction of Dr. Willis of Stanford university apparently point to this same conclusion."

The Northwestern university geologist positively stated that earthquakes cannot be accurately predicted and that no man knoweth when, if ever, another disturbance of this sort will re-visit exactly the same locations.

FOR DRY CLEANING & DYEING RUG CLEANING & CURTAIN STRETCHING THE RELIABLE LAUNDRY PHONES 178-179

T. S. Duffy Furniture Co.

According to T. S. Duffy of the T. S. Duffy Furniture Company, who has just finished extensive buying at the American Furniture Mart, Chicago, the world's largest building, where the great Summer Furniture Show was held, the new finishes, designs and constructions, shown for the first time, demonstrate the huge strides furniture is making in keeping abreast of modern home development.

In speaking of this Mr. Duffy said, "The Mart, which contains over 32 acres of floor space devoted to exhibiting the products of America's foremost furniture manufacturers—over 700 of them—was a riot of color and glowing lights. In beautifully decorated spaces, I was able to inspect the latest creations in every type of furniture, from the costliest living room suite to the lowly inexpensive kitchen chair."

"The change in furniture retailing created by the American Furniture Mart has already had its effect in new and more attractive designs and increased marketing facilities, all of which will benefit the ultimate consumer—the house furnisher—in more artistic designs and better workmanship."

"The Furniture Club of America, the meeting ground of the industry, located on the top floor of the Mart overlooking cool Lake Michigan is now recognized and accepted as the outstanding industrial club of America. It was furnished and equipped at a cost of \$200,000 and on the day of July 6th over 7,500 visitors were handled in the large dining room."

"The Mart, in practically the twinkling of an eye, has raised our industry from one of the poorest housed businesses to absolutely the best in the land. The building is an inspiration and has been the means of my meeting, personally, furniture leaders from all sections of the world, with whom I have 'compared notes' for the benefit of the home owners of Highland Park."

"A new addition to be one-third again as large as the present building and topped by a 472-foot blue and gold tower, one of the loftiest in the middle west, is shortly to be erected."

"There is absolutely no need of homes being furnished in the style of twenty years ago with heavy unwieldy suites and pieces. The prevailing note today, judging from the new fashions I have just seen and ordered, is beauty and adaptability to home surroundings. Furniture that formerly went only into mansions and palaces and was the admiration of everyone, is now made available for the consuming public, due to increased production and better living conditions—and values are much greater than ever before."

Mr. Duffy looks for a brisk fall trade in all lines, for conditions are fundamentally sound and the buying power of the average American is constantly on the increase, he says.

LATE PROCEEDINGS IN PROBATE COURT

Estates Under Settlement and Orders and Docket Entries Made by Court

Two of the seventeen cases heard by Judge Martin C. Decker in the probate court last week were closed. Proof of heirship was taken in the George W. Chandler matter, and the Anna Erb estate was closed. The complete proceeding was:

Estate of John S. Gridley, insane, Libertyville. Conservator authorized to expend money for care of ward.

Estate of Josephine R. Matthews, incompetent. Hearing on second annual report and account continued to July 27.

Estate of Marian McDougall, Lake Villa. Supplemental proof of heirship taken. Final report approved and distribution ordered.

Estate of Lucius L. Starr, Waukegan. Final report approved and distribution ordered.

Estate of Charles L. Hendricks, Ravinia. Proof of heirship taken. Hearing on proof of will continued to October 12.

Estate of Frank and John Cankar, minors, Waukegan. Supplemental inventory approved. Guardian authorized to expend money for care of wards.

Estate of Sarah Hook, Grays Lake. Hearing on final report continued to August 27.

Estate of Marguerite Prendergast, Libertyville. Proof of heirship taken. Will proved and admitted to probate. Estate valued at \$11,000, bulk of which is left to Gustav Lange in trust for daughter, with bequests to brothers and friends. Letters testamentary issued to Gustav Lange. Bond of \$22,000.

Estate of George W. Chandler, Waukegan. Proof of heirship taken. Will proved and admitted to record. Estate valued at \$2,500 left to Abbie M. Chandler, wife. Letters testamentary issued to Annie M. Chandler. Bond of \$5,000.

Estate of Anna M. Erb, Waukegan. Final report approved, estate closed.

Estate of Arthur Wirtz, et al. minors, Town of Fremont. Final report approved, estate closed.

Estate of Percy Tinsley, North Chicago. Supplemental proof of heirship taken. Petition for sale of real estate under contract amended and

hearing continued to July 27. Estate of LeVt Wait, Ingleside. Final report approved, distribution ordered.

Estate of Richard Duddles, Libertyville. Letters of administration issued to Franklin S. Kern. Bond of \$18,000. Estate of Emma Mohrmann, Waukegan. Proof of heirship taken. Letters of administration issued to Anna J. Mohrmann. Bond of \$14,000.

Estate of Ann Sessler, Waukegan. Hearing on final report continued to August 20, 1925.

Levi Wait, Ingleside. Final report and account filed and hearing, continued to July 20.

Hans Westgaard, Lake Villa. Inventory and appraisal bill approved.

George W. Chandler, Waukegan. Hearing on petition for probate of will continued to July 20.

William L. Neubert, Lake Forest. Final report approved and distribution ordered.

Arthur R. Waldmann, Highland Park. Supplemental proof of heirship taken. Sarah Whiteside Brown, Highland Park. Inventory approved.

Richard Duddles, Libertyville. Proof of heirship taken. Petition for Letters of Administration to Franklin S. Kern filed. Bond fixed at \$18,000.

I wish to announce to the public that I have taken over
