### EVERYTHING READY FOR HOME-COMING

AT D. S. HIGH SCHOOL

Annual Reunion of Alumni Sat-  
urday; Football Game Big  
Feature In Afternoon;  
Dinner, Dancing

Everything is in readiness for the sixth annual home coming at Deerfield-Shields high school, and there is every indication that this year's gathering of alumni and friends of the school will exceed all previous records, as each year the attendance has been increasing and interest seems greater.

The afternoon feature will be the football game between Deerfield and La Grange. A dinner for the alumni, faculty, seniors and football team will be served at 6:30 with suitable program in connection and dancing will follow. Harding's orchestra will furnish music for the program and dancing.

**Football Game**  
The football game commences at 2:00 p. m. La Grange has a strong team, but Deerfield has a better one, and an exciting game is promised.

La Grange so far this season has lost one game and tied another in the Suburban series. They held Bloom to a 7 to 0 score in an uphill battle and tied the husky Thornton team. In previous years they have also had good teams, and the last time they met Deerfield, La Grange carried off the honors, 19 to 7.

**H. S. Band to Play**  
The high school band will furnish music for the game under the direction of Mr. Bolle. Special space will be reserved for the band and Deerfield students, and a score of ushers will be on hand to direct them where to go.

The D. G. A. will have charge of decorating the field for the big game, and something unique in the way of appropriate adornment is being planned. The girls will sell balloons to be turned loose when Deerfield scores its first touchdown. Hot dogs, candy, peanuts, etc., also will be sold to help defray expense of decorations.

**Dinner at PSCJ**  
In the lunch room at 6:30 dinner will be served. A business meeting will be held before this happens. After being cheered up by a pretty cocktail the regular menu will make its appearance. This will consist of mashed potatoes, chicken patties, string beans, salad, ice cream, cake and coffee.

The program after the dinner will last about one hour and one quarter. Three speeches of about ten minutes each will be given. Cheers and songs will punctuate the eating. The football boys will be present as guests of honor. Dancing will follow.

The program committee is composed of Edwin Gilroy '14, president of the alumni association, Arthur Olson '19, Hazel Bell '14, Wm. Wrenn '05, Leslie Schaufler '14 and Robert Pease.

### PRESENT PLAYS DEC. 1 AT ELM PLACE SCHOOL

Tony Sarg's Marionettes to Give  
"Pied Piper of Hamelin",  
and "Treasure Island"

The Highland Park Woman's club will bring the Marionettes to the Elm Place school auditorium on the afternoon and evening of December 1.

With "Treasure Island" as the evening offering, and "The Pied Piper of Hamelin" with shorter novelties for afternoon, it is felt certain that the most captious will be pleased with the entertainment, whether they be six years old or sixty. One doesn't have to be in either their first or second childhood to enjoy the Marionettes—so much may be stated for the comfort of those adults who are afraid that puppets might be "infra dig."

"Treasure Island" includes a lively disagreement on board the pirate ship. A dog and a cat on the same craft make things interesting for each other, as well as those who see their antics and their disagreements. Dumb animal life on the island where the pirate crew finally landed is sufficient for the most critical.

As for the Pied Piper of Hamelin, everybody knows that animals are responsible for the entire story, and as the procession of rats becomes a stampede and a rat riot, the wonder grows as to where so many could have been found in all the world. But the Pier Piper promised the Burgo-master the pests should go, and if you happen to see a straggler or two clinging precariously to the pier or to a door, have no fear. The Pied Piper is supreme and none escape.

The afternoon performance will be at 4 o'clock and the evening at 8:30. Reserved and numbered seats may be obtained from Mrs. Carl Bingham, Highland Park 84, between 8 and 9 a. m. or 6 and 7 p. m.

Moses may have been a very meek man, but he couldn't have looked half as meek as the average citizen when being bawled out by the traffic cop.

The modern girl doesn't have her hands in the dishwasher much, but she is not afraid of getting them into the automobile oil.

### COMPANY CONTROL OF UTILITIES BEST

MAKE COMPARISON

Interesting Discussion by Dean  
Heilman Before Indiana  
Teachers on Public  
Ownership

Despite the failure here and there of privately owned municipal utilities to function satisfactorily, Dean Ralph E. Heilman, head of Northwestern University School of Commerce, told members of the Indiana State Teachers' Association in session at Indianapolis, that privately owned companies, supervised by state utility commissions, are to be preferred to publicly owned and operated utilities. Dr. Heilman has made a special study of public utility ownership, operation and control and is of the firm opinion, he said, that state utility commissions have proven "the most effective governmental machinery thus far established for the regulation of public utilities." Dr. Heilman's topic was "Government and Business" and he followed the theme in this way:

**Not Above Suspicion**  
"Not all of the state utility commissions have been above criticism, and in some cases the appointments to the commission have been disappointing. Never-the-less, viewed purely as a form of government machinery, there can be no doubt that they have proved the most effective machinery thus far devised—much superior to detailed control by legislative bodies, state legislatures, city councils, etc.

**One Factor**  
"The conditions responsible for the municipal ownership movement in the United States have to a considerable extent disappeared, or are in process of doing so.

"But today conditions have changed in both of these respects. The coming of giant power is bringing it about that almost any community can obtain electric service without the necessity of resorting to municipal operation. And in most of our states we have established utility commissions or boards, such as the Indiana Utilities Commission, vested with wide powers of regulation and control over the rates, service, securities, plant, equipment and facilities of public utilities. This power to control is flexible and adjustable. The commission may from time to time issue new orders or decisions regarding these matters, as necessary in order to meet changing conditions. If the rates are regarded as too high, if the service or facilities are thought to be inadequate, the matter may always be referred to the commission. Prompt and impartial consideration is provided. The commission is clothed with full power to order such changes as are necessary to promote the public convenience. The establishment of adequate machinery for regulation and control, through public utility commissions, has substantially weakened the demand for public ownership of utilities.

"It is not to be understood that every privately owned utility is more efficient, more economical, more progressive and provides better service than any publicly owned plant. It would be going too far to say that

there are no successful publicly operated utilities. Certainly public ownership at its best is better than private ownership at its worst. But political conditions are seldom favorable for the operation of public ownership at its best; whereas under present methods of regulation and control, the evils of private ownership are rapidly disappearing.

"If we do not regard our machinery or laws for the regulation of business as adequate, we can change or improve them, at any time, by legislation. Certainly if we are not able to administer the machinery and laws that we now have for regulation and control, or to improve them if necessary, we are not justified in assuming the burdens of ownership and management, which would prove infinitely more intricate and difficult."

### MOTION PICTURES TO SHOW AIR EXPLORING

Department of Agriculture Has  
Issued Films; Aids in  
Forecasting

Two new motion pictures just released by the United States Department of Agriculture show the upper-air observation work being conducted by the Weather Bureau, and one of them gives incidentally a review of important American aeronautical activities.

The first film, "Exploring the upper air," deals in a popular manner with the scientific side of upper-air observation work. It depicts flights by Weather Bureau meteorologists in airplanes, dirigible balloons, and free balloons in the study of upper-air conditions for weather forecasting. An airplane flight above the clouds, a dirigible journey in the neighborhood of St. Louis, the beginning and the end of a free balloon flight, the making of "dust counts" high above the earth's surface are among the striking scenes.

Three days after the scenes were photographed, Lieut. James T. Neely, of the Army Air Service, and Dr. C.

Leroy Meisinger, of the Weather Bureau, who appear in the scenes, left Scott Field, Ill., in a large balloon for a long flight, during which the balloon was destroyed, apparently by a static discharge, and both men were killed.

The second film, "Watching the weather above," shows the daily work of making upper-air observations at numerous stations by means of large kites and "pilot" balloons, the assembling of the information at forecast centers, and the distribution of "flying weather" forecasts from these centers. But first the film shows the need for the forecasts by means of a succession of pictures which constitute a fairly complete review of American aeronautics. It depicts flights by Army airplanes and dirigible balloons, Navy seaplanes, the great Navy dirigible Shenandoah and Los Angeles, the progress of the airplane planes from New York to San Francisco, the detection of forest fires by airplanes, and the "dusting" of cotton and other crops as protection against insects. The film closes with the statement:

"Fifty years from now we'll all be flying," is a frequent prophecy. If so, the Weather Bureau, through its present preparations, will be ready to help make the air safe for you."

### CROWDS THROG NEW ELECTRIC HOME HERE

More Than 800 Cars Visit Place  
on Sunday, Says Report;  
Two Weeks More

The model electric and Celotex home at Roger Williams avenue and Green Bay road, Highland Park, recently written up and given prominence by the National Real Estate Journal and the Celotex company and which the Public Service company of Northern Illinois has chosen to demonstrate the modern labor-saving electrical devices for the housewife proved such a popular rendezvous for north shore motorists last Sunday that it was necessary to call a special detail of policemen from Highland Park to straighten out the traffic jam.

The crowds, who surged through the home came in such number that it was impossible to accurately check the attendance but the Highland Park police estimate that more than 800 cars were parked there in the course of the day. This home will be on display for the next two weeks daily between 2 p. m. and 9 p. m. and all day Saturdays and Sundays.

# GARNETT'S

STORE NEWS

A November Selling of  
**Smart New Coats**  
at Tempting Prices  
**\$29.50 to \$89.50**

Every coat has been lowered in price for this selling, thus affording an opportunity for a saving decidedly unusual. Then, too, there is a definite satisfaction in choosing a coat here since their practical qualities are as marked as their beauty and becomingness.

**Fabrics are the Finest and  
Practically all Coats are  
Elaborately Fur Trimmed**

- FABRICS: —Pinpoint, —Velour, —Fourisuede, —Bolivia, —Lustrosa

**Black and Many New Shades are Shown**

## Silk and Wool Hosiery

For Women

**\$1.00 to \$2.25**

The Phoenix, Kranit and Burlington lines contribute their best numbers to this collection of fine hosiery. All the popular shades are found, including fawn, camel, airedale, jackrabbit, beaver, biege and black. The values are splendid at whatever price you wish to pay.

**Pretty New Robes  
Corduroy Blanket Cloth  
and Silk  
\$3.75 to \$18.50**

New colors and effective combinations mark this collection of bathrobes for women decidedly out-of-the-ordinary. The new puffed sleeve and collar effect is a pleasing feature.

### A Splendid Gift Suggestion

The good quality of the materials and the careful tailoring, to meet the demands of discriminating women, suggest these robes for gift giving and the experienced shopper will make her choice while assortments are so extensive. Prices are very reasonable.

## Dr. Denton's Sleeping Garments

Sizes 0 to 14 years

Dr. Denton's Soft-Knit Sleeping Garments, made of new, clean, high-grade unbleached cotton with a little natural-colored, very fine wool, carry off all perspiration, keeping the body dry and warm. Sizes 0 to 5; open down the back. Sizes 6 to 14; open down front.

**Priced Accordingly From \$1.10 to \$2.75**

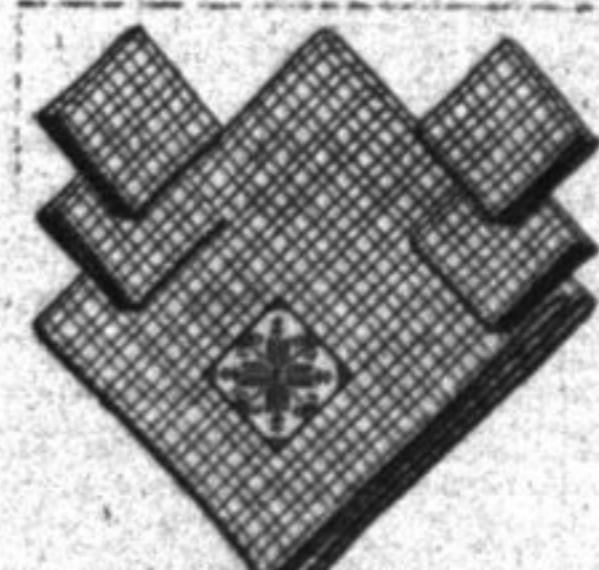

## Bucilla Package Outfit

for those who prefer  
to give hand-made  
gifts.

It is not a day too early to begin needlework for gift giving and there is a wealth of ideas in this showing of Priscilla Package Goods — decorative articles for the home, various pieces of apparel for women and children, all stamped on finest quality materials.

**Economical and  
Easily Embroidered**

Each package contains stamped articles, fast color flosses, a detailed lesson chart and a good steel needle.

**BUCILLA  
Embroidery Package**  
No. 5007 \$2.75 Set  
Imported Checked Linen Tea  
Set, 24" Cover and 4 Napkins.  
Guaranteed fast-color with  
Gold or Blue Checks.
